

Dexcom is sponsoring the AMCP webinar **The Clinical and Economic Value of Continuous Glucose Monitoring and Improved Time in Range** on February 13th at 2 pm EST.

Leading diabetes experts Nicholas B. Argento, MD and Dhiren Patel, PharmD will discuss:

- Limitations of HbA1c for assessing glycemic control
- Relationship between TIR, HbA1c, and the development of microvascular complications
- The value of TIR as a tool for individual glycemic management
- Standardized CGM metrics and targets for selected patient populations
- Retrospective analysis of CGM data using the Ambulatory Glucose Profile (AGP) standardized report
- Use of Dexcom G6® real-time, interoperable CGM to optimize TIR
- Health and economic benefits associated with improved TIR at the population level

The registration page is live on the AMCP website at <https://www.amcp.org/calendar/clinical-and-economic-value-continuous-glucose-monitoring-and-improved-time-range>
