TRANSMITTAL LETTER

April 25, 2023

TO: CUSTODIANS OF MEDICAID SERVICES MANUAL
Casey Angres
FROM: CASEY ANGRES Casey Angres (May 31, 2023 11:30 PDT)
CHIEF OF DIVISION COMPLIANCE
SUBJECT: MEDICAID SERVICES MANUAL CHANGES
CHAPTER 1200 – PRESCRIBED DRUGS

BACKGROUND AND EXPLANATION

Revisions to Medicaid Services Manual (MSM) Chapter 1200 – Prescribed Drugs to reflect recommendations approved on January 19, 2023, by the Drug Utilization Review (DUR) Board and to add new prior authorization (PA) criteria for Physician-Administered Drugs (PADs). The proposed changes include the adoption of new PA criteria for Nucala® (mepolizumab) and Dupixent® (dupilumab) for the treatment of Hypereosinophilic Syndrome (HES), and Chronic Rhinosinusitis with Nasal Polyposis (CRSwNP), within the Respiratory and Allergy Biologics section; addition of new criteria within the Hematopoietic/Hematinic Agents section; addition of new PAD-specific PA criteria for Ocrevus® (ocrelizumab) within the Multiple Sclerosis (MS) Agents section; addition of new PA criteria for penicillamine within the new Antirheumatics section; addition of new PA criteria for Rayaldee® (calcifediol) within the new Vitamins section; addition of new PA criteria for Relyvrio® (sodium phenylbutyrate/taurursodiol) within the new Amyotrophic Lateral Sclerosis (ALS) section; addition of new PAD-specific clinical PA criteria for Prolia® (denosumab) and Xgeva® (denosumab) within the Osteoporosis Agents section; addition of new PAD-specific PA criteria and quantity limits for Abraxane® (paclitaxel protein-bound particles) within the Taxane Chemotherapy section; addition of new PAD-specific PA criteria and quantity limits for Bavencio® (avelumab) and Imfinzi® (durvalumab) within the Anti-PD-1 Monoclonal Antibodies section; addition of new PAD-specific PA criteria and quantity limits for Beovu® (brolucizumab) within the Ophthalmic-Macular Degeneration section; addition of new PAD-specific PA criteria and quantity limits for Avastin®, Myasi®, Zirabev™, Alymsys®, Vegzelma™ (Bevacizumab) within the ANP-Human Vascular Endothelial Growth Factor Inhibitors Rec-MC Antibody; addition of new PAD-specific PA criteria and quantity limits for Darzalex® (daratumumab) within the Antineoplastic section; addition of new PAD-specific PA criteria and quantity limits for Darzalex Easpro® (daratumumab and hyaluronidase-fihj) within the Antineoplastic - CD38 Specific Recombinant Monoclonal Antibody Agent section; addition of PAD-specific PA criteria and quantity limits for Elaprase® (idursulfase) within the Lysosomal Enzymes section; addition of new PAD-specific related PA criteria and quantity limits for Eylea® (aflibercept) within the Anti-angiogenic ophthalmic agents section; addition of new PAD-specific PA criteria and quantity limits for Immune Globulins (immunoglobulin) within the Immune Globulins section; addition of new PAD-specific PA criteria and quantity limits for Jemperli® (dostarlimab-gxly) and Keytruda® (pembrolizumab) within the Antineoplastic-Anti-Programmed Cell Death Receptor-1 (PD-1) section; addition of new PAD-specific PA criteria and quantity limits for Kadcyca® (adotrustuzumab emtansine) within the Antineoplastic-Antibody Drug Conjugates (ADCs) section; addition of new PAD-specific PA criteria and quantity limits for Aranesp® (darbepoetin alfa) within the Recombinant Human Erythropoietin's section; and addition of new PAD-specific PA criteria and quantity limits for Pegfilgrastim/Colony Stimulating Factors within the Colony Stimulating Factors section.

Throughout the chapter, grammar, punctuation, and capitalization changes were made, duplications removed, acronyms used and standardized, and language reworded for clarity. Renumbering and re-arranging of sections was necessary.

These changes are effective May 1, 2023.

MEDICAID SERVICES MANUAL	Subject: INTRODUCTION

1200 INTRODUCTION

The Nevada Medicaid Pharmacy Services program pays for medically necessary prescription services for eligible Medicaid recipients under the care of the prescribing practitioner. Such services shall maintain a high standard of quality and shall be provided within the limitations and exclusions hereinafter specified.

All providers participating in the Medicaid program must furnish services in accordance with the rules and regulations of the Medicaid program. Conditions of participation are available from Provider Services.

This Chapter describes covered services, service limitations and general reimbursement methodology.

This manual obsoletes all previous policy and procedure manuals, bulletins, and policy news.

All Medicaid policies and requirements (such as prior authorizations, etc.) are the same for Nevada Check Up (NCU), with the exception of the four areas where Medicaid and NCU policies differ as documented in the NCU Manual Chapter 1000.

	MTL 24/16
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1201
MEDICAID SERVICES MANUAL	Subject: AUTHORITY

1201 AUTHORITY

- A. The Code of Federal Regulations (CFR), Title 42, Public Health, Chapter IV, Center for Medicare and Medicaid Services (CMS), Subchapter C Medical Assistance Programs, Parts 430 through 456, states prescription drug coverage is an optional service under Title XIX.
- B. The Omnibus Budget Reconciliation Act (OBRA) of 1989 mandates additional preventive health care services for infants, children and young adults (newborn through age 20) eligible for Medicaid. These mandates provide that children and adolescents under age 21 receive follow-up services for a medically necessary condition discovered in a screening examination, Early Preventative Screening and Diagnostic Testing (EPSDT), see Medicaid Services Manual (MSM) Chapter 1500; this includes prescription services.
- C. CFR Title 42 and Section 1927 of the Social Security Act (SSA), require states to provide for a Drug Utilization Review (DUR) program for covered outpatient drugs in order to assure that prescriptions are appropriate, medically necessary and not likely to result in adverse medical results SSA, Title 19, (g)(1)(A)).
- D. Section 1927 of the SSA allows a state to require a prior authorization on any covered outpatient drug, providing the prior authorization program complies with the requirements outlined in the act.

The SSA requires the establishment of a DUR board to monitor therapeutic appropriateness, use of generic products, overutilization and underutilization of drugs and quality of care consistent with protecting the health of program beneficiaries.
- E. Chapter 422 of Nevada Revised Statute (NRS) amended by AB 384 to require the Department of Health and Human Services (DHHS) to:
 1. develop a list of preferred prescription drugs;
 2. manage prescription drug use through the use of prior authorization and step therapy; and
 3. create the Pharmacy and Therapeutics Committee.
- F. U.S. Troop Readiness, Veteran's Health Care, Katrina Recovery and Iraq Accountability Appropriations Act 2007, Section 7002(b) of the act requires Medicaid outpatient drugs (defined in Section 1927(k)(2) of the SAA) will be reimbursable only if non-electronic written prescriptions are executed on a tamper-resistant prescription pad.
- G. The Deficit Reduction Act of 2005 requires Fee-for-Service (FFS) State Medicaid programs to capture and report National Drug Codes (NDC) for outpatient drugs in order for the state to receive federal financial participation.

1203 POLICY

The Division of Health Care Financing and Policy (DHCFP), Nevada Medicaid, reimburses pharmacies and practitioners for legend (prescription) and non-legend (over the counter) pharmaceuticals dispensed or administered to Medicaid recipients. All prescribers must have a license as a healthcare practitioner, such as a physician, podiatrist, osteopath, dentist, Advanced Practice Registered Nurse (APRN), physician's assistant, etc., keeping within the scope of their practice. The DHCFP requires that pharmaceuticals are written, dispensed and prescribed in accordance with the Nevada State Board of Pharmacy regulations and enforcement.

1203.1 COVERAGE AND LIMITATIONS

- A. Covered drugs are subject to prior authorization and/or quantity limits and the following:
1. Section 1927(d)(1)(B)(i) of the SSA allows Medicaid to restrict coverage for an outpatient drug if the prescribed drug is not for a medically accepted indication. Section 1927(k)(6) defines a medically accepted indication as any use for a covered outpatient drug, which is approved under the Federal Food, Drug and Cosmetic Act, or the use of which is supported by one or more citations included or approved for inclusion in any of the compendia:
 - a. American Hospital Formulary Service Drug Information;
 - b. United States Pharmacopeia;
 - c. DRUGDEX Information System; or
 - d. Peer-reviewed medical literature.
 2. Pharmaceuticals must be manufactured by companies participating in the Federal Medicaid Drug Rebate Program.
 3. Medicaid is mandated by federal statute to require all written (non-electronic) prescriptions for all outpatient drugs for Medicaid recipients to be on tamper-resistant prescription pads. This requirement does not apply to e-prescriptions transmitted to the pharmacy, prescriptions faxed to the pharmacy or prescriptions communicated to the pharmacy by telephone by a prescriber. Refer to MSM Addendum for more information on tamper-resistant prescription pads.
 4. The Preferred Drug List (PDL) is a list of preferred outpatient drugs established by the Silver State Scripts Board (formerly known as the Pharmacy and Therapeutics (P&T) Committee). Reference Medicaid Operations Manual (MOM) Chapter 200 for the Silver State Scripts Board bylaws. Pharmaceuticals not on the PDL, but within drug classes reviewed by the Silver State Scripts Board, require prior

	MTL 18/17
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

authorization, unless exempt under NRS or federal law or excluded through recommendations of the Silver State Scripts Board or excluded by the DHCFP.

- a. New pharmaceutical products not within reviewed PDL drug classes and not excluded under the state plan or by NRS are covered without a Standard Preferred Drug List Exception prior authorization until, or if, the Silver State Scripts Board adds the drug class to the PDL and reviews the product or evidence.
- b. New Food and Drug Administration (FDA) approved drugs, or existing pharmaceutical products within reviewed PDL drug classes, for which there is new clinical evidence supporting its inclusion on the PDL and are not excluded under state plan or by NRS, are covered with an approved Standard Preferred Drug List Exception prior authorization until the Silver State Scripts Board can review the new evidence or drug.
- c. Pharmaceuticals may require prior authorization due to step therapy protocols regardless of inclusion in the PDL.
- d. If the Silver State Scripts Board determines that there are no significant differences between drugs within specific classes based on clinical efficacy, safety, and outcomes for patients, the DHCFP or its Quality Improvement Organization (QIO)-like vendor, may consider cost in determining which drugs are selected for inclusion on the PDL.

B. Standard Preferred Drug List Exception Criteria

Drugs that have a “non-preferred” status are a covered benefit for recipients if they meet the coverage criteria.

1. Coverage and Limitations

- a. Allergy to all preferred medications within the same class;
- b. Contraindication to or drug-to-drug interaction with all preferred medications within the same class;
- c. History of unacceptable/toxic side effects to all preferred medications within the same class;
- d. Therapeutic failure of two preferred medications within the same class;
- e. If there are not two preferred medications within the same class, therapeutic failure only needs to occur on the one preferred medication;
- f. An indication which is unique to a non-preferred agent, and is supported by

	MTL 18/17
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

peer-reviewed literature or a FDA-approved indication;

g. Psychotropic, Antidepressant Medication – Continuity of Care;

Recipients discharged from an institution on non-preferred psychotropic and/or non-preferred anti-depressant medication(s), their drugs will continue to be covered by Medicaid for up to six months to allow the recipient time to establish outpatient mental health services;

h. For atypical or typical antipsychotic, anticonvulsant and antidiabetic medications, the recipient demonstrated therapeutic failure on one preferred agent.

2. Prior Authorization forms are available at:
<http://www.medicaid.nv.gov/providers/rx/rxforms/asp>

C. Excluded

The DHCFP will not reimburse for the following pharmaceuticals:

1. Agents used for weight loss.
2. Agents used to promote fertility.
3. Agents used for cosmetic purposes or hair growth.
4. Yohimbine.
5. Drug Efficacy Study Implementation (DESI) list “Less than Effective Drugs”: In accordance with current policy, federal financial participation is not allowed for any drug on the Federal Upper Limit (FUL) listing for which the FDA has issued a notice of an opportunity for a hearing as a result of the DESI program which has been found to be a less than effective or is identical, related or similar to the DESI drug. The DESI drug is identified by the FDA or reported by the drug manufacturer for purposes of the Medicaid Drug Rebate Program. This listing is available on the Centers for Medicare and Medicaid Services (CMS) website at:
http://www.cms.gov/MedicaidDrugRebateProgram/12_LTEIRSDrugs.asp

This includes pharmaceuticals designated “ineffective” or “less than effective” (including identical, related or similar drugs) by the FDA as to substance or diagnosis for which prescribed.
6. Pharmaceuticals considered “experimental” as to substance or diagnosis for which prescribed. Pharmaceuticals manufactured by companies not participating in the federal Medicaid Drug Rebate Program unless rated “1-A” by the FDA.

	MTL 06/18
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

7. Agents used for impotence/erectile dysfunction.

D. Refills

A refill is a prescription subject to the limitations below:

1. Authorized refills are valid only from the pharmaceutical provider dispensing the original prescription, pursuant to Nevada Administrative Code (NAC) Chapter 639.
2. Refill intervals must be consistent with the dosage schedule indicated on the original prescription. If a prescription is for a 34-day supply, a consistent refill would be filled in 30 days; an inconsistent refill date would be filled in 20 days from the original fill. Lost medications: Nevada Medicaid does not pay for replacement of lost, stolen or otherwise destroyed medications even if a physician writes a new prescription for the medication. It is the responsibility of the recipient to replace these medications. Prior authorization may be granted in life-threatening situations and for maintenance medications only. See “Maintenance Medications” section for more information on maintenance medications.

E. Early Refills

1. Nevada Medicaid only pays for up to a 34-day supply of medications (100-day supply for maintenance medications) for recipients each month. A prescription refill will be paid for by Nevada Medicaid only when 80% of the non-controlled substance prescription, and 90% of the controlled substance prescription, is used in accordance with the prescriber’s orders on the prescription and on the label of the medication.
2. In areas for which an emergency or disaster has been declared, Medicaid will waive the requirement for 80% of a non-controlled substance prescription to be used before paying for refills. Prescriptions for non-controlled substances will be covered up to 30 days after the declaration or until the end of the emergency or disaster, whichever is later.
3. In the instance that a recipient will be out of town when a refill is due, the pharmacist may enter the appropriate override code to allow an early refill. This override will be monitored by Nevada Medicaid for misuse/abuse by the recipient and/or provider.
4. Medicaid will not pay for an early prescription refill when gross negligence or failure to follow prescriber’s prescription instructions has been displayed by the recipient.

	MTL 06/18
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

F. Maintenance Medications

1. Exceptions to the 34-day supply of medications are allowed for maintenance medications.
2. Maintenance medications are required to be filled in three-month (100-day) supplies.
3. A one-time initial fill of less than three months will be allowed for the first fill to assure tolerability and compliance.
4. Prescription quantities may be reviewed; in those cases where less than a 30-day supply of maintenance drug is dispensed without reasonable medical justification, the dispensing fee may be disallowed.
5. The following drug categories are considered maintenance medications and are required to be filled in three-month (100-day) supplies:
 - a. Antianginals;
 - b. Antiarrhythmics;
 - c. Antidiabetics;
 - d. Antihypertensives;
 - e. Cardiac Glycosides;
 - f. Diuretics;
 - g. Estrogens; and
 - h. Progesterone.
6. Contraceptive drugs are considered maintenance medication. Contraceptive drugs that are approved by the FDA are covered up to a 12-month supply.
 - a. This includes a drug for contraception or its therapeutic equivalent; insertion of a device for contraception; removal of such a device that was inserted while the insured was covered by the same policy of health insurance; education and counseling relating to contraception; management of side effects relating to contraception; and voluntary sterilization for women.
 - b. Up to three months of contraception may be dispensed immediately, and up to nine months of contraception may be dispensed at the subsequent visit.

	MTL 23/19
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

c. For a refill following the initial dispensing of a contraceptive drug, the provider may dispense up to a 12-month supply or any amount that covers the remainder rolling year.

d. If a prescription for a contraceptive drug is less than a one-year period, the provider must dispense the contraceptive in accordance with the quantity specified in the prescription order.

7. Anticonvulsants and thyroid preparations are considered maintenance medications, but are not required to be filled in a three-month (100-day) supply.

8. Medications administered in a skilled nursing facility or physician's office are exempt from the three-month (100-day) supply requirement.

9. In long-term care facilities, if the prescriber fails to indicate the duration of therapy for a maintenance drug, the pharmacy must estimate and provide at least a 30-day supply. Exceptions may be based on reasonable stop orders. (For oral liquid medications only, a 16 fluid ounce quantity will be considered sufficient to fulfill the 30-day supply requirement.)

G. Emergency supply of medication

1. In an emergency situation, dispensing of up to a 96-hour supply of covered outpatient drugs that require prior authorization will be allowed.

2. Nevada Medicaid requires prior payment authorization for medications identified as requiring prior authorization.

3. The physician must indicate the diagnosis on the prescription (preferably with an International Classification of Disease (ICD) code) to support the use of the emergency policy.

4. As a follow-up to the dispensing of the emergency supply of medication, the provider must contact the QIO-like vendor to obtain a verbal verification number.

5. An approved prior authorization (if required) will be necessary to get additional medication.

H. Nevada Check Up (NCU)

All coverage and limitation policies and rules, including any prior authorization requirements, outlined in this chapter apply to NCU recipients as well as Nevada Medicaid FFS recipients. There are NO exceptions.

	MTL 08/20
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

I. Vaccines

Nevada Medicaid recognizes the importance of preventative health care through vaccines and immunizations. Unless otherwise stated in this chapter, vaccines are covered without prior authorization. Reference Appendix A of this chapter.

1. Childhood vaccines: All childhood vaccines are covered without prior authorization under the Healthy Kids Program. Refer to MSM Chapter 1500, Healthy Kids Program for more information on childhood vaccines.
2. Adult vaccines: Adult vaccines such as tetanus, flu vaccine and pneumococcal vaccine are covered without prior authorization. For a list of covered adult vaccines, please reference the Physician's Fee Schedule at: <http://dhcfp.nv.gov/Resources/Rates/FeeSchedules/>
3. Human Papillomavirus (HPV) Vaccine: The 9-valent HPV vaccine (for both males and females) is covered for Medicaid eligible recipients ages nine years through 45 years, based on the US FDA approved indications. These may be accessed by following the link: <https://www.fda.gov/vaccines-blood-biologics/vaccines/gardasil>. The HPV vaccines are available through the State Division of Public and Behavioral Health (DPBH) as part of the Vaccines for Children (VFC) program for eligible females and males age nine through 18 years. Please refer to MSM Chapter 1500 for more information on the VFC program.
4. Pharmacies may administer childhood and adult vaccines/immunizations.
 - a. Pharmacies must adhere to all Nevada State Board of Pharmacy (BOP) regulations regarding vaccine/immunization administration including certification to administer as documented in NAC Chapter 639.
 - b. Pharmacies must receive childhood vaccinations through the VFC Program. The DHCFP or Nevada Medicaid and NCU do not reimburse for vaccines included in the VFC Program.
 - c. Covered vaccinations not included in the VFC Program will be reimbursable per the Nevada Medicaid and NCU Pharmacy Manual.
 - d. If the pharmacist administers the vaccinations, the dispensing fee will not be reimbursed. An administration fee is paid instead.

J. Pharmacist Submitted Prior Authorizations

1. The DHCFP will allow pharmacists to submit a prior authorization if:
 - a. The requesting pharmacist has access to the recipient's medical records.

	MTL 18/17
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

K. Dispensing Practitioners:

1. Must have a current Certificate of Registration through the Nevada State Board of Pharmacy. Refer to NRS 639.070 and NAC 639.390; and
2. Must be enrolled with Nevada Medicaid provider enrollment as a Provider Type (PT) 28; and
3. Dispensing practitioners' offices must be located in the State of Nevada; and
4. All prior authorization criteria and quantity limitations apply to dispensing practitioner claims; and
5. Only PT 28 can be reimbursed for a dispensing fee; and
6. All claims must be submitted in the National Council for Prescription Drug Programs (NCPDP) format through Medicaid's Point of Sale (POS) system; and
7. All dispensing practitioners must be compliant with all applicable BOP statutes and regulations.

1203.1A PROVIDER RESPONSIBILITY

1. The pharmaceutical provider will maintain records for all prescriptions dispensed to eligible recipients as may be required.
 - a. The provider will allow, upon request of proper representative, access to all records that pertain to Medicaid recipients for fiscal review, audit or utilization review.
 - b. All fiscal records are to be maintained for a period of six years or as specified in federal regulation.
2. Utilization Control
 - a. Prospective (Concurrent) Drug Utilization Review (Pro-DUR)

Pro-DUR functions will be carried out via the POS Systems.

 1. Pro-DUR edits apply to POS claims.
 2. Long Term Care (LTC) claims are subject to all Pro-DUR edits that apply to retail.
 3. Providers may submit override codes using the (NCPDP) standard interactive DUR codes. Override codes may be submitted on the initial claim. A denied claim does not have to be on file.

	MTL 20/20
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

4. No long term override codes are issued, codes must be entered each time errors occur. Reference the Nevada Medicaid and NCU Pharmacy Manual for more information on the current Pro-DUR edits and override procedures.

5. All drugs are subject to quantity limitations. Refer to the Nevada Medicaid and NCU Pharmacy Manual for established quantity limits.

b. Retro Drug Utilization Review (DUR)

Both recipient and provider profiles (i.e. claim payments) are reviewed to identify patterns of excess. Verification of receipt of services is ongoing on a sample basis. Providers may be audited on site.

c. Drug Utilization Review (DUR)

Nevada Medicaid policy and federal law allows the state appointed DUR Board to conduct review of the information compiled about individual clients and providers and allows the DUR Board to educate Medicaid providers about the changes in drug therapeutics. Educational programs may include information such as drug interactions between medications that physicians have prescribed for the clients and medications they are prescribing that are unnecessarily expensive. In this case, educational efforts will be directed to help providers improve their efficiency in the allocation of the finite resources available for Medicaid clients.

d. Eligibility

Please refer to MSM Chapter 100 for information on Medicaid eligibility, eligibility verification and the Eligibility Verification System (EVS).

e. Pharmacy Lock-In Program

The Pharmacy Lock-In Program is intended to prevent recipients from obtaining excessive quantities of controlled substances through multiple visits to physicians, clinics, and pharmacies. When a recipient has shown patterns of abuse/misuse of Nevada Medicaid benefits, or the DHCFP has determined that the recipient requires close medical management, the recipient may be “locked-in” to a specific pharmacy. This means that Medicaid will only pay for controlled substance prescriptions at a single pharmacy.

1. Pharmacy Lock-In Criteria.

a. The DHCFP conducts a comprehensive clinical review to determine whether a recipient should be “locked-in” to a single pharmacy using the following criteria:

	MTL 20/20
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

1. The recipient has filled ten or more controlled substance prescriptions in the past 60-day period (includes controlled substance pharmaceuticals given in the emergency room); and
2. One of the following:
 - a. The recipient has utilized more than one pharmacy in the past 60-day period; or
 - b. The recipient has utilized more than three physicians in the past 60-day period; or
 - c. The recipient has utilized the emergency room(s) for receiving controlled substances; or
 - d. The recipient has been diagnosed with a drug dependency related condition; or
 - e. The dispensed quantity per prescription of controlled substances appears excessive by the clinical review team; or the recipient has other noted drug seeking behaviors.
- b. Recipients who are locked-in to one pharmacy are issued a written Notice of Decision (NOD) 15 days prior to the implementation of the pharmacy restriction. The NOD includes the individual's right to request a fair hearing within 90 days if he/she disagrees with the findings and/or the DHCFP's action.
- c. The DHCFP assigns the pharmacy most frequently used by the recipient for access of controlled substance prescriptions. Recipients may change their locked-in pharmacy by contacting their Medicaid District Office.
- d. Upon implementation of pharmacy lock-in, the POS system will not allow another pharmacy to bill for controlled substance prescriptions, and a message will be given at the time of service to notify the pharmacy that the recipient is locked-in. Any non-controlled substance prescriptions can be filled at any pharmacy.
2. Duration of Lock-In Status.
 - a. Initially, a recipient remains in lock-in status for period lasting 36 months. Utilizing the pharmacy lock-in criteria, the DHCFP

	MTL 20/20
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

conducts a clinical review not less than a month prior the 36-month mark to determine whether the recipient will remain or may be removed from lock-in status.

1. A recipient may be placed on a second lock-in period lasting 108 months, if determined by the DHCFP that the recipient is continuing to obtain excessive and/or inappropriate controlled substance prescription or requires additional close medical management or monitoring. Recipients placed on a second lock-in period are re-evaluated at every 108-month period to determine whether lock-in status still appropriate or may be removed from lock-in status.

2. A written NOD is issued by the DHCFP 15 days prior the effective date of continuation or removal of the pharmacy restriction. The NOD includes the individual's right to request a fair hearing within 90 days if he/she disagrees with the findings and/or the DHCFP action.

b. Recipients in lock-in status who are transitioning from a Nevada Medicaid contracted Managed Care Organization (MCO) will start a new initial 36-month lock-in period.

3. Pharmacy Lock-In Exemption

a. Some circumstances allow a recipient to receive medications from a pharmacy other than their assigned locked-in pharmacy. A Pharmacy may call the Technical Call Center to request an override if:

1. The locked-in pharmacy is out of stock.
2. The locked-in pharmacy is closed.
3. The recipient is out of town and cannot access the locked-in pharmacy.

3. Generic Substitution

Per NRS Chapter 639, if the practitioner has not indicated that generic substitution is prohibited, the pharmacy provider must dispense, in substitution, another drug which is available to him if the other drug:

- a. is less expensive than the drug prescribed by brand name;

	MTL 09/17
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

- b. is biologically equivalent to the drug prescribed by brand name;
- c. has the same active ingredient or ingredient of the same strength, quantity and form of dosage as the drug prescribed by brand name; and
- d. is of the same generic type as the drug prescribed by brand name the least expensive of the drugs that are available to him for substitution.

The pharmacy provider shall substitute the least expensive of the drugs available to him/her for substitution.

4. Prescriber Brand Certification

Upper Limit cost limitations specified in this Chapter will not apply when a prescriber certifies that a specific brand of medication is medically necessary for a particular patient.

The physician should document in the patient's medical record the need for the brand name product in place of the generic form. The procedure for certification must comply with the following:

- a. The certification must be in the physician's own handwriting.
- b. Certification must be written directly on the prescription blank.
- c. The phrase "Dispense as written" is required on the face of the prescription. For electronically transmitted prescriptions "Dispense as written" must be noted. Not acceptable: A printed box on the prescription blank checked by the prescriber to indicate "brand necessary" or a handwritten statement transferred to a rubber stamp and then stamped on the prescription.
- d. A prior authorization is required to override generic substitution.
- e. Certification is not required if a generic is not manufactured.
- f. A fax copy/verbal order may be taken by the pharmacist from the physician, but the pharmacy must obtain an original printed copy and keep on file.

1203.1B SERVICE DELIVERY MODEL

For the rate and reimbursement methodology see MSM Chapter 700, Rates. For POS claims refer to the Pharmacy Manual, and for Medicaid Management Information System (MMIS) claims refer to the Nevada Medicaid and NCU Billing Manual (Billing Manual).

	MTL 09/17
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

1. Institutional settings
 - a. Medical/Surgical, Specialty, Psychiatric Hospitals and free-standing inpatient hospice facilities – All pharmacy services are included in the daily per diem rate for inpatient services, which are billed through MMIS.
 - b. Long Term Care (LTC)
 1. Nursing Facilities (NF) – Legend (prescription) pharmaceutical services are excluded from the daily per diem facility rate. This includes compound prescriptions and Total Parenteral Nutrition (TPN) solution and additives. Legend pharmaceuticals are billed separately directly by a licensed pharmacy through POS.

Non-legend (over the counter) pharmaceuticals are not separately reimbursable by the DHCFP.
 2. Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID) – Legend and non-legend pharmaceuticals are excluded from the facility rate. Pharmaceuticals are billed directly by a licensed pharmacy through POS.
 3. Hospice services in NFs, all drugs related to the documented terminal illness and palliative, symptom relief are to be covered by the hospice and will not be reimbursed by the DHCFP. Refer to MSM Chapter 3200, Hospice, for more information.
2. Outpatient Pharmaceuticals
 - a. Covered outpatient drugs (COD(s)) are reimbursed separately from medical services, in the following settings, in accordance with Section 1927 of the SSA.
 1. Retail pharmacies (billed through POS).
 2. Home Infusion Therapy (HIT)/Free Standing Infusion Clinics (billed through POS).
 - a. Disposable supplies are billed separately with a 33 Provider Type number (billed through MMIS).
 - b. Refer to the Nevada Medicaid and Check Up Pharmacy Billing Manual.

	MTL 09/17
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

3. COD(s) administered in an outpatient setting, such as a physician's office (NVPAD).
 - a. COD(s) are billed utilizing the appropriate National Drug Code (NDC) and NDC quantity (billed through MMIS).
 - b. The administration of the drug is billed using the appropriate Current Procedural Terminology (CPT) code (billed through MMIS).
4. Hospital based outpatient clinics.
 - a. COD(s) are billed utilizing the appropriate NDC and NDC quantity (billed through MMIS).
 - b. The administration of the drug is billed using the appropriate CPT code, (billed through MMIS).
5. End Stage Renal Disease (ESRD) Facilities.
 - a. Any COD(s) not included in the Prospective Payment System (PPS) Rate are billed using the appropriate NDC and NDC quantity.
 - b. The administration of the drug is billed using the appropriate CPT code, (billed through MMIS).
 - c. COD(s) included in the PPS Rate as documented in the CMS Manual System, Publication # 100-04, Medicare Claims Processing, Transmittal 2134 will deny if billed separately.
6. Emergency Rooms.
 - a. COD(s) are billed utilizing the appropriate NDC and NDC quantity (billed through MMIS).
- b. CODs are not reimbursed separately, in the following settings, in accordance with 1927(k)(2) of the SSA.
 1. Ambulatory Surgical Centers (ASC). COD(s) are included in the facility rate. COD(s) may not be billed separately.
 2. Outpatient facilities/clinics/Federally Qualified Health Centers (FQHCs) that are paid per encounter, cannot be reimbursed separately for CODs when drugs are included in their encounter rate.

	MTL 09/17
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

3. Outpatient hospice reimbursement for CODs related to the documented terminal illness and palliative, symptom relief, are to be covered by the hospice and will not be reimbursed by the DHCFP. Refer to MSM Chapter 3200, Hospice, for more information.

3. Disposable Medical Supplies

Please refer to MSM Chapter 1300, Durable Medical Equipment (DME), for instructions on billing and any applicable limitations for these items.

4. Unit Dose (Repackage and Re-Stock) Repackage
Nevada Medicaid provides reimbursement incentives for LTC providers who repackage non-unit dose pharmaceuticals; An additional \$0.43 per claim is given on pharmaceuticals that are repackaged for unit dose dispensing. Pharmaceuticals that First Data Bank classifies as unit dose products are not covered for this policy.

This incentive is available only to pharmacies supplying long-term care inpatients. The pharmacy provider must apply to the QIO-like Vendor Pharmacy Department to enroll in this incentive program.

In accordance with the CMS, State Medicaid Director Letter (SMDL) 06-005, repackaging of pharmaceuticals must be in compliance with the Nevada State BOP. In addition, NFs must properly credit the Medicaid program for the return of unused prescription medicines upon discontinuance of the prescription or transfer, discharge or death of a Medicaid beneficiary. This is to assure there is no double billing of the medication.

5. Coordination of Benefits (COB)

On-line COB (cost avoidance) is part of the Nevada Medicaid POS system.

- a. If Nevada Medicaid is the recipient's secondary carrier, claims for COB will be accepted.
- b. Nevada Medicaid is always the payer of last resort.
- c. Other coverage will be identified by the presence of other carrier information on the recipient eligibility file.
- d. If the recipient shows other coverage, the claim will be denied. The POS system will return a unique client-identified carrier code identifying the other carrier, the recipient's policy number and the carrier name in the additional message filed. It is possible that a recipient may have more than one active other carrier; in that case, the returned code will be from the first carrier, subsequent codes will be returned until fully exhausted. Providers will be required to submit this code OTHER PAYER ID (#340-7C) field as part of the override process.

	MTL 09/17
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

- e. Even if “no other insurance” is indicated on the eligibility file, the claim will be processed as a Third Party Liability (TPL) claim if the pharmacy submits.
- f. If other insurance is indicated on the eligibility file, the claim will be processed as a TPL regardless of what TPL codes the pharmacy submits.
- g. In all cases, the Nevada Medicaid “allowed amount” will be used when calculating payment. In some cases, this may result in a “0” payment, when the insurance carrier pays more than the Medicaid “allowable amount.”
- h. In order to facilitate the TPL/COB process, Nevada Medicaid will allow providers to override “days supply limits” and/or “Drug Requires prior authorization” conditions by entering a value of “5” (exemption from prescription limits) in the PA/MC CODE field (NCPCP #416DG) if there are no prior authorization requirements on these drugs from the primary insurer.

6. Pharmacy Billing Process

a. NCPDP Standard Billing Units

Nevada Medicaid reimburses for outpatient pharmaceuticals according to NCPDP “Billing Unit Standard Format” guidelines. The standard provides for the billing of pharmaceuticals in one of three billing units for all drug products. These units are “each,” “milliliter (ml),” and “gram (g).” The following guidelines are to be used when billing Nevada Medicaid for pharmaceuticals:

Tablets, Capsules, Suppositories, Pre-filled Syringes: must be billed by “each” or by “mls.” For example, if 30 tablets of Metformin are dispensed, the quantity will be 30.

Liquids, Liquid Orals, Suspensions, Solutions, Ophthalmic/Otic Solutions: must be billed by milliliters (mls). For example, if 560ml of guaifenesin is dispensed, the quantity entered will be 560.

PLEASE NOTE:

Ounces must be converted to ml (1 ounce = 30ml).

Liters must be converted to ml (1L = 1000ml).

Ointments, Bulk Powders: must be billed by grams. For example, if a two ounce tube of oxiconazole nitrate is dispensed, the quantity entered will be 60.

PLEASE NOTE:

Ounces must be converted to grams (1 ounce = 30g, ½ ounce = 15g). Oral Contraceptives/Therapy packs: must be billed per “each” tablet dispensed, not the

	MTL 09/17
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

number of packages. For example, Ortho Tri-Cyclen is a 28-day dial pack, the quantity entered will be 28.

Transdermal Patches/Powder Packets: must be billed per “each” patch/packet dispensed, regardless of whether they are pre-packaged in a box or come in individual pouches/packets. For example, Catapress-TTS comes in a box of four patches. If two of these boxes are dispensed, the quantity entered will be eight.

Inhalers and Aerosols: must be billed as either grams or ml, as specified by the manufacturer on the labeling. For example a 90mcg(microgram)/inh Albuterol Inhaler has a total of 17gm in the canister. If one of these is dispensed, 17 will be quantity entered.

Topical Products: must be billed as either grams or ml, as specified by the manufacturer on the labeling.

PLEASE NOTE: Ounces must be converted to grams or ml.

1 ounce = 30ml

1 ounce = 30g

Reconstitutables (oral, otic, ophthalmic): must be billed per ml that are/will be in the bottle after reconstitution according to the manufacturer’s instructions.

Liquid Injectables (vials, ampoules): must be billed by milliliters (ml). For example, if a 10ml vial of Novolin 70/30 is dispensed, the quantity entered will be 10.

Powdered Injectables (vials): must be billed by “each” vial given per dose. For example if the recipient receives Ampicillin 1g every six hours for one week, the quantity entered will be 1, as only one vial is used per dose (assuming a 1gm vial is used), and the number of doses entered will be 28 (four per day x seven days).

PLEASE NOTE: If the product is supplied with a diluent, the quantity entered is only the number of powdered vials dispensed, the diluent is not factored in.

Intravenous Solutions: must be billed in ml administered per dose. For example, if a recipient receives 250ml of Normal Saline four times per day, the quantity entered will be 250, as that is the quantity per dose.

Blood Derived Products: products may vary in potency from batch to batch. Anithemophilic products must be billed as the number of antihemophilic units dispensed (each). Prolastin must similarly be billed as the number of milligrams dispensed (each).

	MTL 09/17
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

Kits: defined as products with at least two different or discreet items (excluding diluents, applicators and activation devices) in the same package, intended for dispensing as a unit. Kits carry only a single NDC. Kits are intended to be dispensed as a unit and should be billed as a unit of each kit dispensed (each).

For further information, refer to the NCPDP Billing Unit Standard Format Official Release.

b. Provider Numbers

The state National Association of Boards of Pharmacy (NABP) provider number is to be used and entered when billing online using the POS system or when using the UCF.

7. State Maximum Allowable Cost (SMAC)

a. SMAC is the upper reimbursement limit for multi-source outpatient pharmaceuticals established by the DHCFP or QIO-like vendor.

1. The DHCFP or QIO-like vendor will perform ongoing market analysis to monitor pricing patterns and product availability.
2. The DHCFP or QIO-like vendor will perform monthly updates of the drugs subject to the SMAC.
3. All drugs subject to the SMAC and updates will be posted on the following website:
<http://www.medicaid.nv.gov/providers/rx/MACinfo.aspx>

b. Providers may appeal the current SMAC for a pharmaceutical product if a provider determines that a particular multi-source drug is not available at the current SMAC reimbursement.

1. The pharmacy must contact the QIO-like vendor technical call center to initiate the appeal.
2. Information needed to make a decision will include the NDC number, manufacturer, drug name, strength and price paid. A faxed copy of the actual invoice for the drug may be requested.
3. Inquiries not resolved by the technical call center are forwarded to the QIO-like vendor's SMAC Coordinator for investigation and resolution.

	MTL 09/17
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

4. If it is determined the SMAC is negatively impacting access to care for recipients, the SMAC Coordinator has the authority to:
 - a. Adjust SMAC pricing for the particular claim being appealed; and
 - b. Make changes to the SMAC pricing file.
5. Appeals will be responded to within three working days of the referral to the SMAC Coordinator.

1203.1C PRIOR AUTHORIZATION PROCEDURES

1. Prior authorization requests may be done via phone, fax or via the internet. A facsimile signature stamp is acceptable on faxed prior authorization requests.
2. Prior authorization requests must be submitted on the appropriate Prior Authorization Request form. Pharmacy prior authorization forms can be found at the following web site: <https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>
3. LTC drug claims are subject to prior authorization requirements.
4. The QIO-like vendor will process the prior authorization request within 24 hours of receipt.
 - a. The requesting practitioner will be advised of the prior authorization status (approval, denial, pending further information) within 24 hours of the receipt.
 - b. For prior authorization requests in which the QIO-like vendor has pended the request for further information, the prior authorization will deny if the practitioner does not respond to a request for further information within three working days.
5. An approved prior authorization will be entered in the POS system prior to the dispensing of the medication. There may be situations in which an authorization request is considered after the fact (e.g. retroactive eligibility).
6. The Nevada Medicaid QIO-like vendor will send all Notice of Decision denial of service letters. Reference MSM Chapter 3100 for the information on hearings.
7. Refer to the Nevada Medicaid and Check Up Pharmacy Billing Manual for more information.

1203.2 INTRAVENOUS (IV) THERAPY

For specific instructions related to billing via the POS system, refer to the Nevada Medicaid Check-Up Pharmacy Billing Manual.

	MTL 09/17
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 1203
MEDICAID SERVICES MANUAL	Subject: POLICY

A. Billing Guidelines

IV therapy is billed through the pharmacy POS system using the multi-ingredient functionality. Drug coverage edits and prior authorization edits will be processed at the individual ingredient level.

B. Long Term Care (LTC)

1. For recipients in LTC, a daily dispensing fee of \$10.17 will be applied to IV therapy claims. This dispensing fee will be multiplied by the number of days the therapy was provided

- a. Non-Billable Items

IV hydration therapy of standard fluids without additives (e.g., antibiotics, potassium and heparin) and supplies associated with IV therapy, enteral nutrition and TPN administration are included in Nevada Medicaid's LTC/NF rate and may not be billed as a separate charge.

- b. Billable Items

IV Drugs/TPN for recipients in LTC facilities may be billed as a separate charge. Refer to MSM Chapter 500, Nursing Facilities, for further information.

MEDICAID SERVICES MANUAL

1. DRUGS REQUIRING A PRIOR AUTHORIZATION AND/OR QUANTITY LIMITATION

A. Proton Pump Inhibitors (PPIs)

Therapeutic Class: Proton Pump Inhibitors

Last Reviewed by the DUR Board: April 30, 2020

PPIs are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if the following criteria are met and documented:
 - a. The recipient is not exceeding once daily dosing (quantity limit of one unit/day).
 - b. Requests for PPIs exceeding once daily dosing must meet one of the following:
 1. The recipient has failed an appropriate duration of once daily dosing; or
 2. The recipient has a diagnosis of a hypersecretory condition (e.g., Zollinger-Ellison Syndrome), esophagitis, Barrett's esophagitis, reflux esophagitis or treatment of an ulcer caused by H.Pylori
 - c. Prior Authorization Guidelines
 1. Prior authorization approval will be for up to 12 months.
 2. Prior Authorization forms are available at:
<http://www.medicaid.nv.gov/providers/rx/rxforms.aspx>

B. Pyrukynd® (mitapivat)

Therapeutic Drug Class: Pyruvate Kinase Activators

Last Reviewed by DUR Board: October 20, 2022

Pyrukynd® (mitapivat) is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity.

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is at least 18 years of age; and
 - b. Recipient has a confirmed diagnosis of pyruvate kinase deficiency (PKD) as defined by the documented presence of at least two variant alleles in the PKLR gene, of which at least one was a missense variant; and
 - c. Recipient is not homozygous for the c.1436G>A (p.R479H) variant; and
 - d. Recipient does not have two non-missense variants (without the presence of another missense variant) in the PKLR gene; and
 - e. Recipient has a baseline serum hemoglobin level less than 10g/dL or required more than six transfusions in the prior year; and
 - f. Other causes of hemolytic anemia have been ruled out (e.g., immune hemolysis, other enzyme deficiencies, vitamin/mineral deficiencies); and
 - g. Recipient does not have moderate or severe hepatic impairment; and
 - h. Prescriber will advise patients currently on hormonal contraceptives to use an alternative non-hormonal contraceptive method or add a barrier method of contraception during treatment; and
 - i. Quantity limit is 60 tablets/30 day (max dose 100mg/day).
2. Recertification Request:
 - a. Recipient must continue to meet the above criteria; and
 - b. Recipient has shown a beneficial response to therapy compared to pre-treatment baseline in one or more of the following:
 1. Hemoglobin (Hb) response (defined as a greater than or equal to 1.5g/dL increase in Hb level without transfusion over a four week or longer time period; or

DIVISION OF HEALTH CARE FINANCING AND POLICY
MEDICAID SERVICES MANUAL

- 2. Transfusion reduction response (defined as a greater than or equal to 33% reduction in the number of red blood cell [RBC] units transfused compared to historical transfusion burden); or
 - 3. Recipient had an increase in Hb and/or decrease in transfusion requirement, to a lesser extent than the above, and also had an improvement in the signs and symptoms (e.g., fatigue, jaundice, shortness of breath) and/or markers of hemolysis (e.g., indirect bilirubin, reticulocyte count, LDH, haptoglobin).
- c. Recertification will be approved for six months.
- 3. Prior authorization guidelines:
 - a. Prior authorization will be approved for six months.

C. Agents Used for the Treatment of Attention Deficit Disorder (ADD)/Attention Deficit Hyperactivity Disorder (ADHD)

Therapeutic Class: ADD/ADHD Agents

Last Reviewed by the DUR Board: April 25, 2019

Agents for the treatment of ADD/ADHD are subject to prior authorization and quantity limits based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

Approval will be given if the following criteria is met and documented:

a. General Criteria (Children and Adults)

1. A diagnosis of ADD/ADHD or other FDA approved diagnosis.
2. Only one long-acting stimulant (amphetamine and methylphenidate products) may be used at a time.
3. A 30-day transitional overlap in therapy will be allowed.
4. Other treatable causes of ADD/ADHD have been ruled out.

b. ADD/ADHD Criteria (Children up to age 18 years)

1. The recipient is at least three years of age (short-acting stimulants) or at least six years of age (long-acting stimulants, long-acting alpha agonists, atomoxetine).

An initial evaluation or regular examination has been done within the past 12 months with the treating prescriber.

2. Exception Criteria

a. Prescriptions for ADD/ADHD medications do not require prior authorization for children five years of age, up to 18 years of age, if the following criteria are met and documented:

1. The recipient is at least five years of age for short acting stimulants or at least six years of age for long-acting stimulants, long acting alpha agonists, atomoxetine);
2. The medication is prescribed by a psychiatrist; and
3. An ICD code for ADD with or without hyperactivity is documented on the prescription and transmitted on the claim.

D. Growth Hormones
Therapeutic Class: Growth Hormone

Last Reviewed by the DUR Board: July 28, 2022

Growth Hormones are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

a. Approval will be given if the following criteria are met and documented:

1. Children (with open epiphyses and with remaining growth potential) must meet all the following:
 - a. The recipient has had an evaluation by a pediatric endocrinologist or pediatric nephrologist with a recommendation for growth hormone therapy; and
 - b. The recipient has had an evaluation ruling out all other causes for short stature; and
 - c. The recipient is receiving adequate replacement therapy for any other pituitary hormone deficiencies, such as thyroid, glucocorticoids, or gonadotropic hormones.

The recipient must then meet one of the following:

1. The recipient has a diagnosis of Noonan Syndrome, Prader-Willi Syndrome or Turner Syndrome and their height is at least two standard deviations below the mean or below the fifth percentile for the patient's age and gender and the bone age is less than 16 years for male recipients or less than 14 years for female recipients; or
2. The recipient has a diagnosis of Prader-Willi Syndrome; or
3. The recipient has a diagnosis of Turner Syndrome, is female and has a bone age of less than 14 years; or
4. The recipient has a diagnosis of chronic renal insufficiency (<75 mL/minute), and their height is at least two standard deviations below the mean or below the third percentile for the recipient's age and gender; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

5. The recipient has a diagnosis of being small for gestational age, the recipient is two years of age or older, and the height is at least two standard deviations below the mean or below the third percentile for the recipient's age and gender; or
6. The recipient is a newborn infant with evidence of hypoglycemia, and has low growth hormone level (<20 ng/mL), low for age insulin like growth factor (IGF)-1 or IGF binding protein (BP) 3 (no stimulation test required for infants); or
7. The recipient has a diagnosis of growth hormone deficiency or hypothalamic pituitary disease (e.g., hypopituitarism due to structure lesions/trauma to the pituitary including pituitary tumor, pituitary surgical damage, trauma, or cranial irradiation), and their height is at least two standard deviations below the mean or below the third percentile for the patient's age and gender and their bone age is less than 16 years for male or less than 14 years for female.

And recipient must meet one of the following:

- a. The recipient has failed two growth hormone stimulation tests (<10 ng/mL); or
 - b. The recipient has failed one growth hormone stimulation test (<10 ng/mL) and one IGF-1 or IGFBP-3 test; or
 - c. The recipient has failed one growth hormone stimulation test (<10 ng/mL) or IGF-1 or IGFBP-3 test and they have deficiencies in three or more pituitary axes (e.g., thyroid stimulating hormone (TSH), luteinizing hormone (LH), follicle stimulating hormone (FSH), adrenocorticotrophic hormone (ACTH) or antidiuretic hormone (ADH)).
2. Adults (with closed epiphyses, and no remaining growth potential) must meet all the following:
 - a. The recipient is being evaluated by an endocrinologist; and
 - b. The recipient is receiving adequate replacement therapy for any other pituitary hormone deficiencies, such as thyroid, glucocorticoids, or gonadotropic hormones; and
 - c. The recipient has a diagnosis of growth hormone deficiency or hypothalamic pituitary disease (e.g., hypopituitarism due to

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

structure lesions/trauma to the pituitary including pituitary tumor, pituitary surgical damage, trauma, or cranial irradiation); and
The recipient must then meet one of the following:

1. The recipient has failed two growth hormone stimulation tests (<5 ng/mL); or
 2. The recipient has failed one growth hormone stimulation test (<5 ng/mL) and one IGF-1 or IGFBP-3 test; or
 3. The recipient has failed one growth hormone stimulation test (<5 ng/mL) or IGFBP-3 test and has deficiencies in three or more pituitary axes (i.e., TSH, LH, FSH, ACTH, ADH), and has severe clinical manifestations of growth hormone deficiency as evident by alterations in body composition (e.g., decreased lean body mass, increased body fat), cardiovascular function (e.g., reduced cardiac output, lipid abnormalities) or bone mineral density.
3. Continued authorization will be given for recipients (up to age 21, with remaining growth potential) who meet all the following:
- a. The recipient has a diagnosis of chronic renal insufficiency, growth hormone deficiency, hypothalamic pituitary disease, newborn infant with evidence of hypoglycemia, Noonan Syndrome, Prader-Willi Syndrome, small for gestational age or Turner Syndrome; and
 - b. The recipient's epiphyses are open; and
 - c. The recipient's growth rate on treatment is at least 2.5 cm/year; and
 - d. The recipient does not have evidence of an expanding lesion or tumor formation; and
 - e. The recipient has not undergone a renal transplant.
4. Continued authorization will be given for recipients (age 21 years and older, with closed epiphyses and no remaining growth potential) who meet all the following:
- a. The recipient has a diagnosis of growth hormone deficiency or hypothalamic pituitary disease; and
 - b. There is documentation of improvement in clinical manifestations associated with growth hormone deficiency

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

5. Prior Authorization Guidelines

- a. Initial prior authorization will be for six months.
- b. Recertification approval will be for 12 months.

b. Serostim® (somatropin)

1. Approval will be given if the following criteria are met and documented:

- a. The recipient has a diagnosis of Human Immune Deficiency Virus (HIV) with wasting or cachexia; and
- b. The medication is indicated to increase lean body mass, body weight and physical endurance; and
- c. The recipient is receiving and is compliant with antiretroviral therapy; and
- d. The recipient has experienced an involuntary weight loss of >10% pre-illness baseline or they have a body mass index of <20 kg/m²; and
- e. The recipient has experienced an adverse event, allergy, or inadequate response to megestrol acetate, or the recipient has a contraindication to treatment with this agent; and
- f. The recipient has experienced an adverse event, allergy, or inadequate response to an anabolic steroid (e.g., testosterone, oxandrolone, nandrolone) or the recipient has a contraindication to treatment with these agents.

2. Prior Authorization Guidelines:

- a. Prior authorization approval will be for 12 weeks.

c. Zorbtive® (somatropin)

1. Approval will be given if all the following criteria are met and documented:

- a. The recipient has a diagnosis of short bowel syndrome; and
- b. The recipient is age 18 years or older; and
- c. The medication is being prescribed by or following a consultation with a gastroenterologist; and
- d. The recipient is receiving specialized nutritional support (e.g., high carbohydrate, low-fat diets via enteral or parenteral nutrition).

DIVISION OF HEALTH CARE FINANCING AND POLICY

2. Prior Authorization Guidelines
 - a. Initial authorization will be approved for six months.
 - b. Recertification request will be approved for 12 months.
- d. Somavert® (pegvisomant)
 1. Approval will be given if all the following criteria are met and documented:
 - a. The recipient has a diagnosis of acromegaly; and
 - b. The recipient is 18 years age or older; and
 - c. One of the following:
 1. The recipient has an inadequate response to one of the following:
 - a. Surgery; or
 - b. Radiation Therapy; or
 - c. Dopamine agonist (e.g. bromocriptine, cabergoline) therapy; or
 2. The recipient is not a candidate for all the following:
 - a. Surgery; and
 - b. Radiation Therapy; and
 - c. Dopamine agonist (e.g. bromocriptine, cabergoline) therapy; and
 - d. The recipient has tried and failed, a contraindication, or intolerance to generic octreotide (a somatostatin analogue); and
 - e. The medication is prescribed by or in consultation with an endocrinologist.
 2. Recertification Criteria:
 - a. The recipient must meet the following:
 1. The recipient must have a documented positive clinical response to Somavert® therapy (e.g. biochemical control; decrease or normalization of IGF-1 levels).

DIVISION OF HEALTH CARE FINANCING AND POLICY

3. Prior Authorization Guidelines:
 - a. Initial authorization will be approved for 12 weeks.
 - b. Recertification approval will be approved for 12 months.
- e. Skytrofa® (Lonapegsomatropin-tcgd)
 1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is one year or age or older; and
 - b. Recipient's weight is greater than 11.5kg; and
 - c. Recipient has growth failure secondary to growth hormone deficiency (GHD); and
 - d. Recipient has short stature as defined by height that is greater than or equal to two standard deviations below the mean for chronological age; and
 1. Recipient has hypothalamic-pituitary defects (e.g., major congenital malformation, tumor, or irradiation) and a deficiency of greater than or equal to one additional pituitary hormone; or
 2. Recipient had an inadequate response to growth hormone (GH) provocation tests on two separate stimulation tests as defined as a serum peak GH concentration less than 10 ng/mL; and
 - e. Other causes of growth failure must be ruled out (e.g., malnutrition, hypothyroidism, hypercortisolism).
 2. Recertification Criteria:
 - a. Recipient must continue to meet the initial criteria; and
 - b. Recipient has shown a beneficial response compared to pre-treatment baseline (with lonapegsomatropin-tcgd or somatropin [if used as switch maintenance]) as evidenced by greater than or equal to one of the following:
 1. Improvement in height; or
 2. Improvement in growth velocity.

E. Over-the-Counter (OTC) Drugs

Last Reviewed by the DUR Board: N/A

OTC drugs are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

- a. OTC drugs must be FDA approved and manufactured by pharmaceutical companies participating in the Federal Medicaid Drug Rebate Program.
- b. OTC drugs are limited to two prescription requests for medications within the same therapeutic class.
- c. Nevada Medicaid will reimburse up to the OTC Maximum Allowable Cost (MAC) listed in the OTC MAC table. Refer to the Nevada Medicaid Nevada Check Up Pharmacy Manual for details.
- d. Insulin and diabetic supplies are exempt from any prior authorization and OTC MAC limits.

2. Prior Authorization Guidelines:

- a. Prior Authorization is required for more than two prescriptions within the same therapeutic class. Determinations are based on medical necessity and may require additional information.
- b. Approval will be for a one-month time limit.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

F. Transdermal Fentanyl

Therapeutic Class: Analgesics, Narcotic

Last Reviewed by the DUR Board: April 25, 2019

Transdermal fentanyl, a narcotic agonist analgesic, is indicated in the management of chronic pain in patients requiring continuous opioid analgesia for pain that cannot be managed by lesser means such as acetaminophen-opioid combinations, non-steroidal analgesics or PRN dosing with short-acting opioids. Transdermal fentanyl is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

Because serious or life-threatening hypoventilation could occur, fentanyl transdermal is contraindicated in management of acute or postoperative pain, mild or intermittent pain responsive to PRN or non-opioid therapy or in doses exceeding 25 mcg/hr at the initiation of opioid therapy. Therefore, patients must meet the following criteria in order to gain prior authorization approval:

- a. Patient cannot be managed by lesser means such as acetaminophen-opioid combinations, nonsteroidal analgesics or PRN dosing with short-acting opioid.
- b. Patient requires continuous opioid administration.
- c. Prescribers are required to check the Nevada State BOPs Prescription Monitoring Program (PMP) prior to prescribing narcotic analgesics. Refer to the PMP website at <http://bop.nv.gov/links/PMP/>.
- d. If transitioning from another opioid, daily morphine equivalent doses are used to calculate the appropriate fentanyl patch dose.
 1. Morphine 60-134 mg/day PO; initial Transdermal Fentanyl dose 25 mcg/hr.
 2. Morphine 135-224 mg/day PO; initial Transdermal Fentanyl dose 50 mcg/hr.
 3. Morphine 225-314 mg/day PO; initial Transdermal Fentanyl dose 75 mcg/hr.
 4. Morphine 315-404 mg/day PO; initial Transdermal Fentanyl dose 100 mcg/hr.
 5. Morphine 405-494 mg/day PO; initial Transdermal Fentanyl dose 125 mcg/hr.
 6. Morphine 495-584 mg/day PO; initial Transdermal Fentanyl dose 150 mcg/hr.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

7. Morphine 585-674 mg/day PO; initial Transdermal Fentanyl dose 175 mcg/hr.
8. Morphine 675-764 mg/day PO; initial Transdermal Fentanyl dose 200 mcg/hr.
9. Morphine 765-854 mg/day PO; initial Transdermal Fentanyl dose 225 mcg/hr.
10. Morphine 855-944 mg/day PO; initial Transdermal Fentanyl dose 250 mcg/hr.
11. Morphine 945-1034 mg/day PO; initial Transdermal Fentanyl dose 275 mcg/hr.
12. Morphine 1035-1124 mg/day PO; initial Transdermal Fentanyl dose 300 mcg/hr.

2. Prior Authorization Guidelines

- a. Prior authorization approval will be given for 12 months.
- b. Prior Authorization forms are available at:

G. Immediate-Release Fentanyl Products

Therapeutic Class: Analgesics, Narcotic

Last Reviewed by the DUR Board: July 28, 2022

Immediate-Release Fentanyl Products are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

a. Approval will be given if the following criteria are met and documented:

1. Subsys® (fentanyl sublingual spray), Onsolis® (fentanyl citrate buccal film), Fentora® (fentanyl citrate buccal tablet), Lazanda® (fentanyl citrate nasal spray), Abstral® (fentanyl citrate sublingual tablet) and Actiq® (fentanyl citrate transmucosal lozenge):
2. The recipient must meet all the following:
 - a. The recipient is 18 years of age or older or the recipient is greater than 16 years of age if requesting fentanyl citrate transmucosal lozenge (Actiq®); and
 - b. The recipient has pain resulting from a malignancy; and
 - c. The recipient is already receiving and is tolerant to opioid therapy; and
 - d. The recipient is intolerant of at least one of the following immediate-release opioids: hydrocodone, hydromorphone, morphine, or oxycodone.

b. Recertification Criteria:

1. Documentation of disease improvement and/or stabilization.

c. Prior Authorization Guidelines:

1. Prior authorization approval will be for six months.

MEDICAID SERVICES MANUAL

H. Hematopoietic/Hematinic Agents

Therapeutic Class: Erythropoiesis Stimulating Agents (ESAs)

Last Reviewed by the DUR Board: **January 19, 2023**

This policy applies in all settings with the exception of inpatient facilities. Hematopoietics and Hematinics are subject to prior authorizations and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

- a. The recipient has been evaluated for adequate iron stores; and
- b. Recent laboratory results are required for prior authorization, i.e. serum hemoglobin, within seven days of prior authorization request; and
- c. Recipients must meet one of the following criteria for coverage:
 1. Achieve and maintain hemoglobin levels in one of the following conditions:
 - a. Treatment of anemia secondary to myelosuppressive anticancer chemotherapy, Hb levels should not exceed 10 g/dL.
 - b. Treatment of anemia related to zidovudine therapy in HIV-infected patients. Hb levels should not exceed 12 g/dL.
 - c. Treatment of anemia secondary to ESRD. Hb levels should not exceed 11 g/dL if on dialysis or 10 g/dL if not on dialysis.
 - d. Epoetin alfa (Epogen®) is indicated to reduce the need for allogenic transfusions in surgery patients when a significant blood loss is anticipated. It may be used to achieve and maintain hemoglobin levels within the range of 10 to 13 gm/dl. Darbepoetin Alfa (Aranesp®) **has adequate iron stores as demonstrated by serum ferritin greater than or equal to 100 ng/mL (mcg/L) and transferrin saturation (TSAT) greater than or equal to 20% (measured within the previous three months for renewal).**

2. Non-Covered Indications

- a. Any anemia in cancer or cancer treatment patients due to folate deficiency, B-12 deficiency, iron deficiency, hemolysis, bleeding or bone marrow fibrosis.
- b. Anemia associated with the treatment of acute and chronic myelogenous leukemias (CML, AML) or erythroid cancers.
- c. Anemia of cancer not related to cancer treatment.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- d. Any anemia associated only with radiotherapy.
- e. Prophylactic use to prevent chemotherapy-induced anemia.
- f. Prophylactic use to reduce tumor hypoxia.
- g. Patients with erythropoietin-type resistance due to neutralizing antibodies.
- h. Anemia due to cancer treatment if patients have uncontrolled hypertension.

3. Recertification Request

- a. Coverage can be renewed based upon the following criteria:
 - 1. Recipient continues to meet universal and other indication-specific relevant criteria identified in section III; and
 - 2. Previous dose was administered within the past 60 days; and
 - 3. Disease response with treatment as defined by improvement in anemia compared to pretreatment baseline; and
 - 4. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: pure red cell aplasia severe allergic reactions (anaphylaxis, angioedema, bronchospasm, etc.), severe cardiovascular events (stroke, myocardial infarction, congestive heart failure, thromboembolism, etc.), uncontrolled hypertension, seizures, increased risk of tumor progression/recurrence in recipients with cancer, severe cutaneous reactions (erythema multiforme, Stevens-Johnson Syndrome [SJS]/Toxic Epidermal Necrolysis [TEN], etc.), etc.; and
- b. Anemia Due to Myelodysplastic Syndrome (MDS):
 - 1. Hemoglobin (Hb) less than 12 g/dL and/or Hematocrit (Hct) less than 36%.
- c. Anemia Due to Myeloproliferative Neoplasms (MPN) – Myelofibrosis:
 - 1. Hemoglobin (Hb) less than 10 g/dL and/or Hematocrit (Hct) less than 30%.
- d. Anemia Due to Chemotherapy Treatment:
 - 1. Refer to Section III for criteria.
- e. Anemia Due to Chronic Kidney Disease (Non-Dialysis Patients):
 - 1. Pediatric patients: Hemoglobin (Hb) less than 12 g/dL and/or Hematocrit (Hct) less than 36%.

I. Anti-Fungal Agents

Therapeutic Class: Antifungal Agents

Last Reviewed by the DUR: October 20, 2022

Anti-Fungal Agents are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Topical Agents (Jublia® (efinaconazole), Kerydin® (tavaborole))

a. Approval will be given if the following criteria are met and documented:

1. Diagnosis of onychomycosis; and
2. At least one of the following:
 - a. The recipient is experiencing pain which limits normal activity; or
 - b. The recipient has diabetes; or
 - c. The recipient has significant peripheral vascular compromise; or
 - d. The recipient's disease associated with immunosuppression; or
 - e. The recipient's disease is iatrogenically induced; and
 1. An inadequate response (to an appropriate length of therapy), and adverse reaction, a contraindication to use, or a clinical reason either oral terbinafine or itraconazole cannot be used; and
 2. The recipient must have an adverse reaction or have a contraindication to ciclopirox 8% solution.

2. Oral Agents (Sporanox®, Lamisil®)

a. Approval will be given if the following criteria are met and documented:

1. An adequate response (to an appropriate length of therapy), an adverse reaction, a contraindication to use, or a clinical reason either oral terbinafine or itraconazole cannot be used; and
2. The recipient must have had an adverse reaction or have a contraindication to ciclopirox 8% solution.

3. Brexafemme® (ibrexafungerp)
 - a. Approval will be given if all the following criteria is met and documented:
 1. Recipient is postmenarchal female 12 years of age or older; and
 2. Diagnosis of vulvovaginal candidiasis (VVC); and
 3. Females of reproductive potential must have negative pregnancy test; and
 4. Recipient must have an adequate trial and failure, contraindication, resistance, or intolerance of at least single dose 150mg oral fluconazole.
 5. Quantity Limit is four tablets.
 - b. Recertification Request:
 1. Coverage is not renewable.
 - c. Prior Authorization Guidelines:
 1. Prior Authorization will be for one day.
4. Vivjoa® (oteseconazole)
 - a. Approval will be given if all the following criteria are met and documented:
 1. Recipient has a diagnosis of recurrent vulvovaginal candidiasis with greater than or equal to three episodes of vulvovaginal candidiasis (VVC) in a 12-month period; and
 2. Recipient is a biological female who is postmenopausal or has another reason for permanent infertility (e.g., tubal ligation, hysterectomy, salpingo-oophorectomy); and
 3. Recipient must not have hypersensitivity to any component of the product; and
 4. Recipient is not pregnant; and
 5. Recipient is not lactating; and
 6. Recipient has tried and failed or has contraindication or intolerance to maintenance antifungal therapy with oral fluconazole for six months; and
 7. Quantity limit is 18 tablets per treatment course.

Therapeutic Class: Benlysta® (belimumab)

Last Reviewed by the DUR Board: January 25, 2018

Benlysta® (belimumab) is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

Approval will be given if the following criteria are met and documented:

a. Initial request:

1. The recipient has a diagnosis of active Systemic Lupus Erythematosus (SLE); and
2. The recipient must be 18 years of age or older; and
3. Documentation confirms that the recipient is autoantibody positive (i.e., anti-nuclear antibody (ANA) and/or anti-double-stranded DNA (anti-dsDNA)); and
4. The recipient is currently receiving at least one standard of care treatment for active SLE that includes one or more of the following agents (unless all agents are contraindicated): antimalarials (e.g., Plaquenil (hydroxychloroquine)), corticosteroids (e.g., prednisone), glucocorticoids, or immunosuppressants (e.g., methotrexate, Imuran (azathioprine), mycophenolate); and
5. The medication is prescribed by or in consultation with a rheumatologist; and
6. The recipient must not have active CNS Lupus; and
7. The recipient must not currently be receiving treatment for a chronic infection; and
8. The recipient must not have evidence of severe renal disease.

b. Recertification Request (the recipient must meet all the following criteria):

1. Authorization for continued use shall be reviewed at least every six months when the following criteria are met:
 - a. Documentation of positive clinical response to Benlysta® therapy.

K. Spinal Muscular Atrophy (SMA) Agents

Therapeutic Class: Spinal Muscular Atrophy Agents

Last Reviewed by the DUR Board: July 28, 2022

SMA agents are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid Check Up Pharmacy Manual for specific quantity limits.

1. Evrysdi® (risdiplam)

a. Approval will be given if the following criteria are met and documented:

1. Recipient has a diagnosis of SMA type I, II, or III; and
2. Both the following:
 - a. Recipient has mutation or deletion of genes in chromosome 5q resulting in one of the following:
 1. Homozygous gene deletion or mutation (e.g., homozygous deletion of exon 7 at locus 5q13); or
 2. Compound heterozygous mutation (e.g., deletion of survival motor neuron 1 (SMN1) exon 7 [allele 1] and mutation of SMN1 [allele 2]); and
 - b. Recipient has at least two copies of SMN2; and
3. Recipient is not dependent on invasive ventilation or tracheostomy and non-invasive ventilation beyond use for naps and nighttime sleep; and
4. At least one of the following exams (based on the recipient's age and motor ability) have been conducted to establish baseline motor ability:

NOTE: Baseline assessments for patients less than two months of age requesting risdiplam proactively are not necessary to not delay access to initial therapy in recently diagnosed infants. Initial assessments shortly post-therapy can serve as baseline with respect to efficacy reauthorization assessment.

- a. Hammersmith Infant Neurological Exam (HINE) (infant to early childhood); or
- b. Hammersmith Functional Motor Scale Expanded (HFMSE); or
- c. Upper Limb Module (ULM) Test (Non ambulatory); or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- d. Children’s Hospital of Philadelphia Infant Test of Neuromuscular Disorders (CHOP INTEND); or
 - e. Motor Function Measure 32 (MFM-32) Scale; and
- 5. The medication is prescribed by or in consultation with a neurologist with expertise in the diagnosis and treatment of SMA; and
- 6. Recipient is not to receive concomitant chronic SMN modifying therapy for the treatment of SMA (e.g. Spinraza®); and
- 7. One of the following:
 - a. Recipient has not previously received gene replacement therapy for the treatment of SMA (e.g. Zolgensma®); or
 - b. Recipient has previously received gene therapy for the treatment of SMA (e.g. Zolgesma®) and the provider attest that there has been an inadequate response to gene therapy (e.g. sustained decrease in at least one motor test score over a period of six months).
- b. Recertification Request (recipient must meet all criteria):
 - 1. The recipient has documentation of positive clinical response to therapy from pretreatment baseline status as demonstrated by the most recent results from one of the following exams:
 - a. One of the following HINE-2 milestones:
 - 1. Improvement or maintenance of previous improvement of at least a 2-point (or maximal score) increase in ability to kick; or
 - 2. Improvement or maintenance of previous improvement of at least a 1-point increase in any other HINE-2 milestone (e.g., head control, rolling, sitting, crawling, etc.), excluding voluntary grasp; or
 - 3. Recipient exhibited improvement, or maintenance of previous improvement in more HINE motor milestones than worsening, from pretreatment baseline (net positive improvement); or
 - 4. The recipient has achieved and maintained any new motor milestones when they would otherwise be unexpected to do so (e.g., sit unassisted, stand, walk); or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

b. One of the following HFMSE milestones:

1. Improvement or maintenance of a previous improvement of at least a 3-point increase in score from pretreatment baseline; or
2. Recipient has achieved and maintained any new motor milestone from pretreatment baseline when they would otherwise be unexpected to do so (e.g., sit unassisted, stand, walk); or

c. One of the following ULM test milestones:

1. Improvement or maintenance of a previous improvement of at least a 2-point increase in score from pretreatment baseline; or
2. Recipient has achieved and maintained any new motor milestone from pretreatment baseline when they would otherwise be unexpected to do so (e.g., sit unassisted, stand, walk); or

d. One of the following CHOP INTEND milestones:

1. Improvement or maintenance of a previous improvement of at least a 4-point increase in score from pretreatment baseline; or
2. Recipient has achieved and maintained any new motor milestone from pretreatment baseline when they would otherwise be unexpected to do so (e.g., sit unassisted, stand, walk); or

e. One of the following MFM-32 milestones:

1. Improvement or maintenance of a previous improvement of at least a 3-point increase in score from pretreatment baseline; or
2. Recipient has achieved and maintained any new motor milestone from pretreatment baseline when they would otherwise be unexpected to do so (e.g., sit unassisted, stand, walk); and

2. Recipient remains not be dependent on invasive ventilation or tracheostomy and use of non-invasive ventilation beyond use for naps and nighttime sleep; and

3. The medication is prescribed by or in consultation with a neurologist with expertise in the diagnosis and treatment of SMA; and
4. Recipient is not to receive concomitant chronic SMN modifying therapy for the treatment of SMA (e.g. Spinraza®); and
5. One of the following:
 - a. Recipient has not previously received gene replacement therapy for the treatment of SMA (e.g. Zolgensma®); or
 - b. Recipient has previously received gene therapy for the treatment of SMA (e.g. Zolgesma®) and the provider attest that there has been an inadequate response to gene therapy (e.g. sustained decrease in at least one motor test score over a period of six months).
- c. Prior Authorization Guidelines:
 1. Initial authorization will be approved for 12 months.
 2. Recertification request will be approved for 12 months.
2. Spinraza® (nusinersen)
 - a. Approval will be given if the following criteria are met and documented:
 1. Initial request:
 - a. The recipient has a diagnosis of SMA, and
 - b. The medication is prescribed by or in consultation with a neurologist who has experience treating SMA.
 2. Recertification Request (the recipient must meet all the following criteria):
 - a. The recipient has been on therapy for less than 12 months; and
 - b. The recipient is maintaining neurological status; and
 - c. The recipient is tolerating therapy; and
 - d. The medication is prescribed by or in consultation with a neurologist who has experience treating SMA, or all the following:
 1. The recipient has been on therapy for 12 months or more; and
 2. The recipient has experienced a benefit from therapy (e.g., disease amelioration compared to untreated patients); and

 - a. Initial request will be approved for 12 months.
 - b. Recertification request will be approved for 12 months.
3. Zolgensma® (onasemnogene abeparvovec-xioi)
 - a. Approval will be given if the following criteria are met and documented:
 1. The recipient must be two years of age or younger; and
 - a. The recipient must have the mutation or deletion of genes in chromosome 5q in one of the following: homozygous gene deletion or mutation of SMN1 gene (e.g., homozygous deletion of exon 7 at locus 5q13); or
 - b. Compound heterozygous mutation of SMN1 gene (e.g., deletion of SMN1, exon 7 [allele 1] and mutation of SMN1 [allele 2]); and
 1. The recipient has a diagnosis of SMA confirmed by a neurologist with expertise in the diagnosis of SMA; or
 2. The recipient has a diagnosis of SMA based on the results of SMA newborn screening with three copies or less of SMN 2; and
 - c. The recipient is not dependent on either invasive ventilation or tracheostomy or use of non-invasive ventilation beyond use of naps and nighttime sleep; and
 - d. Submission of medical records (e.g., chart notes, laboratory values) documenting the recipient's anti-AAV9 antibody titers are less than or equal to 1:50; and
 - e. The recipient is not to receive concomitant SMN modifying therapy (e.g. Spinraza®); and
 - f. The medication is prescribed by a neurologist with expertise in the diagnosis of SMA; and
 - g. The recipient has never received Zolgensma® treatment in their lifetime.

Humira® (adalimumab)	Otezla® (apremilast)	Taltz® (ixekizumab)
Xeljanz® (tofacitinib)		

Immunomodulator Drugs are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if the following criteria are met and documented:

a. For all recipients:

1. The recipient has had a negative tuberculin test; and
2. The recipient does not have an active infection or a history of recurring infections; and
3. The approval will not be given for the use of more than one biologic at a time (combination therapy); and
4. The requested medication is being prescribed for an FDA-approved indication or the prescriber has provided clinical justification for off-label usage; and
5. Each request meets the appropriate diagnosis-specific criteria (b-j).

b. Rheumatoid Arthritis (RA):

1. The recipient has a diagnosis of moderately to severely active RA; and
2. The recipient is 18 years of age or older; and
3. The recipient has had a rheumatology consultation, including the date of the visit; and one of the following:
 - a. The recipient has had RA for less than six months (early RA) and has high disease activity; and an inadequate or adverse reaction to a disease modifying antirheumatic drug (DMARD) (methotrexate,

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

hydroxychloroquine, leflunomide, minocycline and sulfasalazine);
or

- b. The recipient has had RA for greater than or equal to six months (intermediate or long-term disease duration) and has moderate disease activity and has an inadequate response to a DMARD (methotrexate, hydroxychloroquine, leflunomide, minocycline or sulfasalazine); or
 - c. The recipient has had RA for greater than or equal to six months (intermediate or long-term disease duration) and has high disease activity.
- c. Psoriatic Arthritis:
1. The recipient has a diagnosis of moderate or severe psoriatic arthritis; and
 2. The recipient is 18 years of age or older; and
 3. The recipient has had a rheumatology consultation including the date of the visit or a dermatology consultation including the date of the visit; and
 4. The recipient had an inadequate response or a contraindication to treatment with any one nonsteroidal anti-inflammatory (NSAID) or to any one of the following DMARDs: methotrexate, leflunomide, cyclosporine or sulfasalazine.
- d. Ankylosing Spondylitis:
1. The recipient has a diagnosis of ankylosing spondylitis; and
 2. The recipient is 18 years or older; and
 3. The recipient has had an inadequate response to NSAIDs; and
- e. Juvenile Rheumatoid Arthritis/Juvenile Idiopathic Arthritis:
1. The recipient has a diagnosis of moderately or severely active juvenile RA or juvenile idiopathic arthritis; and
 2. The recipient is at an appropriate age, based on the requested agent, and:
 - a. Abatacept: Six years of age or older.
 - b. Adalimumab, canakinumab, etanercept, tocilizumab: Two years of age or older.
 3. And the recipient has at least five swollen joints; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

4. The recipient has three or more joints with limitation of motion and pain, tenderness or both; and
 5. The recipient has had an inadequate response to one DMARD.
- f. Plaque Psoriasis:
1. The recipient has a diagnosis of chronic, moderate to severe plaque psoriasis; and
 2. The recipient is 18 years of age or older; and
 3. The agent is prescribed by a dermatologist; and
 4. The recipient has failed to adequately respond to a topical agent; and
 5. The recipient has failed to adequately respond to at least one oral treatment.
- g. Crohn's Disease:
1. The recipient has a diagnosis of moderate to severe Crohn's Disease; and
 2. The recipient is at an appropriate age, based on the requested agent:
 - a. Adalimumab, infliximab: Six years of age or older.
 - b. All others: 18 years of age or older.
 1. And the recipient has failed to adequately respond to conventional therapy (e.g. sulfasalazine, mesalamine, antibiotics, corticosteroids, azathioprine, 6-mercaptopurine, leflunomide); or
 2. The recipient has fistulizing Crohn's Disease.
- h. Ulcerative Colitis (UC):
1. The recipient has a diagnosis of moderate to severe UC; and
 2. The recipient is at an appropriate age, based on the requested agent:
 - a. Infliximab: Six years of age or older.
 - b. Humira: five years of age or older.
 - c. All others: 18 years of age or older.
 1. And the recipient has failed to adequately respond to one or more of the following standard therapies:
 - a. Corticosteroids;

- b. 5-aminosalicylic acid agents;
 - c. Immunosuppressants; and/or
 - d. Thiopurines.
- 4. Zeposia® (ozanimod) for diagnosis of UC
 - a. Approval will be given if all the following criteria are met and documented:
 - 1. Prescribed by or in consultation with a gastroenterologist; and
 - 2. Recipient has a diagnosis of moderately to severely active UC; and
 - 3. Inadequate response after a 90-day trial of one of the following conventional therapies:
 - a. 6-mercaptopurine
 - b. Aminosalicylates (e.g., mesalamine, balsalazide, olsalazine)
 - c. Sulfasalazine
 - d. Azathioprine
 - e. Corticosteroids (e.g., budesonide, high dose steroids 40-60mg of prednisone daily); and
 - 4. Recipient has tried and failed two preferred immunomodulator therapies indicated for moderately to severely active UC.
- i. Cryopyrin-Associated Periodic Syndromes (CAPS): Familial Cold Autoinflammatory Syndromes (FCAS) or Muckle-Wells Syndrome (MWS):
 - 1. The recipient has a diagnosis of FCAS or MWS; and
 - 2. The recipient is at an appropriate age, based on the requested agent:
 - a. Canakinumab: Four years of age or older.
 - b. Rilonacept: 12 years of age or older.

M. Topical Immunomodulators

Therapeutic Class: Topical Immunomodulators

Last Reviewed by the DUR Board: July 28, 2022

Topical Immunomodulators drugs are a subject to prior authorization and quantity limitations and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

a. Authorization will be given if the following criteria are met and documented:

1. Patient has a documented diagnosis of Atopic Dermatitis:

- a. Elidel® for mild to moderate, for ages greater than or equal to two years.
- b. Eucrisa® for mild to moderate, for ages greater than or equal to three months.
- c. Protopic® 0.03%; moderate to severe, for ages greater than or equal to two years.
- d. Protopic® 0.1%; moderate to severe, for ages greater than or equal to 16 years.

2. The agent is not for chronic use.

3. Elidel® is not recommended for use on patients with Netherton's syndrome due to the potential for systemic absorption.

4. Not recommended for use in immunocompromised patients.

2. Opzelura® (ruxolitinib)

a. Approval will be given if all the following criteria is met and documented:

- 1. The patient has a documented diagnosis of mild to moderate Atopic Dermatitis; and
- 2. Recipient is 12 years of age or older; and
- 3. The medication will not be used chronically; and
- 4. Recipient is not immunocompromised; and

N. Psychotropic Medications for Children and Adolescents

Therapeutic Class: Psychotropic Agents

Last Reviewed by the DUR Board: July 23, 2020

Psychotropic medications for children and adolescents are subject to prior authorization based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for billing information.

Authorization will be given if the following criteria are met and documented.

1. Coverage and Limitations

The DHCFP requires prior authorization approval for children and adolescents for the psychotropic therapeutic classes below and medication combinations considered to be polypharmacy. The DHCFP has adopted the following practice standards to strengthen treatment outcomes for our children and adolescents.

a. The psychotropic therapeutic classes subject to this policy are:

1. Antipsychotics
2. Antidepressants
3. Mood Stabilizers (including lithium and anticonvulsants used for behavioral health indications.)
4. Sedative hypnotics
5. Antianxiety agents

b. For all children under 18 years of age, the following must be documented in the medical record for authorization.

1. For psychotropic medications in this age group, when possible, be prescribed by or in consultation with a child psychiatrist.
2. Psychotropic medication must be part of a comprehensive treatment plan that addresses the education, behavioral management, living home environment and psychotherapy.
3. Physician and/or prescriber monitoring is required while the recipient is utilizing any psychotropic medication.
 - a. For recipients who are in initial treatment (have not received any doses previously) or are continuing therapy but are considered unstable (has had a dose change in the last three months), medical documentation must support a monthly or more frequent visit with the physician and/or prescriber. If the recipient was discharged from

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

an institution on the medication, the follow-up visit(s) can be with their treating physician and/or prescriber.

- b. For recipients who are considered stable in their medication therapy, medical documentation must support visits with the treating physician at least every three months.
- c. Polypharmacy: Each psychotropic medication prescribed must be independently treating a specific symptom and/or diagnosis.
 1. Polypharmacy (intra-class) is defined as more than one drug within the same therapeutic class within a 60-day time period.
 - a. Prior authorization approval is required for two or more drugs in the same therapeutic class within a 60-day period.
 2. Polypharmacy (inter-class) is defined as more than one drug across different therapeutic classes within a 60-day time period.
 - a. Prior authorization approval is required for four or more drugs across all psychotropic therapeutic classes listed in this policy within a 60-day time period.
 3. Approval for polypharmacy may be given in situations where the requested medication(s) will be used for cross tapering and situations where the recipient will be discontinuing the previously prescribed agent. A 30-day cross-taper will be allowed.
 4. Approval for polypharmacy may be given for a medication to augment the effect of another psychotropic medication as long as the purpose of the polypharmacy is clearly documented in the recipient's medical record and each agent is supported by individual authorizations.
 5. The recipient must have a trial of each individual medication alone. The reasons for an inadequate response must be documented in the medical record.
 6. For intra-class and inter-class polypharmacy, all psychotropic medications must be utilized for a medically accepted indication as established by the FDA, and/or peer reviewed literature.
 7. Polypharmacy rules will be bypassed for antidepressants, antipsychotics, anticonvulsants, and mood stabilizers, if the medication is prescribed by a board-certified child psychiatrist.
- d. For children under six years of age, in addition to the Coverage and Limitation requirements, all psychotropic medications require a prior authorization approval

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

and must be utilized for a medically accepted indication as established by the FDA and/or peer-reviewed literature.

- e. Continuity of Care. In an effort to improve recipient safety and quality of care:
 1. For recipients under 18 years of age, who have been discharged from an institutional facility, they will be allowed to remain on their discharge medication regimen for up to six months to allow the recipient time to establish outpatient mental health services. The initial prior authorization after discharge must document the name of the discharge institution and the date of discharge.
 2. For all other recipients under the age of 18, a six month prior authorization will be granted to cover current medication(s) when it is documented that the recipient has been started and stabilized. This will allow the recipient time to establish services if necessary and to transition to medication(s) per Nevada Medicaid policy.
2. Exceptions to Criteria for Anticonvulsants and ADD/ADHD Medications:
 - a. Treatment for seizure disorders with anticonvulsants are not subject to this policy. The ICD Codes for Epilepsy and/or Convulsions will bypass the prior authorization requirement at the pharmacy POS if the correct ICD Code is written on the prescription and transmitted on the claim. Or the prior authorization requirement will be overridden for anticonvulsant medications when the prescriber has a provider Specialty Code of 126, neurology or 135, pediatric neurology, in the POS system.
 - b. The current policy for treatment of ADD/ADHD is to be followed. Refer to this Chapter's Appendix A.
3. Prior Authorization Guidelines

P. Respiratory and Allergy Biologics

Therapeutic Class: Respirator and Allergy Biologics

Last Reviewed by the DUR Board: January 19, 2023

Respiratory and Allergy Biologics are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

a. Xolair® (Omalizumab)

1. Approval will be given if all the following criteria are met and documented:

- a. The recipient will not use the requested antiasthmatic monoclonal antibody in combination with other antiasthmatic monoclonal antibodies; and
- b. All the following criteria must be met and documented for a diagnosis of moderate to severe persistent asthma:
 1. The recipient must be six years of age or older; and
 2. The recipient must have a history of a positive skin test or Radioallergosorbent (RAST) test to a perennial aeroallergen; and
 3. The prescriber must be either a pulmonologist or allergist/immunologist; and
 4. The recipient must have had an inadequate response, adverse reaction, or contraindication to inhaled, corticosteroids; and
 5. The recipient must have had an inadequate response, adverse reaction, or contraindication to a leukotriene receptor antagonist; and
 6. The recipient must have had a pretreatment serum total Immunoglobulin E (IgE) level between 30 IU/mL and 700 IU/mL; and
 7. The recipient's current weight must be recorded; and
 8. The requested dose is appropriate for the recipient's pre-treatment serum IgE and body weight (see Table 1).

DIVISION OF HEALTH CARE FINANCING AND POLICY

2. All the following criteria must be met and documented for diagnosis of chronic idiopathic urticaria (CIU):
 - a. The recipient is 12 years of age or older; and
 - b. The recipient must have had an inadequate response, adverse reaction, or contraindication to two different oral second-generation antihistamines; and
 - c. The recipient must have had an inadequate response, adverse reaction, or contraindication to an oral second-generation antihistamine in combination with a leukotriene receptor antagonist; and
 - d. The prescriber must be either an allergist/immunologist, dermatologist or a rheumatologist or there is documentation in the recipient's medical record that a consultation was done by an allergist/immunologist, dermatologist or a rheumatologist regarding the diagnosis and treatment recommendations; and
 - e. One of the following:
 1. The request is for initiation of therapy and the dose will be 150 mg every four weeks; or
 2. The request is for initiation of therapy and the dose will be 300 mg every four weeks, and clinical rationale for starting therapy at 300 mg every four weeks has been provided (pharmacy review required); or
 3. The request is for continuation of therapy and the dose will be 150mg or 300mg every four weeks
3. All the following criteria must be met for diagnosis of Nasal Polyps (NP) and all the following:
 - a. The recipient is 18 years of age or older; and
 - b. The prescriber must be one of the following, or there is documentation in the recipient's medical record that a consultation regarding diagnosis and treatment recommendations was done by one of the following:
 1. Allergist/Immunologist; or
 2. Dermatologist; or
 3. Rheumatologist; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- c. The recipient must have had an inadequate response, adverse reaction, or contraindication to at least 2 months of therapy with an intranasal corticosteroid and had inadequate response; and
- d. One of the following:
 - 1. The recipient will continue intranasal corticosteroid treatment along with omalizumab therapy; or
 - 2. The prescriber has provided valid medical rationale for not continuing intranasal corticosteroid treatment along with omalizumab therapy; or
 - 3. The request is for continuation of therapy and there is documentation of a positive clinical response to therapy (e.g., reduction in nasal polyps score [NPS; 0-8 scale], improvement in nasal congestion/obstruction score [NCS; 0-3 scale])
- 4. Prior Authorization Guidelines:
 - a. Prior authorization approval will be for 12 months.
 - b. Prior Authorization forms are available at:

- b. Nucala® (mepolizumab), Cinqair® (reslizumab)

- 1. All the following criteria must be met and documented:
 - a. The recipient will not use the requested antiasthmatic monoclonal antibody in combination with other antiasthmatic monoclonal antibodies; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- b. The recipient must have a diagnosis of severe eosinophilic-phenotype asthma; and
 - c. The recipient must be of FDA indicated appropriate age:
 - 1. Mepolizumab: six years of age or older;
 - 2. Reslizumab: 18 years of age or older; and
 - d. The prescriber must be either a pulmonologist or allergist/immunologist; and
 - e. The recipient must be uncontrolled on current therapy including high dose corticosteroid and/or on a secondary asthma inhaler; and
 - f. There is documentation of the recipient's vaccination status; and
 - g. The requested dose is appropriate:
 - 1. Mepolizumab: 100 mg subcutaneously every four weeks.
 - 2. Reslizumab: 3 mg/kg via intravenous infusion of 20 to 50 minutes every four weeks.
2. Prior Authorization Guidelines:
- a. Prior authorization approval will be for 12 months.
 - b. Prior Authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>
- c. Nucala® (mepolizumab) for the treatment of severe asthma
- 1. Approval will be given if all the following criteria are met and documented:
 - a. The recipient must have a diagnosis of severe asthma; and
 - b. The asthma is an eosinophilic phenotype as defined by one of the following:
 - 1. Baseline (pre-treatment) peripheral blood eosinophil level greater than or equal to 150 cells/microliter; or
 - 2. Peripheral blood eosinophil levels were greater than or equal to 300 cells/microliter within the past 12 months; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- c. One of the following:
 - 1. The recipient has had at least one or more asthma exacerbations requiring systemic corticosteroid within the past 12 months; or
 - 2. The recipient has had prior intubation for an asthma exacerbation; or
 - 3. The recipient has had prior asthma-related hospitalization within the past 12-months; and
- d. The recipient is currently being treated with one of the following (unless there is a contraindication or intolerance to these medications)
 - 1. Both the following:
 - a. High-dose inhaled corticosteroid (ICS) (e.g., greater than 500 mcg fluticasone propionate equivalent/day); and
 - b. Additional asthma controller medication (e.g., leukotriene receptor antagonist, long-acting beta-2 agonist [LABA], theophylline); or
 - 2. One maximally dosed combination ICS/LABA product (e.g., Advair [fluticasone propionate/salmeterol], Dulera [mometasone/formoterol], Symbicort [budesonide/formoterol]); and
- e. The recipient age is greater than or equal to six years; and
- f. The medication must be prescribed by or in consultation with one of the following:
 - 1. Pulmonologist; or
 - 2. Allergist/Immunologist
- 2. Recertification request (the recipient must meet all the criteria)
 - a. Documentation of positive clinical response to therapy (e.g. reduction in exacerbations, improvement in forced expiratory volume in one second [FEV1], decreased use of rescue medications); and

2. Rheumatologist; or
 3. Allergist/Immunologist.
2. Recertification Requests (the recipient must meet the following criteria)
 - a. Documentation of positive clinical response to therapy (e.g. increase in remission time).
 3. Prior Authorization Guidelines:
 - a. Initial authorization will be approved for 12 months.
 - b. Recertification request will be approved 12 months.
 - c. Prior Authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>.
- e. Nucala® (mepolizumab) for treatment of Hypereosinophilic Syndrome (HES)
1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is greater than or equal to 12 years old; and
 - b. Recipient has a diagnosis of uncontrolled HES for greater than or equal to six months defined by both of the following:
 1. History of greater than or equal to two flares over the past 12 months; and
 2. Baseline (pre-treatment) blood eosinophil count greater than or equal to 1,000 cells/mL; and
 - c. No identifiable non-hematologic secondary cause of the HES; and
 - d. Recipient does not have FIP1L1-PDGFRa kinase-positive HES; and
 - e. Recipient is currently received a stable dose of background HES therapy (e.g., episodic oral corticosteroids, immunosuppressive, or cytotoxic therapy); and
 - f. Prescribed by or in consultation with an allergist, immunologist, pulmonologist, or rheumatologist.
 2. Recertification Request:
 - a. Documentation of positive clinical criteria response to therapy (e.g., decreased number of flares, improved fatigue, reduced corticosteroids requirements, and decreased eosinophil levels).

 - b. Recertification will be given for 12 months.
- f. Nucala® (mepolizumab) for treatment of Chronic Rhinosinusitis with Nasal Polyps
 - 1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is greater than or equal to 18 years old.
 - b. Recipient has a diagnosis of Chronic Rhinosinusitis with Nasal Polyps (CRSwNP); and
 - c. Unless contraindicated, the recipient has had an inadequate response to at least two months of treatment with an intranasal corticosteroid (initial approval only); and
 - d. Mepolizumab will be used as add-on medication to maintenance therapy (e.g. intranasal corticosteroid, saline nasal irrigations, systemic corticosteroids, antibiotics).
 - 2. Recertification Request:
 - a. Recipient continues to meet above criteria; and
 - b. Documentation of positive clinical response to Nucala® (mepolizumab).
 - 3. Prior Authorization Guidelines:
 - a. Initial prior authorization will be given for 12 months.
 - b. Recertification approval will be given for 12 months.
- e. Fasenra® (benralizumab)
 - 1. All the following criteria must be met and documented:
 - a. The recipient must be 12 years of age or older; and
 - b. The recipient will not use the requested antiasthmatic monoclonal antibody in combination with other antiasthmatic monoclonal antibodies; and

Q. Long-Acting Narcotics

Therapeutic Class: Analgesics, Narcotic

Last Reviewed by DUR Board: April 28, 2016

Long-Acting Narcotics are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

The current criteria for the use of fentanyl transdermal patches (Appendix A, (F.)) or oxycodone/acetaminophen ER tablets (Appendix A, (XX.)) is to be met.

For all other long-acting narcotics requests that exceed the quantity limit, the following criteria must be met and documented:

- a. The recipient has a diagnosis of terminal cancer; or
- b. All the following criteria must be met:
 1. The recipient is 18 years of age or older; and
 2. The requested agent will be used for the management of pain severe enough to require daily, around-the-clock, long-term opioid treatment; and
 3. There is documentation in the recipient's medical record that alternative agents (e.g., non-opioid analgesics or immediate-release opioids) are ineffective, not tolerated or would be otherwise inadequate to provide sufficient management of pain.

2. Prior Authorization Guidelines

- a. The prior authorization approval will be for three months.
- b. Prior Authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>

DIVISION OF HEALTH CARE FINANCING AND POLICY

R. Toradol® (ketorolac tromethamine) tablets

Therapeutic Class: Nonsteroidal Anti-inflammatory Drugs (NSAIDs)

Last Reviewed by the DUR Board: April 30, 2020

Toradol® is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Ketorolac is indicated for the short-term (up to five days) management of moderately severe acute pain that requires analgesia at the opioid level. It is not indicated for minor or chronic painful conditions. The following criteria must be met:
 - a. Oral treatment must be indicated only as continuation therapy to IV/IM therapy; and
 - b. Oral treatment must not exceed five days; and
 - c. Oral treatment must not exceed 40 mg/day.
2. Prior Authorization Guidelines
 - a. Initial request will be approved for up to five days.
 - b. Prior Authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>

S. Anti-Migraine Medications

Therapeutic Class: Serotonin 5-HT₁ receptor agonists (triptans)

Last Reviewed by the DUR Board: July 25, 2019

Therapeutic Class: Calcitonin Gene-Related Peptide (CGRP) Receptor Inhibitor Medications

Last Reviewed by the DUR Board: January 27, 2022

Therapeutic Class: Ergot Derivatives

Last Reviewed by the DUR Board: July 28, 2022

Serotonin 5-HT₁ receptor agonists commonly referred to as “triptans”, CGRP Receptor Inhibitor medications and Ergot Derivatives or anti-migraine medications are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Serotonin 5-HT₁ Receptor Agonists (triptans)

- a. An approved prior authorization is required for any prescription exceeding the quantity limits. Approval for additional medication beyond these limits will be considered only under the following circumstances:
 1. The recipient’s current medication history documents the use of prophylactic medications for migraine headache, or the medical provider agrees to initiate such therapy which includes beta-blockers, tricyclic antidepressants, anticonvulsants, Selective Serotonin Reuptake Inhibitors (SSRIs) and/or calcium channel blockers; or
 2. The medical provider is aware of and understands the implications of daily use and/or overuse of triptans and agrees to counsel the patient on this issue in an effort to taper the quantity of triptan medication required monthly.
 - a. Recipient’s current medication history must NOT have Monoamine Oxidase (MAO) Inhibitors present for approval of Imitrex® (sumatriptan), Maxalt® (rizatriptan) or Zomig® (zolmitriptan).
 - b. Recipients whose current medication history indicates the use of propranolol will NOT be granted prior authorization of Maxalt® (rizatriptan) 10mg tablet or 10mg orally disintegrating tablet.
 - c. Prior authorization will NOT be given to patients with ischemic heart disease.
- b. Prior Authorization Guidelines:
 1. Approval for exceeding the quantity limits on triptans will be provided for a two-month period.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. The prior authorization must be initiated by the prescriber. The approved prior authorization must be available if requested.
2. Calcitonin Gene-Related Peptide (CGRP) Receptor Inhibitor Medications
 - a. CGRP General Criteria
 1. Approval will be given if the following criteria are met and documented:
 - a. The recipient must have one of the following:
 1. Both the following:
 - a. The recipient has a diagnosis of episodic migraines; and
 - b. The recipient has four to 14 migraine days per month, but not more than 14 headache days per month: or (for Nurtec® requests, the recipient does not have more than 18 headache days per month); or
 2. All the following:
 - a. The recipient has a diagnosis of chronic migraines; and
 - b. The recipient has greater than or equal to 15 headache days per month, of which at least eight must be migraine days for at least three months; and
 - c. The recipient has been considered for medication overuse headache (MOH) and potentially offending medication(s) have been discontinued; and
 - b. The recipient is 18 years of age or older; and
 - c. The recipient has a documented history of failure (after at least a two-month trial) or an intolerance/contraindication to at least one medication from two of the following categories:
 1. Evail (amitriptyline) or Effexor (venlafaxine)
 2. Depakote/Depakote ER (divalproex) or Topamax (topiramate)
 3. One of the following beta blockers: atenolol, propranolol, nadolol, timolol, or metoprolol; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- d. The medication will not be used in combination with any other CGRP Inhibitor.
- 2. Recertification Request:
 - a. The recipient must have a documented positive response to CGRP therapy, demonstrated by a reduction in headache frequency and/or intensity; and
 - b. The recipient has had a decrease in use of acute migraine medications (e.g., NSAIDs, triptans) since the start of CGRP therapy; and
 - c. For chronic migraine only: The recipient continues to be monitored for MOH.
- 3. Prior Authorization Guidelines:
 - a. Initial request will be approved for six months.
 - b. Recertification request will be approved for 12 months.
- b. CGRPs for Acute Migraines:
 - 1. Ubrelvy® (ubrogepant), Nurtec® ODT (rimegepant).
 - a. Approval will be given if all the following criteria are met and documented:
 - 1. Recipient must have a diagnosis of acute migraine with or without aura; and
 - 2. Recipient is 18 years of age or older; and
 - 3. The prescribed dose will not exceed two doses per migraine and treating no more than eight migraine episodes per 30 days; and
 - 4. The recipient has had at least one trial and failure of a triptan agent; and
 - 5. The medication must be prescribed by or in consultation with either a Neurologist or a Pain Specialist.
 - b. Recertification Request:
 - 1. The recipient must have a documented positive response to the CGRP therapy; and

2. CGRPs for Episodic Cluster Headache
 - a. Emgality® (galcanezumab-gnlm)
 1. Approval will be given if all the following criteria are met and documented
 - a. The recipient has a diagnosis of episodic cluster headache; and
 - b. The recipient has experienced at least two cluster periods lasting from seven days to 365 days, separated by pain-free periods lasting at least three months.
 - c. The recipient is 18 years of age or older.
 - d. The medication must be prescribed by or in consultation with either a Neurologist or a Pain Specialist.
 - e. The medication will not be used in combination with any other CGRP inhibitor.
 2. Recertification Request:
 - a. The recipient has documented positive response to Emgality® therapy, demonstrated by a reduction in headache frequency and/or intensity; and
 - b. The medication must be prescribed by or in consultation with either a Neurologist or a Pain Specialist.
 3. Prior Authorization Guidelines:
 - a. Initial request will be approved for three months.
 - b. Recertification request will be approved for 12 months.

3. CGRP's Antagonists for Episodic Migraines

a. Nurtec® ODT (rimegepant).

1. Approval will be given if all criteria are met and documented:

- a. The recipient is 18 years of age or older; and
- b. The recipient has a documented diagnosis of episodic migraines, having 4-18 migraine days per month but not more than 18 headache days per month; and
- c. Two of the following:

- 1. The recipient has a documented history of failure (after at least a two-month trial) or intolerance to Elavil® (amitriptyline) or Effexor® (venlafaxine); or has a contraindication to both Elavil® (amitriptyline) and Effexor® (venlafaxine); or
- 2. The recipient has a documented history of failure (after at least a two-month trial) or intolerance to Depakote/Depakote ER (divalproex) or Topamax (topiramate); or has a contraindication to both Depakote/Depakote ER (divalproex) and Topamax (topiramate); or
- 3. The recipient has a history of failure (after at least a two-month trial) or intolerance to one of the following beta blockers:
 - a. Atenolol; or
 - b. Propranolol; or
 - c. Nadolol; or
 - d. Timolol; or
 - e. Metoprolol; and

- d. Medication will not be used in combination with any other CGRP inhibitor.

- a. Brand D.H.E. 45 (dihydroergotamine mesylate) injection, Generic dihydroergotamine mesylate injection, Brand Migranal nasal spray, or Generic dihydroergotamine mesylate nasal spray or Trudhesa®.

1. Approval will be given if all criterias are met and documented:

- a. The recipient has a diagnosis of headahces with or without aura; and
- b. The medication will be used for the acute treatment of migraine; and
- c. The recipient is 18 years of age or older; and
- d. One of the following:
 - 1. The recipient has tried and failed or has intolerance to two triptants (e.g., eletriptan, rizatriptan, sumatriptan); or
 - 2. The recipient has contraindication to all triptans; and
- e. The medication is prescribed by or in consultation with either a Neurologist, a Pain Specialist, or a Headache Specialist; and
- f. If the recipient has more than four headache days per month, they must meet at least one of the following:
 - 1. The recipient is currently being treated with Elavil (amitriptyline) or Effexor (venlafaxine) unless there is a contraindication or intolerance to these medications; or
 - 2. The recipient is currently being treated with Depakote/Depakote ER (divalproex sodium) or Topamax (topiramate) unless there is a

U. Short-Acting Bronchodilators

Therapeutic Class: Beta Adrenergic Agents

Last Reviewed by the DUR Board: January 24, 2019

Short-Acting Bronchodilators are subject to PA and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. This criteria applies to, but is not limited to, the following list:

Proventil® HFA	ProAir® HFA	ProAir RespiClick®
Ventolin® HFA	Albuterol Nebulizer	Nebulizer Solution

- a. Coverage and Limitations

Authorization will be given if the following criteria are met and documented:

1. Quantity Limits:

- a. Albuterol Metered Dose Inhalers (MDI): two units per month.
- b. Albuterol Nebulizer Solution: three bottles of 20ml each or 125 nebulizer units per month.

2. In order to exceed the quantity limit, a recipient must meet all of the following:

- a. The recipient must have a diagnosis of asthma; and
- b. The recipient has been assessed for causes of asthma and external triggers have been removed or reduced where possible.

3. For recipients 18 years of age or younger the following criteria must be met:

- a. The recipient has a diagnosis of asthma; and
- b. The recipient requires an additional inhaler unit for school or equivalent program.

- b. Prior Authorization Guidelines

1. Prior authorization approval will be for 12 months.
2. Prior authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>

V. Anti-Insomnia Agents (Sedative Hypnotics)

Therapeutic Class: Anxiolytics, Sedatives and Hypnotics

Last Reviewed by the DUR Board: September 3, 2015

See Section N of this Appendix for criteria for Sedatives and Hypnotics when prescribed for a psychotropic indication.

Sedatives Hypnotics are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

Approval will be given if the following criteria are met and documented.

- a. An FDA approved ICD diagnosis code, such as insomnia, is documented on the prescription and transmitted on the claim; or
- b. A PA with an FDA approved diagnosis, such as insomnia, is submitted.

2. Prior Authorization Guidelines

- a. Prior Authorization forms are available at:

X. Antiemetics

Therapeutic Class: Antiemetics, (Serotonin Receptor Antagonists (5 HT3 Antiemetics))

Last Reviewed by the DUR Board: October 28, 2010

Therapeutic Class: Antiemetic (Cannabinoid Antiemetics)

Last Reviewed by DUR Board: October 18, 2018

Antiemetics are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

An approved prior authorization is required for any prescription exceeding the quantity limits. Approval for additional medication beyond these limits will be considered only under the following circumstances:

Serotonin Receptor Antagonists (5 HT3 Antiemetics)

1. Coverage and Limitations

- a. The recipient has failed on chemotherapy-related antiemetic therapy at lower doses;
or
- b. The recipient is receiving chemotherapy treatments more often than once a week;
or
- c. The recipient has a diagnosis of Acquired Immune Deficiency Syndrome (AIDS) associated nausea and vomiting; or
- d. The recipient has a diagnosis of hyperemesis gravidarum and has failed at least one other antiemetic therapy or all other available therapies are medically contraindicated.

2. Prior Authorization Guidelines

A prior authorization to override the quantity limits to allow for a 30-day fill for these drugs may be effective for up to six months.

Cannabinoid Antiemetics

1. Coverage and Limitations

Approval will be given if all the following criteria are met and documented:

- a. Nabilone
 1. The recipient has a diagnosis of chemotherapy-induced nausea and/or vomiting; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. The recipient has experienced an inadequate response, adverse event or has a contraindication to at least one serotonin receptor antagonist; and
3. The recipient has experienced an inadequate response, adverse event or has a contraindication to at least one other antiemetic agent; and
4. The prescriber is aware of the potential for mental status changes associated with the use of this agent and will closely monitor the recipient.

b. Dronabinol

1. The recipient has a diagnosis of chemotherapy-induced nausea and/or vomiting; and
 - a. The recipient has experienced an inadequate response, adverse event or has a contraindication to at least one serotonin receptor antagonist; and
 - b. The recipient has experienced an inadequate response, adverse event or has a contraindication to at least one other antiemetic agent; and
 - c. The prescriber is aware of the potential for mental status changes associated with the use of this agent and will closely monitor the recipient; or
2. The recipient has been diagnosed with Acquired Immune Deficiency Syndrome (AIDS) and has anorexia associated with weight loss; and the recipient has experienced an inadequate response, adverse event or has a contraindication to megestrol (Megace®); and
 - a. The prescriber is aware of the potential for mental status changes associated with the use of this agent and will closely monitor the recipient.

2. Prior Authorization Guidelines

- a. Prior authorization approval will be for one year.

Y. Synagis® (palivizumab)

Therapeutic Class: Antiviral Monoclonal Antibodies

Last Reviewed by the DUR Board: January 22, 2015

Synagis® (palivizumab) injections are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

For consideration outside these guidelines, a prior authorization may also be submitted with supporting medical necessity documentation.

1. Coverage and Limitations

Approval will be given if the following criteria are met and documented:

- a. Recipients younger than 12 months of age at the start of Respiratory Syncytial Virus (RSV) season, must meet one of the following criteria:
 1. The recipient was born at 28 weeks, six days of gestation or earlier; or
 2. The recipient has a diagnosis of chronic lung disease (CLD) of prematurity; or
 3. The recipient has hemodynamically significant congenital heart disease; or
 4. The recipient has congenital abnormalities of the airways or neuromuscular disease; or
 5. The recipient has a diagnosis of cystic fibrosis; and
 - a. The recipient has clinical evidence of CLD and/or nutritional compromise.
- b. Recipients younger than two years of age at the start of RSV season must meet one of the following criteria:
 1. The recipient has a diagnosis of CLD of prematurity; and
 - a. The recipient has required medical therapy (e.g., bronchodilator, diuretics, oxygen, corticosteroids) within six months to the start of RSV season; or
 2. The recipient has had a cardiac transplant; or
 3. The recipient is severely immunocompromised (solid organ or hematopoietic stem cell transplant, chemotherapy or other conditions) during the RSV season; or

Z. Opioids, Opioid Containing Cough Preparations, Opioids Prescribed to Under Age 18

Therapeutic Class: Opioids, Last reviewed by the DUR Board: July 26, 2018

Opioid Containing Cough Preparations Last reviewed by the DUR Board: July 26, 2018

Opioids Prescribed to Under Age 18: Last Reviewed by the DUR Board: October 18, 2018

Opioids, Opioid Containing Cough Preparations and Opioids Prescribed to Under Age 18 are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

Opioids

1. Coverage and Limitations

a. Opioids will be covered without prior authorization:

1. For initial prescriptions of seven days or less; and
2. For a total of 13 seven-day prescriptions in any rolling 12-month period; and
3. For prescriptions of 60 mg morphine equivalents or less per day.

b. Recipients currently on chronic opioid medications will not be subject to the seven-day requirement for an opioid(s) they have been receiving in the past 45 days.

c. Prior Authorization Criteria: To exceed the number of seven-day prescriptions, or to exceed the seven-day limit, or to exceed the 60 mg morphine equivalents or less per day:

1. All of the following criteria must be met and documented:

- a. The recipient has chronic pain or requires an extended opioid therapy and is under the supervision of a licensed prescriber; and
- b. Pain cannot be controlled through the use of non-opioid therapy (acetaminophen, NSAIDs, antidepressants, anti-seizure medications, physical therapy, etc.); and
- c. The lowest effective dose is being requested; and
- d. A pain contract is on file.

d. Exceptions to this policy:

1. Recipients with cancer/malignancy related pain; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Recipients who are post-surgery with an anticipated prolonged recovery (greater than three months); or
 3. Recipients receiving palliative care; or
 4. Recipients residing in a long-term care facility; or
 5. Recipients receiving treatment for HIV/AIDS; or
 6. Prescriptions written by or in consultation with a pain specialist.
2. Prior Authorization Guidelines
 - a. Prior authorization approval will be for one year.
 - b. Prior Authorization forms are available at:

 3. CDC Guidance:
 - a. <http://www.cdc.gov/drugoverdose/prescribing/guideline.html>.
 4. Opioid Containing Cough Preparations
 - a. The recipient must be 18 years of age or older.
 - b. Prior authorization approval will be for six months.
 - c. Prior Authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>.
 - d. For references purposes, codeine and tramadol for children prior authorization criteria can also be found within this chapter in Section TTT.
 5. Opioids Prescribed to Under Age 18
 - a. Short Acting Opioids will be covered without PA for:
 1. Initial prescription of three days or less; and
 2. A total of 13 three-day prescriptions in any rolling 12-month period; and
 3. Prescriptions of 60 morphine milligram equivalents (MME) or less per day.
 - b. Recipients currently on chronic opioid medications will not be subject to the three-day requirement for an opioid(s) they have been receiving in the past 45 days.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- c. To exceed the number of three-day prescriptions, or to exceed the three-day limit, or to exceed the 60 MME or less per day:
 - 1. All of the following criteria must be met and documented:
 - a. The recipient has chronic pain or requires an extended opioid therapy and is under the supervision of a licensed prescriber; and
 - b. Pain cannot be controlled through the use of non-opioid therapy (acetaminophen, NSAIDs, antidepressants, anti-seizure medications, physical therapy, chiropractic treatment, etc.); and
 - c. The lowest effective dose is being prescribed; and
 - d. A pain contract is on file.
- d. Exceptions:
 - 1. Recipients with cancer/malignancy related pain, recipients who are post-surgery with an anticipated prolonged recovery (greater than three months), recipients residing in a long-term care facility, recipients receiving treatment for HIV/AIDS, hospice, palliative care or end-of-life care.
 - 2. Prescriptions written by or in consultation with a pain specialist.

 14. Zinbryta (daclizumab)
2. Both the following:
 - a. The recipient has previously received treatment with cladribine; and
 - b. The recipient has not already received the FDA-recommended lifetime limit of two treatment courses (or four treatment cycles total) of cladribine; and
 - b. The medication will not be used in combination with another disease-modifying therapy for MS.
2. Prior Authorization Guidelines
 - a. Prior authorization approval will be for one month.
- d. Ocrevus® (ocrelizumab)
 1. Approval will be given if all the following criteria are met and documented:
 - a. Recipient is at least 18 years of age (unless otherwise specified); and
 - b. Recipient has been screened for the presence of Hepatitis B virus (HBV) prior to initiating treatment and does not have active disease (i.e., positive HBsAg and anti-HBV tests); and
 - c. Recipient has had baseline serum immunoglobulins assessed; and
 2. Universal Criteria
 - a. Recipient will not receive live or live-attenuated vaccines while on therapy or within four weeks prior to initiation of treatment; and
 - b. Recipient does not have an active infection; and
 3. Multiple Sclerosis
 - a. Recipient must have a confirmed diagnosis of multiple sclerosis (MS) as documented by laboratory report (i.e., MRI); and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

b. Must be used as single agent therapy; and

1. Recipient has a diagnosis of relapsing form of MS [i.e., relapsing-remitting MS (RRMS), active secondary progressive disease (SPMS), or clinically isolated syndrome (CIS)]; or
2. Recipient has a diagnosis of primary progressive MS (PPMS); and
 - a. Recipient is less than 65 years; and
 - b. Recipient has an expanded disability status scale (EDSS) score of less than or equal to 6.5.

2. Recertification Request (the recipient must meet all criteria):

- a. Recipient continues to meet the universal and other indication-specific relevant criteria identified in section III; and
- b. Recipient has not received a dose of ocrelizumab within the past five months; and
- c. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: severe infusion reactions, severe infections, progressive multifocal leukoencephalopathy malignancy, hypogammaglobulinemia, immune-mediated colitis, etc.; and
- d. Continuous monitoring of response to therapy indicates a beneficial response [manifestations of MS disease activity include, but are not limited to, an increase in annualized relapse rate (ARR), development of new/worsening T2 hyperintensities, or enhancing lesions on brain/spinal MRI, and progression of sustained impairment as evidenced by expanded disability status scale (EDSS), timed 25-foot walk (T25-FW), 9-hole peg test (9-HPT)].
 1. Inadequate response, in those who have been adherent and receiving therapy for sufficient time to realize the full treatment effect, is defined as greater than or equal to one relapse, greater than or equal to two unequivocally new MRI-detected lesions, or increased disability on examination over a one-year period.
- e. PPMS
 1. Recipient continues to ambulatory, defined as an EDSS score of less than 7.5.

 - b. Secondary (congenital or acquired) hypogonadism; and
3. Recipient has two morning pre-treatment testosterone levels below the lower limit of the normal testosterone reference range of the individual laboratory used; and
4. Recipient does not have breast or prostate cancer, a palpable prostate nodule or induration, prostate-specific antigen greater than 4 ng/ml or severe lower urinary symptoms with an International Prostate Symptom Score (IPSS) greater than 19; and
5. Recipient does not have a hematocrit greater than 50%; and
6. Recipient does not have untreated severe obstructive sleep apnea; and
7. Recipient does not have uncontrolled or poorly controlled heart failure.

b. Diagnosis of Gender Dysphoria:

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is using the hormones to change their physical characteristics; and
 - b. Recipient is a female-to-male transsexual.

2. Xyosted™ (testosterone enanthate)

a. Approval will be given if the following criteria are met and documented:

1. Diagnosis of Hypogonadism (e.g., testicular hypofunction, male hypogonadism, ICD-10 E29.1); and
2. The recipient is male at birth; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

3. One of the following:

- a. Two pre-treatment serum total testosterone levels less than 300 ng/dL (< 10.4 nmol/L) or less than the reference range for the lab; or both of the following:
 1. Recipient has a condition that may cause altered sex hormone binding globulin (SHBG) (e.g., thyroid disorder, HIV, liver disorder, diabetes, obesity); and
 2. One pre-treatment calculated free or bioavailable testosterone level less than 5 ng/dL (<0.17 nmol/L) or less than the reference range for the lab; or
- b. Recipient has a history of one of the following: bilateral orchiectomy, panhypopituitarism or a genetic disorder known to cause hypogonadism (e.g., congenital anorchia, Klinefelter's syndrome).

b. Diagnosis of Gender Dysphoria

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is using the hormones to changes in their physical Characteristics; and
 - b. Recipient is a female-to-male transsexual

c. Prior Authorization Guidelines:

1. Prior authorization approval with a diagnosis of hypogonadism will be given for one year.
2. Prior authorization approval with a diagnosis of gender dysphoria will be given for six months for recipients new to testosterone therapy; or
 - a. Prior authorization approval will be given to recipients continuing testosterone therapy without a current authorization on file for 12 months.
3. Prior Authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>.

3. Oral Testosterone Products

a. Hypogonadism:

1. Approval will be given if the following criteria are met and documented:

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- a. The recipient is greater than 18 years of age; and
 - b. Recipient is male; and
 - c. Recipient has a diagnosis of primary hypogonadism or hypogonadotropic hypogonadism (congenital or acquired); and
 - d. Recipient has history of failure, contraindication, or intolerance to both testosterone cypionate and testosterone enanthate injection; and
 - e. Recipient has signs/symptoms consistent with hypogonadism (e.g., low libido, decreased morning erections, loss of body hair, low bone mineral density, gynecomastia, small testes); and
 - f. Recipient does not have “age-related hypogonadism” or another hypogonadal condition not associated with structural or genetic etiologies; and
 - g. Recipient has two morning pre-treatment testosterone levels below the lower limit of the normal testosterone reference range of the individual laboratory used (initial approval only); and
 - h. Recipient is only receiving one androgen or anabolic agent; and
 - i. Recipient does not have current or history of breast cancer; and
 - j. Recipient does not have a hematocrit greater than 50%; and
 - k. Recipient does not have uncontrolled hypertension or heart failure; and
 - l. Recipient does not have uncontrolled obstructive sleep apnea; and
 - m. Medication is prescribed by or in consultation with an endocrinologist or urologist.
- b. Diagnosis of Gender Dysphoria:
 - 1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is using the hormones to change their physical characteristics; and
 - b. Recipient is a female-to-male transsexual.
 - c. Recertification Request:
 - 1. Recipient must continue to meet above criteria; and

EE. Colchicine (Colcrys®)

Therapeutic Class: Antigout Agents

Last Reviewed by the DUR Board: January 28, 2016

Colchicine (Colcrys®) is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

Approval will be given if the following criteria are met and documented:

a. Colchicine Tablets

1. The recipient has a diagnosis of acute gout (does not require prophylaxis) and the recipient must meet all of the following:
 - a. The recipient is 16 years of age or older; and
 - b. The recipient has had an inadequate response, adverse reaction or contraindication to an NSAID (indomethacin, naproxen, ibuprofen, sulindac or ketoprofen); and
 - c. The recipient has had an inadequate response, adverse reaction or contraindication to a corticosteroid (oral or intra-articular).
2. For prophylaxis of chronic gout:
 - a. The recipient is 16 years of age or older and must meet one of the following:
 1. There is documentation that the recipient will be treated with colchicine in combination with allopurinol, Uloric® (febuxostat) or probenecid; or
 2. There is documentation that the recipient will be treated with colchicine monotherapy and the recipient must meet all of the following:
 - a. The recipient has had an inadequate response to allopurinol at a dose of 600 mg/day for at least two weeks or had an adverse reaction or contraindication to allopurinol; and
 - b. The recipient has had an inadequate response to Uloric® (febuxostat) at a dose of 80 mg/day for at least two weeks or has had an adverse reaction or contraindication to Uloric® (febuxostat).

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

3. For Familial Mediterranean Fever (FMF):
 - a. The recipient is four years of age or older.
4. Requests exceeding the quantity limit may be approved for colchicine tablets if all of the following are met and documented:
 - a. The recipient is 12 years of age or older; and
 - b. The recipient has a diagnosis of FMF; and
 - c. The recipient's dose is ≤ 2.4 mg daily (120 tablets/30 days); and
 - d. Medical necessity must be provided and documented in the recipient's medical record that the recipient had an inadequate response to 1.8 mg daily (90 tablets/30 days).
- b. Colchicine Capsules
 1. For Prophylaxis of chronic gout:
 - a. The recipient is 18 years of age or older and the recipient must meet one of the following:
 1. There is documentation that the recipient will be treated with colchicine in combination with allopurinol, Uloric® (febuxostat) or probenecid; or
 2. There is documentation that the recipient will be treated with colchicine monotherapy, and the recipient must meet all of the following:
 - a. The recipient has had an inadequate response to allopurinol at a dose of 600 mg/day for at least two weeks or had an adverse reaction or contraindication to allopurinol; and
 - b. The recipient has had an inadequate response to Uloric® (febuxostat) at a dose of 80 mg/day for at least two weeks or has had an adverse reaction or contraindication to Uloric® (febuxostat).
 2. Prior authorization approval will be given based on diagnosis.
 1. For FMF and chronic gout: one year.
 2. For acute gout: two months.

FF. Thrombin Inhibitors

Therapeutic Class: Thrombin Inhibitors

Last Reviewed by the DUR Board: January 22, 2015

Thrombin Inhibitors are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

Approval will be given if the following criteria are met and documented:

- a. A diagnosis code associated with the FDA approved indication(s) is documented on the prescription and transmitted on the claim; and
- b. There are no contraindications to prescribing this medication; or
- c. An approved Prior Authorization documenting the recipient meeting all of the criteria above (1.) (a. and b.).

2. Prior Authorization Guidelines

- a. Prior authorization approval will be for up to one year.
- b. Prior Authorization forms are available at:

GG. Antihemophilia Agents

Therapeutic Class: Antihemophilia Agents

Last Reviewed by the DUR Board: July 26, 2018

Antihemophilia Agents are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

Authorization will be given if the following criteria are met and documented:

- a. The medication being prescribed must be for an FDA approved indication; or
- b. One of the following:
 1. The diagnosis is supported as a use of American Hospital Formulary Service Drug Information (AHFS DI); or
 2. The diagnosis is supported in the FDA Uses/Non-FDA Uses section in DRUGDEX Evaluation with a Strength of Recommendation rating of IIb or better (see DRUGDEX Strength of Recommendation table); or
 3. Both of the following:
 - a. Diagnosis is listed in the FDA Uses/Non-FDA Uses section in DRUGDEX Evaluation with a Strength of Recommendation rating of III or Class Indeterminant (see DRUGDEX Strength of Recommendation table); and
 - b. Efficacy is rated as “effective” or “evidence favors efficacy” (see DRUGDEX Efficacy Rating and Prior Authorization Approval Status table); or
 4. Diagnosis is supported in any other section of DRUGDEX; or
 5. The use is supported by clinical research in two articles from major peer reviewed medical journals that present data supporting the proposed off-label use or uses as generally safe and effective unless there is clear and convincing contradictory evidence presented in a major peer-reviewed medical journal; and
 - a. One of the following:
 1. The dosage quantity/duration of the medication is reasonably safe and effective based on information contained in the FDA approved labeling, peer-reviewed

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

medical literature or accepted standards of medical practice;
or

2. The dosage/quantity/duration of the medication is reasonably safe and effective based on one of the following compendia:

- a. AHFS Compendium;
- b. Thomson Reuters (Healthcare) Micromedex/ DRUGDEX (not Drug Points) Compendium;
- c. Elsevier Gold Standard's Clinical Pharmacology Compendium;
- d. National Comprehensive Cancer Network Drugs and Biologics Compendium; and

- c. The dispensing provider will monitor the amount of product a recipient has left to avoid over-stock; and
- d. The prescriber is a specialist in treating hemophilia; and
- e. A new prior authorization will be required for any dose adjustment in excess of 5% (increase or decrease).

2. Prior Authorization Guidelines

- a. Prior authorization approval will be for 12 months.
- b. Prior Authorization forms are available at:

HH. Anti-Hepatitis Agents

Therapeutic Class: Anti-Hepatitis Agents

Last Reviewed by the DUR Board: April 22, 2021

Anti-Hepatitis Agents are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Epclusa® (sofosbuvir and velpatasvir)
 - a. Approval will be given if all the following criteria are met and documented:
 1. The recipient is not receiving Epclusa® (sofosbuvir and velpatasvir) in combination with another HCV direct acting antiviral agent (e.g., Sovaldi®, Olysio®); and
 2. The medication must be prescribed by or in consultation with one of the following:
 - a. Hepatologist
 - b. Gastroenterologist
 - c. Infectious Disease Specialist
 - d. HIV Specialist (certified through the American Academy of HIV Medicine)
 - b. Genotype 1, 2, 3, 4, 5 or 6, without decompensated liver disease
 1. The recipient has a documented diagnosis of chronic hepatitis C virus genotype 1, 2, 3, 4, 5 or 6 (submission of medical records e.g., chart notes, laboratory values); and
 2. The recipient must not have decompensated liver disease; and
 3. Epclusa® must be used alone; and
 4. The request is FDA approved for recipient weight and age; and
 5. Prior authorization approval will be for 12 weeks.
 - c. Genotype 1, 2, 3, 4, 5 or 6 with decompensated liver disease
 1. The recipient has a documented diagnosis of chronic hepatitis C virus genotype 1, 2, 3, 4, 5 or 6 (submission of medical records e.g., chart notes, laboratory values); and

 4. The request is FDA approved for recipient weight and age; and
 5. Prior authorization approval will be for 24 weeks.
- d. Genotype 1, 2, 3, 4, 5 or 6 Ribavirin intolerance/ineligible or prior Sovaldi® (sofosbuvir) or NS5A-based treatment failure.
1. The recipient has a documented diagnosis of chronic hepatitis C virus genotype 1, 2, 3, 4, 5 or 6 (submission of medical records e.g., chart notes, laboratory values); and
 2. The recipient has decompensated liver disease; and
 - a. One of the following:
 1. The recipient is Ribavirin intolerant or ineligible; or
 2. Both of the following:
 - a. The recipient has had prior failure (defined as viral relapse, breakthrough while on therapy, or is a non-responder to therapy) to Sovaldi® or NS5A-based treatment; and
 - b. Epclusa® is used in combination with Ribavirin®.
 3. Prior authorization approval will be for 24 weeks.
2. Harvoni® (ledipasvir/sofosbuvir)
- a. Approval will be given if the following criteria are met and documented:
 1. The recipient is not receiving Harvoni® in combination with another HCV direct acting antiviral agent (e.g., Sovaldi®, Olysio®); and
 2. The medication must be prescribed by or in consultation with one of the following:
 - a. Hepatologist
 - b. Gastroenterologist
 - c. Infectious Disease Specialist

MEDICAID SERVICES MANUAL

- b. The recipient is 12 to 17 years of age; or both of the following:
 - 1. The recipient weighs at least 35 kg; and
 - 2. The recipient is less than 12 years of age; and
- 4. The medication is used in combination with Ribavirin; and
- 5. The recipient is without decompensated liver disease (e.g., Child-Pugh class B or C); and
- 6. The recipient has not experienced failure with a previous treatment regimen that includes Sovaldi®; and
- 7. Prior authorization approval will be for 12 weeks.
- e. Genotype 1, without cirrhosis
 - 1. The recipient has a documented diagnosis of chronic hepatitis C genotype 1 (submission of medical records e.g., chart notes, laboratory values); and
 - 2. The medication is used in combination with Olysio® (simeprevir); and
 - 3. The recipient is without cirrhosis; and
 - 4. The recipient is without decompensated liver disease (e.g., Child-Pugh class B or C); and
 - 5. The recipient has not experienced failure with a previous treatment regimen that includes Olysio® or other HCV NS3/4A protease inhibitors (e.g., Incivek® (telaprevir), Victrelis® (boceprevir)); and
 - 6. Prior authorization approval will be for 12 weeks.
- f. Genotype 1, with cirrhosis
 - 1. The recipient has a documented diagnosis of chronic hepatitis C genotype 1 (submission of medical records e.g., chart notes, laboratory values); and
 - 2. The medication is used in combination with Olysio® (simeprevir); and
 - 3. The recipient has cirrhosis; and
 - 4. The recipient is without decompensated liver disease (e.g., Child-Pugh class B or C); and
 - 5. The recipient has not experienced failure with a previous treatment regimen that includes Olysio® or other HCV NS3/4A protease inhibitors (e.g., Incivek® (telaprevir), Victrelis® (boceprevir)); and

6. Prior authorization approval will be for 12 weeks.

g. Genotype 1

1. The recipient has a documented diagnosis of chronic hepatitis C genotype 1 (submission of medical records e.g., chart notes, laboratory values); and
2. The medication is used in combination with Daklinza® (daclatasvir); and
3. The recipient has not experienced failure with a previous HCV NS5A treatment regimen (e.g., Daklinza® (daclatasvir)); and
4. One of the following:
 - a. The recipient is without decompensated cirrhosis and is not a liver transplant recipient; or
 - b. Both of the following:
 1. The recipient has decompensated cirrhosis and/or is a liver transplant recipient; and
 2. The medication is used in combination with Ribavirin.
5. Prior authorization approval will be for 12 weeks.

h. Genotype 3

1. The recipient has a documented diagnosis of chronic hepatitis C genotype 3 (submission of medical records e.g., chart notes, laboratory values); and
2. The medication is used in combination with Daklinza® (daclatasvir); and
3. The recipient has not experienced failure with a previous HCV NS5A treatment regimen (e.g., Daklinza® (daclatasvir)); and
4. One of the following:
 - a. The recipient is without cirrhosis and is not a liver transplant recipient; or
 - b. Both of the following:
 1. The recipient has cirrhosis (compensated or decompensated) and/or is a liver transplant recipient; and
 2. The medication is used in combination with Ribavirin.
5. Prior authorization approval will be for 12 weeks.

