- Determine the services that will be provided within the FQHC:

- The FQHC must apply for a National Provider Identification (NPI) <https://nppes.cms.hhs.gov/#/>.
 - Employed providers that provide Ordering, Prescribing or Referral (OPR) services will need to have an individual NPI, enroll with Medicaid and be linked to the FQHC.

- FQHCs operating in urban Clark and Washoe counties may enroll with each Managed Care Organization (MCO) to access reimbursement for recipients residing in those areas. The MCOs provide most of the coverage in those areas. Each MCO requires an additional credentialing process in addition to the FFS enrollment to become a part of their individual network. The FQHC will need to enroll with each MCO individually. Once Nevada Medicaid FFS enrollment is complete, contact the MCOs below:
