

To Whom it May Concern:

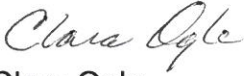

Our son is a client/employee at the Englestad Opportunity Village campus. He is very excited about moving into Betty's Village. Currently, he rides Para transit for two hours a day to get back and forth to work and this move would enable him to walk to work. He likes the floor plans, the clubhouse plans and the safety of a dedicated community to those with disabilities.

We have reviewed the plans and proposal for Betty's Village and are very supportive. The Village will enable our son to have the independence he wants and the safety he needs. Our son has lived in an apartment on his own and has been victimized by his neighbors. This caused him to move back into a group home setting. His neighbors at the Village will support him and become his social network.

Opportunity Village has been at the forefront of supporting mentally challenged individuals in the Las Vegas community for 60 years. Their philosophy and actions are to encourage and support each individual to maximize their potential and success in a setting of safety.