II. Daliresp® (roflumilast)

Therapeutic Class: Phosphodiesterase-4 Inhibitors.

Last Reviewed by the DUR Board: October 17, 2019

Daliresp® (roflumilast) is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

Authorization will be given if the following criteria are met and documented:

- a. The recipient has experienced an inadequate response, adverse event or has a contraindication to a long-acting anticholinergic agent;
- b. The recipient has experienced an inadequate response, adverse event or has a contraindication to a long-acting beta (β) agonist;
- c. The recipient has experienced an inadequate response, adverse event or has a contraindication to an inhaled corticosteroid;
- d. The recipient has a diagnosis of Chronic Obstructive Pulmonary Disease (COPD); and
- e. The recipient has a history of COPD exacerbations.

2. Contraindication

- a. Daliresp (roflumilast) may not be approved for a recipient with a diagnosis of moderate (Child-Pugh B) or severe (Child-Pugh C) hepatic impairment.

3. Prior Authorization Guidelines

- a. Prior authorization approval will be for one year.
- b. Prior Authorization forms are available at:

MM. Gimoti® (metoclopramide)

Therapeutic Class: Gastrointestinal Prokinetic Agents

Last Reviewed by the DUR Board: October 26, 2021

Gastrointestinal Prokinetic Agents are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if all the following criteria are met and documented:
 - a. The recipient has a diagnosis of acute diabetic gastroparesis; and
 - b. The recipient is 18 years of age or older; and
 - c. The recipient does not have any of the following:
 1. History of signs or symptoms of tardive dyskinesia (TD); or
 2. History of a dystonic reaction to metoclopramide; or
 3. Known or suspected circumstances where stimulation of gastrointestinal (GI) motility could be dangerous (e.g., GI hemorrhage, mechanical obstruction, or perforation); or
 4. Known or suspected pheochromocytoma or other catecholamine-releasing paraganglioma; or
 5. Diagnosis of epilepsy or any other seizure disorder; or
 6. Hypersensitivity to metoclopramide (e.g., angioedema, bronchospasm); or
 7. Moderate or severe renal impairment (creatinine clearance [CrCl] < 60 mL/minute); or
 8. Moderate or severe hepatic impairment (Child-Pugh B or C); and
 - d. One of the following:
 1. The recipient has had an adequate (e.g., 2-4 week) trial and failure of oral (e.g., tablet, solution, orally disintegrating tablet) or injectable (e.g., intramuscular) metoclopramide; or
 2. The recipient is NOT a candidate for oral metoclopramide (e.g., demonstrated or documented erratic absorption of oral medications)
2. Recertification Request:
 - a. Recipient continues to meet all initial authorization criteria; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

NN. Platelet Inhibitors

Therapeutic Class: Platelet Inhibitors

Last Reviewed by the DUR Board: April 22, 2021

Platelet Inhibitors are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Authorization will be given if the following criteria are met and documented:
 - a. Brilinta® (ticagrelor)
 1. The recipient has a diagnosis of Acute Coronary Syndrome (ACS) (unstable angina, non-ST elevation myocardial infarction or ST elevation myocardial infarction); and
 2. The recipient does not have an active pathological bleed or history of intracranial hemorrhage; and
 3. The recipient will be receiving concomitant treatment with aspirin in a dose of less than 100 mg/daily; and
 4. One of the following:
 - a. The recipient has been started and stabilized on the requested medication; or
 - b. The recipient has experienced an adverse event with or has an allergy or contraindication to clopidogrel; or
 - c. Another clinically appropriate rationale is provided for why clopidogrel cannot be used.
 - b. Effient® (prasugrel)
 1. The recipient has a diagnosis of ACS (unstable angina, non-ST elevation myocardial infarction or ST elevation myocardial infarction); and
 2. The recipient does not have an active pathological bleed or history of transient ischemic attack or cerebral vascular accident (CVA); and
 3. The recipient will be receiving concomitant treatment with aspirin in a dose of less than 100 mg/daily; and
 4. The recipient has a history of percutaneous coronary intervention; and
 5. One of the following:

OO. Osteoporosis Agents

Therapeutic Class: Bone Resorption Inhibitors (Osteoporosis Agents)

Last Reviewed by DUR Board: **January 19, 2023**

Osteoporosis agents are subject to prior authorization based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board.

1. Coverage and Limitations

a. Evenity® (romosozumab-aqqg)

1. Approval will be given if all criteria are met and documented:

a. The recipient has a diagnosis of postmenopausal osteoporosis or osteopenia; and

b. One of the following:

1. Both the following:

a. The recipient's Bone Mineral Density (BMD) T-score is -2.5 or lower in the lumbar spine, femoral neck, total hip, or radius (one-third radius site); and

b. One of the following:

1. The recipient has documented history of low-trauma fracture of the hip, spine, proximal humerus, pelvis, or distal forearm; or

2. The recipient has documented trial and failure, contraindication, or intolerance to one anti-resorptive treatment (e.g., alendronate, risedronate, zoledronic acid, Prolia® [denosumab]); or

c. Both the following:

1. The recipient has a BMD T-score between -1.0 and -2.5 in the lumbar spine, femoral neck, total hip, or radius (one-third radius site); and

2. One of the following:

a. The recipient has a documented history of low-trauma fracture of the

MEDICAID SERVICES MANUAL

hip, spine, proximal humerus, pelvis, or distal forearm; or

b. Both the following:

1. The recipient has a documented trial and failure, contraindication, or intolerance to one anti-resorptive treatment (e.g., alendronate, risedronate, zoledronic acid, Prolia® [denosumab]); and

2. One of the following FRAX (Fracture Risk Assessment Tool) 10-year probabilities:

a. The recipient has a major osteoporotic fracture at 20% or more in the U.S., or the country-specific threshold in other countries or regions.

b. The recipient has a hip fracture at 3% or more in the U.S., or the country-specific threshold in other countries or regions; and

c. The recipient has a documented trial and failure, contraindication, or intolerance to one of the following:

1. Forteo® (teriparatide)

2. Tymlos® (abaloparatide); and

d. Treatment duration of Evenity® (romosozumab-aqqg) has not exceeded a total of 12 months during the recipient's lifetime.

2. Prior Authorization Guidelines:

a. Prior authorization approval will be given for 12 months.

- b. Prior Authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>.
 - b. Prolia® (denosumab)
 - 1. Criteria for Physician Administered Drugs (PAD)
 - a. Approval will be given if the following criteria are met and documented:
 - 1. Recipient must be supplementing with 1,000 mg of calcium and at least 400 IU of vitamin D daily; and
 - 2. Recipient must not have hypocalcemia; and
 - 3. Coverage is provided in the following conditions:
 - a. Recipient is at least 18 years of age; and
 - b. Recipient must be at a high risk for fracture; and
 - c. Pregnancy ruled out prior to starting therapy in women of childbearing potential; and
 - 2. For bone loss in men receiving androgen deprivation therapy for nonmetastatic prostate cancer.
 - a. Approval will be given if all criteria is met and documented:
 - 1. The recipient has a diagnosis of nonmetastatic prostate cancer; and
 - 2. The recipient is undergoing androgen deprivation therapy with one of the following:
 - a. Luteinizing hormone-releasing hormone (LHRH)/gonadotropin releasing hormone (GnRH) agonist [e.g., Eligard/Lupron (leuprolide), Trelstar® (triptorelin), Vantas (histrelin), and Zoladex® (goserelin)]; or
 - b. Bilateral orchiectomy (i.e., surgical castration); and
 - 3. One of the following:
 - a. The recipient is 70 years of age or older; or
 - b. Both the following:
 - 1. The recipient is less than 70 years of age; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- a. One of the following:
 1. BMD scan T-score is less than -1.0 (1.0 standard deviation or greater below the mean for young adults); or
 2. Documented history of one of the following resulting from minimal trauma:
 - a. Vertebral compression fracture
 - b. Fracture of the hip
 - c. Fracture of the distal radius
 - d. Fracture of the pelvis
 - e. Fracture of the proximal humerus; and
- b. Recertification Request (the recipient must meet all criteria):
 1. The recipient is undergoing androgen deprivation therapy with one of the following:
 - a. Luteinizing hormone-releasing hormone (LHRH)/gonadotropin releasing hormone (GnRH) agonist [e.g., Eligard/Lupron (leuprolide), Trelstar® (triptorelin), Vantas (histrelin), and Zoladex® (goserelin)]; or
 - b. Bilateral orchiectomy (i.e., surgical castration); and
 2. The recipient has no evidence of metastases; and
 3. Documentation that the recipient is benefiting from therapy (e.g., improved or stabilized BMD, no new fractures, improved biochemical markers, etc.)
- c. Prior Authorization Guidelines:
 1. Prior authorization approval will be for 12 months.
 2. Recertification approval will be for 12 months.

4. For Postmenopausal Osteoporosis or Osteopenia
 - a. Criteria for Physician Administered Drugs (PAD)
 1. Approval will be given if the following criteria are met and documented:
 - a. Recipient must be a woman; and
 - b. Recipient has a documented diagnosis of osteoporosis indicated by one or more of the following:
 1. Hip/femur DXA (femoral neck or total hip) or lumbar spine T-score less than or equal to negative two and a half and/or forearm DXA at the 33% (one-third) radius site; or
 2. T-score less than or equal to negative one or low bone mass and a history of fragility fracture to the hip or spine; or
 3. T-score between negative one and negative two and a half with a FRAX 10-year probability for major fracture greater than or equal to 20% or hip fracture greater than or equal to 3%; and
 - c. Documented treatment failure or ineffective response to a minimum (12) month trial on previous therapy with bisphosphonates (oral or IV) such as alendronate, risedronate, ibandronate, or zoledronic acid; or
 - d. Recipient has a documented contraindication or intolerance to both oral bisphosphonates and intravenous (IV) bisphosphonates such as alendronate, risedronate, ibandronate, or zoledronic acid.
 - b. Recertification Request:
 1. Documentation that indicates the recipient is benefiting from therapy (e.g., improved or stabilized BMD, no new fractures,

DIVISION OF HEALTH CARE FINANCING AND POLICY

QQ. Spravato™ (esketamine)

Therapeutic Class: Miscellaneous Anti-Depressant

Last Reviewed by the DUR Board: July 25, 2019

Spravato™ (esketamine) is subject to prior authorization and quantity limits based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

- a. Initial approval will be given if the following criteria are met and documented:
 1. The recipient is 18 years of age or older; and
 2. Recipient must have a diagnosis of treatment resistant depression as evidence of failure of two antidepressants; and
 3. Medication must be administered under the direct supervision of a healthcare provider with post-administration observation; and
 4. Treatment must be in conjunction with an oral antidepressant; and
 5. The medication must be prescribed by or in consultation with a psychiatrist; and
 6. The recipient must not have an aneurism or AV (arteriovenous) malformation.
- b. Approval will not be given for recipients who are currently pregnant or lactating and breastfeeding.

2. Recertification Request:

- a. In addition to the prior authorization criteria listed above (initial approval), the recipient must also have a positive clinical response to the medication treatment.

3. Prior Authorization Guidelines

- a. Initial prior authorization approval will be given for four weeks.
- b. Recertification authorization approval will be given for six months.

WW. Functional Gastrointestinal Disorder Agents

Therapeutic Class: Chronic Idiopathic Constipation (CIC) Agents, Irritable-Bowel Syndrome Agents, Opioid-Induced Constipation Agents

Last Reviewed by the DUR Board: January 23, 2020

Functional Gastrointestinal Disorder Agents are subject to prior authorization and quantity limits based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Chronic Idiopathic Constipation (CIC) Agents

a. Approval will be given if all the following criteria are met and documented:

1. The requested drug must be FDA approved for the recipient's age; and
2. Must have a diagnosis of CIC; and
3. Recipient has trial and failure, contraindication or intolerance to either lactulose or polyethylene glycol (Miralax); and
4. Recipient has trial and failure, contraindication or intolerance to at least one stimulant laxative, such as sennosides (Ex-lax, Senokot), bisacodyl (Dulcolax) or cascara sagrada; and
5. The maximum allowable dose for CIC indication are as follows:
 - a. Linzess® (linaclotide): 145 mcg, once daily
 - b. Amitiza® (lubiprostone): 24 mcg, twice daily
 - c. Motegrity® (prucalopride): 2mg, once daily
 - d. Trulance® (plecanatide): 2mg, once daily

b. Prior Authorization Guidelines

1. Prior authorization approval will be for one year.
2. Prior Authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>

2. Irritable-Bowel Syndrome Agents

a. Coverage and Limitations

1. Approval will be given if the following criteria are met and documented:
 - a. The recipient is 18 years of age or older; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- b. The requested agent is being prescribed based on FDA approved guidelines; and
 1. For requests for a diagnosis of Irritable-Bowel Syndrome with Constipation (IBS-C):
 - a. For requests for Amitiza® (lubiprostone), the recipient must be female.
 - b. The requested dose is appropriate based on indication and age.
 1. Linzess® (linaclotide): 290 µg daily.
 2. Amitiza® (lubiprostone): 16 µg daily.
 3. Trulance® (plecanatide): 3 µg daily.
 2. For requests for a diagnosis of Irritable-Bowel Syndrome with Diarrhea (IBS-D):
 - a. The medication is being prescribed by or in consultation with a gastroenterologist; and
 - b. The requested dose is appropriate based on indication and age.
 1. Lotronex® (alosetron): 0.5 mg twice daily or 1 mg twice daily.
 2. Viberzi® (eluxadoline): 75 mg twice daily or 100 mg twice daily.
 3. Xifaxan® (rifaximin): 550 mg three times a day for 14 days.
- b. Prior Authorization Guidelines
 1. Prior authorization approval will be given for an appropriate length of therapy based on the requested agent and diagnosis, not to exceed one year.
 2. Prior Authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>
- c. Zelnorm® (tegaserod)
 1. Approval will be given if all the following criteria are met and documented:
 - a. The recipient has a diagnosis of IBS-C; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

- b. The recipient is female; and
 - c. The recipient is less than 65 years of age; and
 - d. The recipient has had trial and failure, contraindication, or intolerance to one of the following:
 - 1. Lactulose; or
 - 2. Polyethylene glycol.
- 2. Reauthorization Request (the recipient must meet all criteria):
 - a. Documentation of positive clinical response to Zelnorm® therapy.
- 3. Prior Authorization Guidelines
 - a. Initial prior authorization approval will be for six weeks.
 - b. Recertification approval will be 12 months.
 - c. Prior authorization forms are available at:
<http://www.medicaid.nv.gov/providers/rx/rxforms.aspx>.
- 3. Opioid-Induced Constipation Agents
 - a. Approval will be given if all the following criteria are met and documented:
 - 1. The recipient is 18 years of age or older; and
 - 2. The requested medication is being used for an FDA approved indication; and
 - 3. The recipient must meet the following criteria:
 - a. There is documentation in the recipient's medical record of an inadequate response, adverse reaction or contraindication to one agent from three of the four traditional laxative drug classes:
 - 1. Bulk forming laxatives;
 - 2. Osmotic laxatives;
 - 3. Saline laxatives;
 - 4. Stimulant laxatives.

YY. GnRH Analogs

Therapeutic Class: GnRH Analogs

Last Reviewed by the DUR Board: April 26, 2018

GnRH Analogs are subject to prior authorization and quantity limits based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

- a. This prior authorization criteria only applies to recipients who are under 18 years of age. Approval of Lupron® (leuprolide) will be given if all the following criteria, per individual diagnosis, are met and documented:
 1. The recipient has a diagnosis of idiopathic or neurogenic central precocious puberty (CPP), and
 - a. The requested dose and frequency is based on FDA-approved guidelines; and
 - b. The medication is being prescribed by or in consultation with a pediatric endocrinologist; and
 - c. There is an onset of secondary sex characteristics before age eight years (females) or nine years (males); and
 - d. The recipient is currently less than 11 years of age (females) or 12 years of age (males).
 2. The recipient has a diagnosis of gender dysphoria, formerly known as gender identity disorder; and
 - a. The medication is being prescribed for suppression of puberty; and
 - b. The provider indicates a demonstrable knowledge what gonadotropins medically can and cannot do and their social benefits and risks; and
 - c. One of the following:
 1. A documented real-life experience (living as the other gender) for at least three months prior to the administration of gonadotropin; or
 2. A period of psychotherapy for a duration specified by the mental health professional after the initial evaluation (usually a minimum of three months).

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- d. The member must meet the definition of gender dysphoria (see definition below):
 1. Gender Disphoria:
 - a. A strong and persistent cross-gender identification (not merely a desire for any perceived cultural advantages of being the other sex).
 - b. Persistent discomfort with his or her sex or sense of inappropriateness in the gender role of that sex.
 - c. The disturbance is not concurrent with a physical intersex condition.
 - d. The disturbance causes clinically significant distress or impairment in social, occupational or other important areas of functioning.
 - e. The transsexual identity has been present persistently for at least two years.
 - f. The disorder is not a symptom of another mental disorder or a chromosomal abnormality.
3. The recipient has a diagnosis of endometriosis, and
 - a. The requested dose and frequency is based on FDA-approved guidelines; and
 - b. The recipient has had an inadequate response, adverse reaction or contraindication to an NSAID; and
 - c. The recipient has had an inadequate response, adverse reaction or contraindication to a hormonal contraceptive.
4. The recipient has a diagnosis of uterine leiomyomata (fibroids), and
 - a. The requested dose and frequency is based on FDA-approved guidelines; and
 - b. The recipient is symptomatic; and
 - c. Documentation has been submitted of the anticipated surgery date (or notation that surgery is planned once the fibroids shrink) or clinical rationale why surgical intervention is not required.

DIVISION OF HEALTH CARE FINANCING AND POLICY

FFF. Long-Acting Injectable (LAI) Antipsychotics

Therapeutic Class: Second Generation (Atypical) Antipsychotic

Last Reviewed by the DUR Board: July 28, 2022

LAI antipsychotic drugs are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. General for all LAIs:
 - a. Treatment-naïve patients require documentation confirming tolerance to the oral formulation prior to transitioning to the LAI.
2. Invega Trinza® (paliperidone palmitate)
 - a. Approval will be given if the following criteria are met and documented.
 1. The recipient has a diagnosis of schizophrenia; and
 2. The recipient has been stabilized on once-monthly paliperidone palmitate injection (Invega Sustenna®) for at least four months with the two most recent doses of the once-monthly injection being the same strength; and
 3. The recipient is 18 years of age or older; and
 4. The requested dose is one injection every three months.
 - b. Prior Authorization Guidelines
 1. Prior authorization approvals will be for 12 months.
3. Invega Hafyera® (paliperidone palmitate)
 - a. Approval will be given if the following criteria are met and documented.
 1. The recipient has a diagnosis of schizophrenia; and
 2. The recipient has been stabilized on once-monthly paliperidone palmitate extended-release (PP1M) injectable suspension (Invega Sustenna®) for at least four months, the two most recent doses of the once-monthly injection being the same strength or one dose of three-month IM paliperidone (Invega Trinza®); and
 3. Patient is 18 years of age or older; and
 4. The requested dose is one injection every six months.

GGG. Medications for Recipients on Hospice

Last Reviewed by the DUR Board: January 27, 2017

Previously reviewed: January 28, 2016

Medications for recipients on hospice are subject to prior authorization and quantity limits based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

a. For recipients 21 years of age or older:

1. The prescriber has verified the recipient is enrolled in the hospice program; and
2. The requested medication is not being used to treat or manage symptoms of the terminal hospice diagnosis; and
3. The requested medication is not being used for palliative care; and
4. The requested medication is unrelated to the terminal hospice diagnosis and is medically necessary to treat the recipient; and
5. The requested medication is not providing a curative or long-term prophylactic therapy.

b. For recipients 20 years of age or younger:

1. The prescriber has verified the recipient is enrolled in a hospice program; and
2. The requested medication is not being used to treat or manage symptoms of the terminal hospice diagnosis; and
3. The requested medication is not being used for palliative care.
4. Medically necessary curative medications for this age group are covered by the DHCFP pursuant to Sections 1905(o)(1) and 2110(a)(23) of the SSA.

2. Prior Authorization Guidelines

- a. Prior authorization approval will be for three months.
- b. Prior Authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>

HHH. Ileal Bile Acid Transporter (IBAT) Inhibitor (D7F))

Therapeutic Drug Class: Ileal bile acid transporter (IBAT) inhibitor (D7F)

Last Reviewed by the DUR Board: July 28, 2022

Ileal bile acid transporter (IBAT) inhibitor (D7F) drugs are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Bylvay® (odevixibat)

a. Approval will be given if the following criteria are met and documented:

1. Recipient is three months of age or older; and
2. Recipient is diagnosed with progressive familial intrahepatic cholestasis (PFIC) type 1 or type 2, confirmed by a genetic test; and
3. Recipient has elevated serum bile acid concentration; and
4. Recipient experiences persistent moderate to severe pruritus; and
5. Recipient does not have any of the following:
 - a. Positive test for the ABCB11 gene variant that predicts complete absence of the bile salt export pump (BSEP) protein; and
 - b. Prior hepatic decompensation event; and
 - c. Another concomitant liver disease; and
 - d. An international normalized ratio (INR) greater than 1.4; and
 - e. Significant portal hypertension; and
 - f. An alanine aminotransferase (ALT) or total bilirubin (TB) level more than 10 times the upper limit of normal (ULN); and
 - g. Medical history or ongoing chronic diarrhea; and
 - h. Decompensated cirrhosis; and
 - i. Significant portal hypertension; and
6. Bylvay® is prescribed by or in consultation with a specialist (e.g. gastroenterologist, hepatologist, dermatologist).

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

b. Recertification Request:

1. Recipient has experienced a reduction in serum bile acids from baseline; and
2. Recipient must continue to meet above criteria, except for the initial serum bile acid approval criteria; and
3. Recipient must experience improvement in pruritus; and
4. Recipient has not experienced any treatment-restricting adverse effects (e.g., persistent diarrhea; persistent fat-soluble vitamin deficiency despite vitamin A,D,E,K supplementation; elevated liver function tests [alanine aminotransferase (ALT), total bilirubin (TB), direct bilirubin (DB)]); and
5. Recipient has not developed decompensated cirrhosis; and
6. Recipient has not developed significant portal hypertension

c. Prior Authorization Guidelines:

1. Prior authorization approval will be given for 12 months

2. Livmarli® (maralixibat)

a. Approval will be given if all the following criteria are met and documented:

1. Recipient is one year of age or older; and
2. Recipient is diagnosed with Alagille syndrome; and
3. Recipient experiences persistent moderate to severe pruritus; and
4. Recipient does not have any of the following:
 - a. Chronic diarrhea requiring ongoing intravenous fluid or nutritional intervention; and
 - b. Prior hepatic decompensation event; and
 - c. Significant portal hypertension; and
 - d. Decompensated cirrhosis; and
 - e. Another concomitant liver disease; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

III. Hetlioz® (tasimelteon)

Therapeutic Class: Sedative Hypnotic

Last Reviewed by the DUR Board: April 28, 2022

Hetlioz® (tasimelteon) is subject to prior authorization and quantity limits based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

2. Coverage and Limitations

a. For treatment of Non-24-Hour Sleep-Wake Disorder (Non-24).

1. Approval will be given if all following criteria are met and documented:

- a. The recipient has a diagnosis of Non-24 disorder (also known as free-running disorder, free-running or non-entrained type circadian rhythm sleep disorder, or hypernycthemeral syndrome); and
- b. The medication is being prescribed by or in consultation with a sleep specialist; and
- c. The recipient had an adverse reaction, contraindication, or an inadequate response (after at least three months of therapy) to a therapeutic dose of melatonin.

2. Recertification Request:

- a. Documentation of positive clinical response to therapy.

