

Health Information Technology / Meaningful Use Survey

Please participate in a brief survey: Nevada healthcare providers' opinions about health information technology (HIT)

To help inform Nevada's efforts in supporting the adoption of health information technology, the Nevada Department of Health and Human Services Division of Health Care Financing and Policy (DHCFP) is seeking feedback from providers, hospitals and other statewide stakeholders. By completing a brief survey, you will be helping to identify challenges and opportunities in HIT adoption, and will be providing comprehensive information critical to review of the Medicaid Electronic Health Record (EHR) incentive program, and development of future HIT initiatives across the state. In addition, DHCFP is making a longer, more comprehensive survey available to those organizations wishing to go into more detail about their level of EHR adoption at the end of the survey.

Make your opinion heard by completing the survey using this [link](https://www.surveymonkey.com/r/N2FQX2X).
(<https://www.surveymonkey.com/r/N2FQX2X>)

Survey responses will not be reported individually and will not be considered a commitment of any kind.
