- a. **Budget Adjustment Factor** – In the event that the reimbursement system described in this section would result in anticipated payments to nursing facility providers being greater or less than the funding appropriated by the Nevada legislature, proportional increases or decreases will be made to the rates so that anticipated payments will equal legislative appropriations. This adjustment to rates will be made as a percentage increase or decrease in each provider's rate. The percentage will be determined in accordance with the following fraction: (Legislative appropriations / (The Sum of Each Facility's Calculated Rate Multiplied by Each Facility's Proportional Share of the Anticipated (Budgeted) Case Load for All Freestanding Nursing Facilities)). Medicaid days from the cost reports used in rate setting will be the basis for the proportional allocation of anticipated case load across all freestanding facilities.
