

To Whom It May Concern,

I am writing in support of the proposed residential enclave entitled Betty's Village at Opportunity Village. I have served on the board at Opportunity Village for over 20 years and am therefore well aware of the critical need for a safe, community based residential offering for our wonderful Opportunity Village clients. I had the honor of serving as the Campaign Director for the capital campaign which raised the funds to build the Engelstad Campus and participated with my family in endowing the Thomas & Mack Resource Center on that campus.

In the earliest planning stages of the Engelstad Campus we envisioned having a residential component to create the opportunity for our older clients to live in a lovely community adjacent to where they worked, recreated and spent time with friends. We designed the beautiful 2 acre Sean's Park adjacent to the Campus to complement the residential enclave. Now we have the opportunity to finish the vision of providing a safe, independent and fulfilling lifestyle for our clients.

Thank you for your kind consideration of Betty's Village.

Sincerely,

Tom Thomas