3. Prior Authorization Guidelines:

- a. Initial prior authorization will be approved for six months.
- b. Recertification will be approved for 12 months.

b. For the treatment for nighttime sleep disturbances in Smith-Magenis Syndrome (SMS).

1. Approval will be given if all criteria are met and documented:

- a. The recipient has a diagnosis of SMS; and
- b. The recipient is at least 16 years of age and older (3 through 15 years of age for LQ suspension); and
- c. The recipient is experiencing nighttime sleep disturbances (i.e., difficulty falling asleep, frequent nighttime waking and early waking); and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- d. Prescribed by a neurologist or a specialist in sleep disorder; and
 - e. The recipient had an adverse reaction, contraindication, or an inadequate response (after at least three months of therapy) to a therapeutic dose of melatonin.
2. Recertification Request:
- a. Documentation of positive clinical response to therapy (i.e., improvement in nighttime total sleep time, improvement in nighttime sleep quality).
3. Prior Authorization Guidelines:
- a. Initial Prior Authorization will be approved after six months.
 - b. Recertification will be approved after 12 months.

Last Reviewed by the DUR Board: April 28, 2022

Vuity® (pilocarpine) 1.25% Ophthalmic Solution is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if the following criteria are met and documented:
 - a. The recipient has a diagnosis of presbyopia; and
 - b. The medication prescribed by or in consultation with an ophthalmologist or optometrist; and
 - c. The recipient is unable to use corrective lenses (e.g., eyeglasses or contact lenses) confirmed by medical records (e.g., chart notes); and
 - d. Vuity will not be prescribed concurrently with any ophthalmic pilocarpine formulations.
2. Recertification Request:
 - a. Documentation or positive clinical response to therapy (e.g., improvement in near vision in low light conditions without loss of distance vision); and
 - b. Prescribed by or in consultation with an ophthalmologist or optometrist.
3. Prior Authorization Guidelines:
 - a. Initial authorization will be approved for one month.
 - b. Recertification will be approved for six months.

RRR. Livtency® (maribravir)

Therapeutic Drug Class: Antivirals

Last Reviewed by DUR Board: October 20, 2022

Livtency® (maribravir) are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is greater than or equal to 12 years of age; and
 - b. Recipient must weigh greater than 35 kilograms (kg); and
 - c. Recipient of a hematopoietic stem cell or solid organ transplant; and
 - d. Recipient has documented cytomegalovirus (CMV) infection in whole blood or plasma (screening value greater than or equal to 2,730 IU/mL in whole blood or greater than or equal to 910 IU/mL in plasma) in two consecutive assessments separated by greater than or equal to one day; and
 - e. Recipient has current CMV infection that is refractory (documented failure to achieve greater than 1 log₁₀ decrease in CMV deoxyribonucleic acid [DNA] level in whole blood or plasma after greater than or equal to 14 days treatment) to anti-CMV treatment agents (ganciclovir, valganciclovir, cidofovir, or foscarnet), even with documented genetic mutations associated with resistance; and
 - f. Maribravir will not be coadministered with ganciclovir or valganciclovir; and
 - g. Recipient will be monitored for clinically important drug interactions that could results in decreased therapeutic effect of maribravir.
2. Recertification Request:
 - a. Recipient must continue to meet the above criteria; and
 - b. Recipient must have disease improvement and/or stabilization or improvement in the slope of decline (greater than 1 log₁₀ decrease in CMV DNA level in whole blood or plasma after 14 days or longer treatment); and
 - c. Recipient has not experienced any treatment-restricting adverse effects (e.g., dysgeusia, diarrhea, nausea, and recurrence of underlying disease); and
 - d. Recipient is not a non-responder (resistant) to maribravir.
3. Prior Authorization Guidelines:
 - a. Prior authorization will be approved for six months

1. Xadago® (safinamide)

a. Approval will be given if all the following criteria are met and documented:

1. The recipient must have a diagnosis of Parkinson's disease: and
2. The recipient must be five years of age or older; and
3. Documented continued Levodopa and/or other dopaminergic treatments; and
4. Recipient reports greater than 1.5 hours per day "off" episodes ("off" episodes refer to "end-of-dose wearing off" and unpredictable "on/off" episodes); and
5. Recipient must not also be taking any of the following drugs: other MAOIs or other drugs that are potent inhibitors of MAOI (e.g., linezolid), opioid drugs (e.g., tramadol, meperidine, and related derivatives), selective norepinephrine reuptake inhibitors (SNRIs), tri- or tetra-cyclic or triazolopyridine antidepressants (TCAs), cyclobenzaprine, methylphenidate, amphetamine and their derivatives, St. John's wort or dextromethorphan; and
6. The recipient must not have severe hepatic impairment (e.g., Child-Pugh C).

b. Recertification Request:

1. Authorization for continued use shall be reviewed at least every 12 months when the following criteria are met:
 - a. Documentation of positive clinical response to Xadago® therapy; and
 - b. Documented continued Levodopa and/or other dopaminergic treatments.

c. Prior Authorization Guidelines:

1. Initial prior authorization approval will be for three months.

2. Kynmobi® (apomorphine)

a. Approval will be given if the following criteria are met and documented:

1. Recipient is 18 years of age or older; and
2. Recipient has a documented diagnosis of Parkinson's disease (PD); and
3. Recipient is experiencing "off" episodes of PD at least two hours per day on average; and
4. Recipient is on a stable levodopa-based therapy; and
5. Recipients will not be on a concomitant 5HT3 antagonists (e.g., ondansetron, granisetron, dolansetron, palonosetron, alosetron); and
6. Recipient will be prescribed a non-5HT3 antagonist antiemetic (e.g., trimethobenzamide) for initial therapy; and
7. Recipient does not have a major psychotic disorder.

b. Recertification Request:

1. Recipient must continue to meet the initial criteria above; and
2. Recipient has demonstrated a beneficial response to therapy (e.g., decrease in frequency and duration from baseline in motor fluctuations ["off episodes"]); and
3. Recipient is absent of unacceptable toxicity from the drug (e.g., nausea or vomiting, oral mucosal irritation or stomatitis, decreased impulse control, syncope or hypotension, hallucinations or psychotic-like behavior, QTc prolongation, fibrotic complications, priapism, retinal atrophy or degeneration, excessive daytime sleepiness including falling asleep during activities that require active participation).

Therapeutic Class: Opioid Analgesic

Last Reviewed by the DUR Board: October 19, 2017

Codeine, codeine with acetaminophen and tramadol, tramadol with acetaminophen are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

a. Codeine, codeine with acetaminophen

1. All of the following criteria must be met:

- a. The recipient must be 12 years of age or older; and
- b. The lowest effective dose for the shortest period of time is being requested; and
- c. The recipient must not be obese (BMI > 30 kg/m²), have obstructive sleep apnea, or severe lung disease; and
- d. The recipient is not being prescribed the drug for post-surgical pain following a tonsillectomy and/or adenoidectomy.

b. Tramadol, tramadol with acetaminophen

1. All of the following criteria must be met:

- a. The recipient must be 12 years of age or older; and
- b. The lowest effective dose for the shortest period of time is being requested; and
- c. The recipient must not be obese (BMI > 30 kg/m²), have obstructive sleep apnea, or severe lung disease; and
- d. The recipient is not being prescribed the drug for post-surgical pain following a tonsillectomy and/or adenoidectomy; and
- e. The prescribed dose does not exceed 200mg/day and does not exceed a five-day supply.

- 2. Tramadol Extended Release (ER) will not be approved for children under 18 years of age and will reject at point of sale.

UUU. High Dollar Claim

Last Reviewed by the DUR Board: April 26, 2018

A High Dollar Claim is defined as a single point-of-sale claim that exceeds \$10,000. A High Dollar Claim is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits. If other prior authorization criteria exists, it will supersede this criteria.

1. Coverage and Limitations

Approval will be given if the following criteria are met and documented:

a. One of the following:

1. The medication is being prescribed for a Food and Drug Administration (FDA) approved indication; or
2. One of the following:
 - a. Diagnosis is supported as a use of American Society of Health-System Pharmacists Drug Information (AHFS DI); or
 - b. Diagnosis is supported in the FDA Uses/Non-FDA Uses section in DRUGDEX Evaluation and carries a Strength of Recommendation rating of IIb or better (see DRUGDEX Strength of Recommendation table); or
3. Both of the following:
 - a. Diagnosis is listed in the FDA Uses/Non-FDA Uses section in DRUGDEX Evaluation and carries a Strength of Recommendation rating of III or Class Indeterminant (see DRUGDEX Strength of Recommendation table); and
 - b. Efficacy is rated as “Effective” or “Evidence Favors Efficacy” (see DRUGDEX Efficacy Rating and Prior Authorization Approval Status table); or
4. Diagnosis is supported in any other section in DRUGDEX; or
5. The use is supported by clinical research in two articles from major peer-reviewed medical journals that present data supporting the proposed off-label use or uses as generally safe and effective unless there is clear and convincing contradictory evidence presented in a major peer-reviewed medical journal.

DIVISION OF HEALTH CARE FINANCING AND POLICY

VVV. Cuvrior® (trientine tetrahydrochloride)

Therapeutic Drug Class: Copper Chelator

Last Reviewed by DUR Board: October 20, 2022

Cuvrior® (trientine tetrahydrochloride) is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given once the following criteria are met and documented:
 - a. Recipient is 18 years of age or older; and
 - b. Recipient has Wilson's disease (defined by a prior or current Leipzig score of greater than or equal to four); and
 - c. Recipient is being treated with penicillamine for greater than or equal to one year at a stable dose and regimen for greater than or equal to four months, and recipient is tolerating penicillamine and adequately controlled (e.g., serum non-ceruloplasmin copper [NCC] level between greater than or equal to 25 and less than or equal to 150 mcg/L or 24-hour urinary copper excretion [UCE] of between levels greater than or equal to 100 and less than or equal to 900 mcg/24 hours); and
 - d. Penicillamine will be discontinued before initiating Cuvrior; and
 - e. Recipient will not concurrently use another formulation of trientine (e.g., Syprine, generics); and
 - f. Prescribed by or in consultation with a hepatologist or neurologist; and
 - g. Quantity limit is 300 tablets/30 days (max daily dose 3,000mg).
2. Recertification Request:
 - a. Recipient must continue to meet the above criteria; and
 - b. Recipient has evidence of effectiveness of therapy (e.g., as assessed by serum NCC level between greater than or equal to 25 and less than or equal to 150 mcg/L or 24-hour UCE levels greater than or equal to 100 and less than or equal to 900 mcg/24 hours); and
 - c. Recipient does not exhibit clinical manifestations of advancement of Wilson's disease from baseline (e.g., jaundice, edema, ascites, esophageal varices, liver failure, central nervous system symptoms); and
 - d. Recipient has not experienced any treatment-restricting adverse effects (e.g., hypersensitivity reactions, copper deficiency, iron deficiency).

WWW. Botulinum Toxin

Therapeutic Class: Neurotoxic Protein

Last reviewed by the DUR Board: July 26, 2018

Botulinum toxins are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Policy

Botulinum toxin injections are a Nevada Medicaid covered benefit for certain spastic conditions including, but not limited to cerebral palsy, stroke, head trauma, spinal cord injuries and multiple sclerosis. The injections may reduce spasticity or excessive muscular contractions to relieve pain, to assist in posturing and ambulation, to allow improved range of motion, to permit better physical therapy and provide adequate perineal hygiene.

2. Coverage and Limitations

Approval will be given if the following criteria are met and documented:

- a. It is expected that physicians be familiar with and experienced in the use of botulinum toxin products and utilize FDA-approved product labeling, compendia and peer-reviewed scientific literature to select the appropriate drug and dose regimen for each recipient condition. A complete list of covered indications can be found within the “Provider Type 20, 24 and 77 Billing Guide” applicable to botulinum toxins.
- b. Documentation must be provided that the recipient has been unresponsive to conventional methods of treatment (e.g., medication, physical therapy and other appropriate methods used to control and/or treat spastic conditions); and
- c. If maximum dose is reached and positive clinical response is not established, treatment must be discontinued; and
- d. Documentation of medical necessity is required for treatment more frequent than every 90 days; and
- e. Coverage will be approved for one injection per site. A site is defined as including muscles of a single contiguous body part, such as a single limb, eyelid, face or neck.
- f. Coverage will not be provided for injections given for cosmetic or for investigational purposes.

3. Recertification Request (the recipient must meet all the following criteria):

- a. Authorization for continued use shall be reviewed at least every 12 months when the following criteria are met:

Last Reviewed by the DUR Board: January 24, 2019

Compounded medications are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations

Approval will be given if the following criteria are met and documented:

- a. Each active ingredient in the compounded medication is FDA-approved or national compendia supported for the condition being treated; and
- b. The therapeutic amounts and combinations are supported by national compendia or peer-reviewed literature for the condition being treated in the requested route of delivery; and
- c. If any prescription ingredients require prior authorization and/or step therapy, all drug specific criteria must also be met; and
- d. The compounded medication must not be used for cosmetic purpose; and
- e. The compounded medication must not include any ingredient that has been withdrawn or removed from the market due to safety reasons (drugs withdrawn from the market due to safety or effectiveness); and
- f. The recipient has tried and failed therapy or had an intolerance to at least two FDA-approved, commercially available prescription therapeutic alternatives, one of which is the same route of administration as the requested compound, unless one of the following criteria are met:
 1. The recipient has a contraindication to commercially available products; or
 2. One or no other therapeutic alternatives are commercially available; or
 3. Compound medication is prepared in a different dosage form for a recipient who is unable to take the commercially available formulation (mixing or reconstituting commercially available products based on the manufacturer's instructions or the product's approved labeling does not meet this criteria); or
 4. The recipient has an allergy or sensitivity to inactive ingredients (e.g., dyes, preservatives, sugars, etc.) that are found in commercially available products.

YYY. Antibiotics

Last Reviewed by the DUR Board: July 26, 2018

Antibiotic medications are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

The outpatient antibiotic class criteria apply to the following:

Third Generation Cephalosporins	Fluoroquinolones	Oxazolidinones
cefixime	ciprofloxacin	tedizolid
cefdinir	levofloxacin	linezolid
cefpodoxime	delafloxacin	
ceftibuten	moxifloxacin	
cefdotoren	ofloxacin	

If applicable, reference current Infectious Disease Society of America (IDSA) (or equivalent organization) guidelines to support the use of the following:

1. Coverage and Limitations for Third Generation Cephalosporins and Fluoroquinolones

Approval will be given if the following criteria are met and documented:

- a. Culture and sensitivity-proven susceptibilities and resistance to other agents suggest the requested drug is necessary.

2. Coverage and Limitations for Oxazolidinones

- a. Sivextro® (tedizolid)

Approval will be given if the following criteria are met and documented:

1. Recipient has diagnosis of Acute Bacterial Skin and Skin Structure Infection; and
2. Infection is caused by methicillin-resistant *Staphylococcus aureus* (MRSA); and
3. Recipient has had a trial of or has a contraindication to an alternative antibiotic that the organism is susceptible to (depending on manifestation, severity of infection and culture or local sensitivity patterns, examples of alternative antibiotics may include, but are not limited to:

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

trimethoprim/sulfamethoxazole (TMP/SMX), doxycycline, vancomycin, daptomycin, telavancin, clindamycin); or

4. Recipient started treatment with intravenous antibiotic(s) in the hospital and requires continued outpatient therapy.

b. Zyvox® (linezolid)

Approval will be given if the following criteria are met and documented:

1. Recipient has a diagnosis of vancomycin-resistant *enterococcus* (VRE) *faecium* infection or diagnosis of MRSA infection; and
2. Recipient has had a trial of or has a contraindication to an alternative antibiotic that the organism is susceptible to (depending on manifestation, severity of infection and culture or local sensitivity patterns, examples of alternative antibiotics may include, but are not limited to: TMP/SMX, doxycycline, vancomycin, tetracycline, clindamycin); or
3. Recipient started treatment with intravenous antibiotic(s) in the hospital and requires continued outpatient therapy.

3. Exception Criteria (applies to antibiotic medications)

- a. Prescribed by an infectious disease specialist or by an emergency department provider; or
- b. Ceftriaxone prescribed as first line treatment for gonorrhea, pelvic inflammatory disease, epididymo-orchitis and as an alternative to benzylpenicillin to treat meningitis for those with a severe penicillin allergy; or
- c. If cefixime is prescribed for gonococcal infection where ceftriaxone is unavailable; or
- d. The recipient resides in one of the following:
 1. Acute Care
 2. Long-term Acute Care (LTAC)
 3. Skilled Nursing Facility (SNF)

ZZZ. Oral Oncology Agents

Therapeutic Class: Oral Oncology Agents

Last Reviewed by the DUR Board: January 24, 2019

Oral oncology agents are subject to prior authorization based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Coverage and Limitations (this criteria only applies if other product-specific criteria is not available in MSM Chapter 1200 – Prescribed Drugs)

Approval will be given if the following criteria are met and documented:

- a. The recipient has a diagnosis that is indicated in the FDA approved package insert or listed in nationally recognized compendia, for the determination of medically accepted indications; and
- b. If the oral oncology medication is not indicated as a first line agent, either in the FDA approved package insert or nationally recognized compendia, then documentation of previous therapies tried and failed is required; and
- c. The medication is prescribed by or in consultation with an oncologist or hematologist; and
- d. The recipient does not have any contraindications to the requested oral oncology medication; and
- e. The requested quantity and dosing regimen falls within the manufacturer's published dosing guidelines or nationally recognized compendia and is appropriate for the recipient's age; and
- f. The medication must be used in combination with other chemotherapeutic or adjuvant agents according to the FDA approved prescribing information; and
- g. One of the following:
 1. If an FDA-approved companion diagnostic test for the requested agent exists, then documentation that the test was performed to confirm the diagnosis is required; or
 2. If a test with adequate ability to confirm a disease mutation exists, then documentation that the test was performed to confirm the diagnosis is required.

2. Recertification Request

- a. Documentation of a positive clinical response to the oral oncology treatment.

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is greater than or equal to 18 years of age; and
 - b. Recipient will receive supplementation with vitamin A as the recommended daily allowance during vutrisiran therapy; and
 - c. Vutrisiran must not be used in combination with other transthyretin (TTR) reducing agents (e.g., inotersen [Tegsedi®], tafamidis [Vyndamax®, Vyndaqel®], patisiran [Onpattro®]); and
 - d. Recipient has a definitive diagnosis of hereditary transthyretin-mediated (hATTR) amyloidosis/FAP (familial amyloidotic polyneuropathy) as documented by amyloid deposition on tissue biopsy and identification of a pathogenic TTR variant using molecular genetic testing; and
 - e. Polyneuropathy is demonstrated by greater than or equal to two of the following criteria:
 1. Subjective patient symptoms are suggestive of neuropathy; or
 2. Abnormal nerve conduction studies are consistent with polyneuropathy; or
 3. Abnormal neurological examination is suggestive of neuropathy; and
 - f. Recipient's peripheral neuropathy is attributed to hATTR/FAP and other causes of neuropathy have been excluded; and
 - g. Baseline strength/weakness has been documented using an objective clinical measuring tool (e.g., Medical Research Council [MRC] muscle strength); and
 - h. Recipient has not had an orthotopic liver transplant (OLT); and
 - i. Quantity limit is one syringe every three months.
2. Recertification Request:
 - a. Recipient continues to meet the above criteria; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- b. Recipient is absent of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: ocular symptoms related to hypovitaminosis A, etc.; and
 - c. Recipient has experienced disease response compared to pre-treatment baseline as evidenced by stabilization or improvement in greater than or equal to one of the following:
 - 1. Signs and symptoms of neuropathy; or
 - 2. MRC muscle strength.
 - d. Recertification will be approved for six months.
3. Prior Authorization Guidelines:
- a. Prior authorization will be approved for six months.

DDDD. Oxervate® (cenegermin-bkbj)

Therapeutic Drug Class: Ophthalmic Human Nerve Growth Factor (Q25)

Last Reviewed by DUR Board: October 20, 2022

Oxervate® (Cenegermin-bkbj) is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity.

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient must be greater than or equal to two years of age; and
 - b. Recipient must have a diagnosis of moderate to severe (stage two or stage three) neurotrophic keratitis (NK); and
 - c. Prescribed by or in consultation with an ophthalmologist; and
 - d. Prescriber attestation that patient or caregiver has been counseled on proper administration technique; and
 - e. Quantity Limit of eight kits per affected eye per lifetime.
2. Renewal Criteria:
 - a. Coverage not renewable.
3. Prior Authorization Guidelines:
 - a. Prior authorization will be approved for eight weeks.

EEEE. Penicillamine

Therapeutic Class: Antirheumatics

Last reviewed by DUR Board: January 19, 2023

Penicillamine is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Wilson's Disease

a. Approval will be given if the following criteria are met and documented:

1. Recipient has diagnosis of Wilson's Disease; and
2. Medication prescribed by or in consultation with gastroenterologist, hepatologist, rheumatologist, or liver transplant physician.

b. Recertification Request:

1. Recipient continues to meet above criteria; and
2. Recipient has demonstrated positive clinical response to therapy.

c. Prior Authorization Guidelines:

1. Initial approval will be given for 12 months.
2. Recertification approval will be given for 12 months.

2. Cystinuria

a. Approval will be given if the following criteria are met and documented:

1. Recipient has diagnosis of Cystinuria; and
2. Recipient has a history of failure, contraindication, or intolerance to conservative treatment measures (e.g., use of urinary alkalinization such as potassium citrate, high fluid intake, sodium, and protein restriction) [initial criteria only]; and
3. Medication is prescribed by or in consultation with nephrologist or urologist.

b. Recertification Request:

1. Recipient continues to meet above criteria; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Recipient has demonstrated positive clinical response to therapy.
- c. Prior Authorization Guidelines:
 1. Initial approval will be given for 12 months.
 2. Recertification will be approved for 12 months.
3. Rheumatoid Arthritis
 - a. Approval will be given if the following criteria are met and documented:
 1. Recipient has diagnosis of severe, active rheumatoid arthritis; and
 2. Recipient has contraindication to or documented intolerance or failure with an adequate trial (6-12 weeks) of at least one non-biologic DMARD (such as methotrexate, leflunomide, or azathioprine) [initial criteria only].
 3. Medication is prescribed by or in consultation with a rheumatologist.
 - b. Recertification Request:
 1. Recipient continues to meet above criteria; and
 2. Recipient has demonstrated positive clinical response to therapy.
 - c. Prior Authorization Guidelines:
 1. Initial approval will be given for 12 months.
 2. Recertification will be approved for 12 months.

FFFF. Rayaldee® (calcifediol)

Therapeutic Class: Vitamins

Last reviewed by DUR Board: January 19, 2023

Rayaldee® (calcifediol) is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Rayaldee® (calcifediol)

a. Approval will be given if the following criteria are met and documented:

1. Recipient is greater than or equal to 18 years of age; and
2. Recipient has a diagnosis of secondary hyperparathyroidism (HPT); and
3. Recipient has both of the following:
 - a. serum total 25-hydroxyvitamin D level less than 30 ng/mL; and
 - b. serum corrected total calcium below 9.8 mg/d; and
4. Recipient has Chronic Kidney Disease (CKD) Stage 3 or 4
5. Recipient does not have CKD Stage 5 or end stage renal disease on dialysis.
6. Recipient has a history of failure, contraindication, or intolerance to adequate trial of all of the following:
 - a. Calcitriol
 - b. Doxercalciferol
 - c. Paricalcitol
7. Medication is prescribed by or in consultation with nephrologist or endocrinologist.

b. Recertification Request:

1. Recipient has demonstrated positive response to treatment as defined by increase in serum total 25-hydroxyvitamin D level and/or decrease in intact parathyroid hormone (iPTH).
2. Medication is prescribed by or in consultation with nephrologist or endocrinologist.

c. Prior Authorization Guidelines:

GGGG. Relyvrio® (sodium phenylbutyrate/taurusodiol)

Therapeutic Class: Amyotrophic Lateral Sclerosis (ALS)

Last reviewed by DUR Board: January 19, 2023

Relyvrio® (sodium phenylbutyrate/taurusodiol) is subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Relyvrio® (sodium phenylbutyrate/taurusodiol)
 - a. Approval will be given if the following criteria are met and documented:
 1. Recipient is greater than or equal to 18 years of age; and
 2. Recipient has a diagnosis of amyotrophic lateral sclerosis (ALS) based on validated criteria (e.g., revised El Escorial criteria, Awaji criteria, Gold Coast criteria); and
 3. Recipient must have an adequate trial of riluzole for greater than or equal to eight weeks or contraindication to therapy; and
 3. Physician has assessed baseline disease severity utilizing an objective measure/tool (e.g., Amyotrophic Lateral Sclerosis Functional Rating Scale-Revised (ALSFRS-R); and
 4. Recipient does not require permanent assisted ventilation; and
 5. Therapy prescribed by or in consultation with neurologist; and
 - b. Recertification Request:
 1. Recipient must continue to meet the above criteria; and
 2. Recipient must have disease stabilization or improvement in the slope of decline as demonstrated on an objective measure/tool (e.g., ALSFRS-R); and
 3. Recipient has not experienced any unacceptable toxicity from treatment (e.g., worsening hypertension or heart failure).
 - c. Prior Authorization Guidelines:
 1. Initial approval will be given for six months.
 2. Recertification will be approved for six months.

4. DIABETIC SUPPLY PROGRAM

Diabetic Supplies are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

Prior authorization is required for preferred and non-preferred diabetic products (including insulin delivery system and Continuous Glucose Monitor [CGM] receivers and readers).

Preferred diabetic product information is found at:

<https://www.medicaid.nv.gov/providers/rx/diabeticsupplies.aspx>

Preferred (including sensors and transmitters) and nonpreferred (including tubing, reservoirs for pumps and transmitters and sensors for CGM's) diabetic supplies do not require a prior authorization. These items require a documented diagnosis of diabetes mellitus type I (DM1) or gestational diabetes and recipients must meet all age restrictions stated on the manufacturer's label.

Pharmacy benefit allows a 100-day supply for insulin system and CGM supplies.

A. Preferred Insulin Delivery System

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient must have a documented diagnosis of Diabetes Mellitus Type I or Gestational Diabetes; and
 - b. The product must be prescribed by or in consultation with an endocrinologist; and
 - c. The recipient must meet all age restrictions stated in the manufacturer's label; and
 - d. The recipient must have been compliant on their current antidiabetic regimen for at least the last six months and this regimen must include multiple day injections of insulin (requiring at least three injections per day); and
 - e. One of the following:
 1. Documented history of recurring hypoglycemia; or
 2. Wide fluctuations in pre-meal blood glucose, history of severe glycemic excursions or experiencing "Dawn" phenomenon with fasting blood glucose exceeding 200 mg/dL, or
 3. Prior use of an insulin pump with documented frequency of glucose self-testing of at least four times per day in the month immediately prior to the request.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Prior Authorization Guidelines

- a. Initial prior authorization approval will be for one year.
- b. Prior Authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>.

3. Recertification Request

- a. Recertification of prior authorization approval will be given if the recipient has documented positive clinical response to the product (including current HbA1C).
- b. Recertification prior authorization approval will be for one year.

B. Non-Preferred Insulin Delivery System

1. Approval will be given if the following criteria are met and documented:

- a. In addition to meeting the “Preferred Insulin Delivery System” criteria, the recipient must also meet the following:
 - 1. The recipient must have been trained to use the non-preferred product; and
 - 2. The recipient must have benefited from use of the non-preferred product; and
 - 3. The recipient must have one of the following reasons/special circumstances:
 - 4. Recipient has had an allergic reaction to a preferred product or related supply; or
 - 5. Recipient has a visual impairment which requires the use of a non-preferred product; or
 - 6. Recipient has medical necessity justification (e.g. mental or physical limitation) which requires them to stay on their current product.

C. Preferred Continuous Glucose Monitors (CGMs)

1. Approval will be given if the following criteria are met and documented:

- a. Recipient must have a documented diagnosis of Diabetes Mellitus Type I or Gestational Diabetes; and
- b. Recipient must meet all age restrictions stated in the manufacturer’s label; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- c. Recipient must have been compliant on their current antidiabetic regimen for at least the last six months and this regimen must include multiple daily injections of insulin (requiring at least three injections per day); and
 - d. One of the following:
 - 1. Documented history of recurring hypoglycemia; or
 - 2. Wide fluctuations in pre-meal blood glucose, history of severe glycemic excursions or experiencing “Dawn” phenomenon with fasting blood glucose exceeding 200 mg/dL; or
 - 3. Recipient is currently using insulin pump therapy while continuing to need frequent dosage adjustments or experiencing recurring episodes of severe hypoglycemia (50 mg/dL).
- 2. Prior Authorization Guidelines
 - a. Initial prior authorization approval will be for one year.
 - b. Prior Authorization forms are available at:
<https://www.medicaid.nv.gov/providers/rx/rxforms.aspx>
- D. Non-Preferred Continuous Glucose Monitor (CGM)
 - 1. Approval will be given if the following criteria are met and documented:
 - a. In addition to meeting the Preferred CGM criteria, the recipient must also meet the following:
 - 1. Recipient has had an allergic reaction to a preferred product or related supply; or
 - 2. Recipient has a visual impairment which requires the use of a non-preferred product; or
 - 3. Recipient has medical necessity justification (e.g. mental or physical limitation) which requires them to stay on their current product; or
 - 4. The recipient must have been trained to use the non-preferred product; and
 - 5. The recipient must have benefited from use of the non-preferred product.

MEDICAID SERVICES MANUAL

*Blood Glucose monitors with special features (e.g. voice synthesizers) require a prior authorization. For special blood glucose monitors, a diagnosis and a statement from the physician documenting the impairment is required with a prior authorization.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

5. PHYSICIAN ADMINISTERED DRUGS (PADs) REQUIRING PRIOR AUTHORIZATION AND/OR QUANTITY LIMITATIONS

A. Abraxane® (paclitaxel protein-bound particles)

Therapeutic Class: Taxane Chemotherapy

Last Reviewed by the DUR Board: N/A

Physician Administered Drugs (PAD) are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is at least 18 years of age; and
 - b. Breast Cancer
 1. Recipient failed on combination chemotherapy for metastatic disease or relapsed within six months of adjuvant therapy; and
 - a. Previous chemotherapy included an anthracycline unless clinically contraindicated; or
 2. Recipient has recurrent unresectable (local or regional) or metastatic (Stage IV [M1]) disease or inflammatory breast cancer with no response to preoperative systemic therapy; and
 - a. Used a single agent or in combination with carboplatin in recipient with high tumor burden, rapidly progressing disease, and visceral crisis; and
 - b. Disease is HER2-negative; and
 1. Disease is hormone receptor-negative; or
 2. Disease is hormone receptor-positive, and recipient is refractory to endocrine therapy or has a visceral crisis; or
 - c. Used as third line or greater therapy in combination with trastuzumab for disease that is HER2-positive; or
 - d. Used in combination with pembrolizumab for PD-L1 positive triple-negative disease; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

3. May be substituted for paclitaxel or docetaxel if the recipient has experienced hypersensitivity reactions despite premedication, or the patient has contraindication to standard hypersensitivity premedication.
- c. Non-Small Cell Lung Cancer (NSCLC)
1. Used as first-line therapy for locally advanced or metastatic disease, in combination with carboplatin, in patients who are not candidates for curative surgery or radiation therapy; or
 2. May be substituted for paclitaxel or docetaxel if the recipient has experienced hypersensitivity reactions despite premedication or the recipient has contraindications to standard hypersensitivity premedication; or
 3. Used for recurrent, advanced, metastatic disease (excluding locoregional recurrence or symptomatic local disease without evidence or disseminated disease), or mediastinal lymph node recurrence with prior radiation therapy; and
 - a. Used as first-line therapy; and
 1. Used in combination with carboplatin and pembrolizumab (for squamous cell histology) or atezolizumab (for non-squamous histology); and
 - a. Used in recipients with tumors that have negative actionable molecular biomarkers; and
 - b. Used in recipients with PS 0-1 who are positive for one of the following molecular mutations: EGFR exon 20, KRAS G12C, BRAF V600E, NTRK1/2/3 gene fusion, MET exon 14 skipping, RET rearrangement, or ERBB2 (HER2); or
 2. Used in combination with carboplatin in recipients with contraindications to PD-1 or PD-L1 inhibitors (PS score of 0-2) or as a single agent (PS score of 2); and
 - a. Used in recipients with tumors that have negative actionable molecular biomarkers and PD-L1 greater than or equal to one percent; or
 - b. Used in recipients with tumors that have negative actionable molecular biomarkers and PD-L1 less than one percent; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- c. Used in recipients who are positive for one of the following molecular mutations: EFGR exon 20, KRAS G12C, BRAD V600E, NTRK1/2/3 gene fusion, MET exon 14 skipping, RET rearrangement, or ERBB2 (HER2); or
 - b. Used as subsequent therapy; and
 - 1. Used as a single agent (if not previously given) in recipients with a PS 0-2; and
 - a. Used for first progression after initial systemic therapy; or
 - b. Used in combination with carboplatin and pembrolizumab (for squamous cell histology) or atezolizumab (for non-squamous histology) in recipients with PS score of 0-1; and
 - 1. Used in recipients who are positive for one the following molecular mutations: BRAF V600E, NTRK1/2/3 gene fusion, MET exon 14 skipping, or RET rearrangement; or
 - 2. Used in recipients who are positive for one of the following molecular mutations and have received prior targeted therapy for those aberrations: EGFR exon 19 deletion or L858R tumors, EGFR S768I, L861Q, and/or G719X positive tumors, ALK rearrangement, or ROS1 rearrangement; or
 - c. Used in combination with carboplatin in recipients with contraindications to PD-1 or PD-L1 inhibitors (PS score of 0-2) or as a single agent (PS score of 2); and
 - 1. Used in recipients who are positive for one of the following molecular mutations: BRAF V600E, NTRK1/2/3 gene fusion, MET exon 14 skipping, or RET rearrangement; or
 - 2. Used in recipients who are positive for one of the following molecular mutations and have received prior targeted therapy for those aberrations: EGFR exon 19 deletion or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

L858R tumors, EGFR S7681, L861Q, and/or G719X positive tumors, ALK rearrangement, or ROS1 rearrangement; or

3. Used in recipients with PD-L1 expression-positive (greater than or equal to one percent) tumors that are negative for actionable molecular biomarkers with prior PD-1/PD-L1 inhibitor therapy but no prior platinum-doublet chemotherapy.

d. Ovarian Cancer (Epithelial Ovarian/Fallopian Tube/Primary Peritoneal)

1. Recipient has recurrent or persistent disease; and
2. Recipient is not experiencing an immediate biochemical relapse (i.e., rising CA-125 without radiographic evidence of disease); and
 - a. Used a single agent; and
 1. Recipient has platinum-resistant disease; and
 - a. Used for progression on primary, maintenance, or recurrence therapy; or
 - b. Used for stable or persistence disease if not currently on maintenance therapy; or
 - c. Used for relapse disease less than six months after complete remission from prior chemotherapy; or
 2. Recipient has platinum-sensitive disease; and
 - a. Used for radiographic and/or clinical relapse greater than or equal to six months after complete remission from prior chemotherapy; or
 - b. Used in combination with carboplatin for platinum-sensitive disease with confirmed taxane hypersensitivity; and
 1. Used for relapse greater than or equal to six months after complete remission from prior chemotherapy; or
3. Recipient has recurrent low-grade serous carcinoma; and
 - a. Used as a single agent for platinum-sensitive or platinum-resistant disease; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- b. Used in combination with carboplatin for platinum-sensitive disease with confirmed taxane hypersensitivity; or
 - 4. May be substituted for paclitaxel if the recipient has experienced hypersensitivity reactions despite premedication or the recipient has contraindications to standard hypersensitivity premedication.
- e. Pancreatic Adenocarcinoma
 - 1. Used in combination with gemcitabine; and
 - a. Recipient has locally advanced or metastatic disease; and
 - 1. Used as first-line therapy; or
 - 2. Used as induction therapy followed by chemoradiation (locally advanced disease only); or
 - 3. Used as subsequent therapy after progression with a fluoropyrimidine-based therapy; or
 - 4. Used as continuation (subsequent) therapy if no disease progression after first-line therapy (locally advanced disease only); or
 - 5. Used as continuation (maintenance) therapy if acceptable tolerance and no disease progression after at least 4-6 months of first-line therapy (metastatic disease only); or
 - b. Recipient has recurrent disease in the pancreatic operative bed or metastatic disease, post-resection; and
 - 1. Used greater than or equal to six months after completion of primary therapy; or
 - 2. Used less than six months from completion of primary therapy with a fluoropyrimidine-based regimen; or
 - c. Used as neoadjuvant therapy; and
 - 1. Recipient has resectable disease with high-risk features (i.e., markedly elevated CA 19-9, large primary tumors, large regional lymph nodes, excessive weight loss, extreme pain); or
 - 2. Recipient has biopsy positive borderline resectable disease; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Used in combination with gemcitabine and cisplatin; and
 - a. Recipient has metastatic disease; and
 - b. Recipient has ECOG PS 0-1; and
 1. Used as first-line therapy; or
 2. Used as continuation (maintenance) therapy if acceptable tolerance and no disease progression after at least 4-6 months of first-line therapy.
- f. Cutaneous Melanoma
 1. Used as a single agent or in combination with carboplatin for metastatic or unresectable disease; and
 - a. Used as subsequent therapy for disease progression; or
 - b. Used after maximum clinical benefit from BRAF targeted therapy (e.g., dabrafenib/trametinib, vemurafenib/cobimetinib, encorafenib/binimetinib, etc.).
- g. Uveal Melanoma
 1. Used as a single agent for distant metastatic disease
- h. Endometrial Carcinoma (Uterine Neoplasms)
 1. Used as a single agent therapy; and
 2. Recipient has tried paclitaxel and treatment paclitaxel was not tolerated due to a documented hypersensitivity reaction, despite use of recommended premedication, or there is a documented medical contraindication to recommended premedication; and
 - a. Recipient has endometroid adenocarcinoma; and
 1. Used a primary treatment of disease not suitable for primary surgery; and
 - a. Recipient has suspected or gross cervical involvement (excluding recipients using a chemotherapy alone); or
 - b. Recipient has locoregional extrauterine disease; or
 - c. Recipient has distant metastases; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Recipient has carcinosarcoma, clear cell carcinoma, serous carcinoma, or un-/de-differentiated carcinoma; and
 - a. Used for locoregional recurrence or disseminated metastases; or
 - b. Used as additional treatment of metastatic disease that is suitable for primary surgery; or
 - c. Used as primary treatment of metastatic disease that is not for primary surgery.
- i. Hepatobiliary Adenocarcinoma (Intrahepatic /Extrahepatic Cholangiocarcinoma, Gallbladder)
 1. Used in combination with gemcitabine for unresectable or metastatic disease; and
 - a. Used as a primary treatment; or
 - b. Used as a subsequent treatment for progression on or after systemic therapy.
- j. Small Bowel Adenocarcinoma
 1. Recipient has advanced or metastatic disease; and
 2. Used as single agent or in combination with gemcitabine; and
 - a. Used as subsequent therapy; or
 - b. Recipient has had prior adjuvant oxaliplatin exposure, or a contraindication to oxaliplatin; and
 1. Used as initial therapy; or
 2. Used as subsequent therapy in recipient who previously received initial therapy with nivolumab with or without ipilimumab, pembrolizumab, or dostarlimab-gxly.
- k. Kaposi Sarcoma
 1. Used as subsequent therapy; and
 - a. Used as a single agent for patients that do not have HIV; or
 - b. Used in combination with antiretroviral therapy (ART) for recipients with HIV; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Recipient has relapsed/refractory advanced cutaneous, oral, visceral, or nodal disease; and
 3. Disease has progressed on or not responded to first-line systemic therapy; and
 4. Disease has progressed on alternative first-line systemic therapy.
1. Ampullary Adenocarcinoma
 1. Used in combination with gemcitabine; and
 2. Recipient has pancreatobiliary and mixed type disease; and
 - a. Used as neoadjuvant therapy for localized disease in high-risk recipients (i.e., imaging findings, markedly elevated CA 19-9, markedly elevated carcinoembryonic antigen [CEA], large primary tumors, large regional lymph nodes, excessive weight loss, extreme pain); or
 - b. Used as first-line therapy for unresectable localized or metastatic disease; or
 - c. Used as subsequent therapy for disease progression.
 2. Dosing Limits
 - a. Quantity Limit (max daily dose) [NDC Unit]:
 1. Abraxane® 100 mg powder for injection single dose vial: 9 vials per 21-day supply
 2. Max Units (per dose and over time) [HCPCS Unit]:
 - a. Kaposi Sarcoma
 1. 300 billable units per 28 days
 - b. All other indications
 1. 900 billable units per 21 days
 3. Recertification Request:
 - a. Recipient continues to meet indication-specific relevant criteria such as concomitant therapy requirements (not including prerequisite therapy), performance status, etc. identified in Section III; and

DIVISION OF HEALTH CARE FINANCING AND POLICY
MEDICAID SERVICES MANUAL

- b. Disease response with treatment as defined by stabilization of disease or decrease in size of tumor or tumor spread; and
 - c. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: severe myelosuppression (e.g., severe neutropenia [absolute neutrophil count less than 1,500 cell/mm3] or thrombocytopenia), sensory neuropathy, sepsis, pneumonitis, severe hypersensitivity reactions (including anaphylactic reactions), etc.
- 4. PA Guidelines:
 - a. Initial approval will be given for six months.
 - b. Recertification will be given for six months.

B. Anti-PD-1 Monoclonal Antibodies

Therapeutic Class: Anti-PD-1 Monoclonal Antibodies

Last Reviewed by the DUR Board: N/A

Anti-PD-1 Monoclonal Antibodies are subject to PA and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Bavencio® (avelumab)

a. Approval will be given if the following criteria are met and documented:

1. Recipient is at least 18 years of age, unless otherwise indicated; and

2. Universal Criteria

a. Recipient has not received previous therapy with a programmed death (PD-1/PD-L1)-directed therapy (e.g., nivolumab, pembrolizumab, dostarlimab, atezolizumab, durvalumab, cemiplimab, nivolumab/relatlimab-rmbw, etc.), unless otherwise specified; and

3. Merkel Cell Carcinoma (MCC)

a. Recipient is at least 12 years of age; and

b. Used as single-agent therapy; and

c. Recipient has metastatic or recurrent disseminated disease.

4. Urothelial Carcinoma (Bladder Cancer)

a. Used as single-agent therapy; and

1. Recipient has one of the following diagnoses:

a. Locally advanced or metastatic urothelial carcinoma

b. Muscle invasive bladder cancer with local recurrence or persistent disease in a preserved bladder

c. Metastatic or local bladder cancer recurrence post cystectomy

d. Metastatic upper genitourinary (GU) tract tumors

e. Metastatic urothelial carcinoma of the prostate

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- f. Recurrent or metastatic primary carcinoma of the urethra (excluding recurrence of stage T3-4 disease or palpable inguinal lymph nodes); and
 - 2. Used for disease that progressed during or following platinum-containing chemotherapy; or
 - 3. Used as second-line treatment after chemotherapy other than a platinum; or
- b. Used for first-line maintenance treatment; and
 - 1. Recipient has locally advanced or metastatic urothelial carcinoma (inclusive of bladder, upper GU tract, urethra, and/or prostate cancer); and
 - 2. Recipient has not progressed with first-line platinum-containing chemotherapy.
- 4. Renal Cell Carcinoma (RCC)
 - a. Used in combination with axitinib; and
 - b. Used as first-line therapy; and
 - c. Used for the treatment of advanced, relapsed, or stage IV disease and clear cell histology.
- 5. Gestational Trophoblastic Neoplasia
 - a. Used a single-agent therapy for multiagent chemotherapy-resistant disease; and
 - 1. Recipient has intermediate placental site trophoblastic tumor (PSTT) or epithelioid trophoblastic tumor (ETT); and
 - a. Recipient has recurrent or progressive disease; and
 - b. Recipient was previously treatment with a platinum-based regimen; or
 - 2. Recipient has high-risk disease (i.e., prognostic score greater than or equal to seven or FIGO stage IV disease).
- 6. Endometrial Carcinoma (Uterine Neoplasms)
 - a. Used as single-agent therapy; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- b. Recipient has recurrent or metastatic disease; and
 - c. Used as second-line treatment for microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) tumors.
 - b. Dosing Limits
 - 1. Quantity Limit (max daily dose) [NDC Unit]:
 - a. Bavencio 200 mg/10mL single dose vial: 4 vials per 14 days
 - 2. Max Units (per dose and over time) [HCPCS Unit]:
 - a. 80 billable units (800 mg) every 14 days (all indications)
 - c. Recertification Request
 - 1. Recipient continues to meet the universal and other indication-specific relevant criteria identified in section III; and
 - 2. Disease response with treatment as defined by stabilization of disease or decrease in size of tumor or tumor spread; and
 - 3. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: severe or life-threatening infusion-related reactions, hepatotoxicity, severe and fatal immune-mediated adverse reactions (e.g., pneumonitis, hepatitis, colitis, endocrinopathies, nephritis with renal dysfunction, dermatitis/dermatologic adverse reactions, etc.), major adverse cardiovascular events (MACE) when used in combination with axitinib, complications of allogeneic hematopoietic stem cell transplantation (HSCT), etc.
 - d. PA Guidelines:
 - 1. Initial approval will be given for 6 months.
 - 2. Recertification will be given for 6 months.
- 2. Imfinzi® (durvalumab)
 - a. Approval will be given if the following criteria are met and documented:
 - 1. Recipient is at least 18 years of age; and
 - 2. Recipient has not received previous therapy with a programmed death (PD-1/PD-L1)- directed therapy (e.g., nivolumab, pembrolizumab,

MEDICAID SERVICES MANUAL

atezolizumab, avelumab, cemiplimab, dostarlimab, nivolumab/relatlimab-rmbw, etc.) unless otherwise specified; and

3. Non-Small Cell Lung Cancer (NSCLC)

a. Recipient has a performance status (PS) of 0-1; and

1. Used as a single agent; and

a. Used as consolidation therapy; and

b. Recipient has unresectable stage II-III disease; and

c. Disease has not progressed after definitive chemoradiation; or

2. Used in combination with tremelimumab-actl and platinum-based chemotherapy; and

a. Used as first-line therapy for metastatic disease; and

b. Recipient had no EGFR mutations or ALK genomic tumor aberrations.

4. Small Cell Lung Cancer (SCLC)

a. Recipient has extensive stage disease (ES-SCLC); and

1. Used as first-line therapy in combination with etoposide and either carboplatin or cisplatin; or

2. Used as single-agent maintenance therapy after initial therapy with etoposide and either carboplatin or cisplatin.

5. Hepatobiliary Cancers

a. Recipient has hepatocellular carcinoma (HCC); and

1. Used a first-line therapy as a single agent; and

a. Recipient has unresectable disease and is not a transplant candidate; or

b. Recipient has liver-confirmed disease that is inoperable by performance status, comorbidity, or with minimal or uncertain extrahepatic disease; or

c. Recipient has metastatic disease or extensive liver tumor burden; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Used as first-line therapy in combination with tremelimumab-actl; and
 - a. Recipient has unresectable disease; and
 - b. Recipient has Child-Pugh Class A hepatic impairment (i.e., excludes class B and C impairments); and
 1. Recipient has intermediate disease (i.e., multinodular, PS 0) and is not eligible for locoregional therapy; or
 2. Recipient has advanced disease (i.e., portal invasion, regional lymph node metastasis, distant metastasis, PS 1-2); or
- b. Recipient has biliary tract cancer (e.g., gallbladder cancer or intra-/extra- hepatic cholangiocarcinoma); and
 1. Used in combination with cisplatin and gemcitabine; and
 - a. Used as primary treatment for unresectable, locally advanced, or metastatic disease; or
 - b. Used for recurrent disease greater than six months after surgery with curative intent and greater than six months after completion of adjuvant therapy.
- b. Dosage Limits
 1. Quantity Limits (max daily dose) [NDC Unit]:
 - a. Imfinzi 120 mg/2.4 mL single dose vial: four vials per 14 days
 - b. Imfinzi 500 mg/10 mL single dose vial: two vials per 14 days
 2. Max Units (per dose and over time) [HCPCS Unit]:
 - a. NSCLC: 112 billable units (1,120 mg) every 14 days
 - b. SCLC: 150 billable units (1,500 mg) every 21 days x six disease, then 150 billable units (1,500 mg) every 28 days
 - c. Biliary Tract Cancer: 150 billable units (1,500 mg) every 21 days x eight doses, then 150 billable units (1,500 mg) every 28 days

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- d. Hepatocellular Carcinoma: 150 billable units (1,500 mg) every 28 days
- c. Recertification Request
 - 1. Recipient continues to meet the universal and other indication-specific relevant criteria identified in section III; and
 - 2. Disease response with treatment as defined by stabilization of disease or decrease in size of tumor or tumor spread; and
 - 3. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include severe or life-threatening infusion-related reactions, immune-mediated adverse reactions (e.g., pneumonitis, hepatitis, colitis, endocrinopathies, nephritis with renal dysfunction, dermatology reactions, pancreatitis, etc.), complications of allogeneic hematopoietic stem cell transplantation (HCST), etc.; and
 - 4. NSCLC (single-agent use)
 - a. Recipient has not exceeded a maximum of 12 months of therapy
 - 5. Hepatobiliary Cancers
 - a. Cases for recipients with HCC who use treatment as part of STRIDE and experience disease progression but who are clinically stable and still deriving clinical benefit will be reviewed on a case-by-basis.
 - 6. Continuation Maintenance Therapy for SCLC
 - a. Refer to Section III for criteria.
- d. PA Guidelines:
 - 1. Initial approval for Non-Small Cell Lung Cancer (single agent use) will be given for six months.
 - 2. Recertification for Non-Small Cell Lung Cancer (single agent use) will be given for 12 months.
 - 3. Initial approval for Non-Small Cell Lung Cancer (use in combination with tremelimumab-act] and platinum-based chemotherapy, Small Cell Lung Cancer and Hepatobiliary Cancers will be given for six months.
 - 4. Recertification for Non-Small Cell Lung Cancer (used in combination with tremelimumab-act] and platinum-based chemotherapy, Small Cell Lung Cancer and Hepatobiliary Cancers will be for six months.

C. Beovu® (brolucizumab-dbll)

Therapeutic Class: Ophthalmic-Macular Degeneration

Last Reviewed by the DUR Board: N/A

Beovu® (brolucizumab-dbll) are subject to PA and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if the following criteria are met and documented
 - a. Recipient is at least 18 years of age; and
 - b. Universal Criteria
 1. Recipient is free of ocular and/or peri-ocular infections; and
 2. Recipient does not have active intraocular inflammation; and
 3. Therapy will not be used with other ophthalmic VEGF inhibitors (i.e., aflibercept, ranibizumab, pegaptanib, bevacizumab, faricimab-svoa, etc.); and
 4. Recipients best corrected visual acuity (BCVA) is measured at baseline and periodically during treatment; and
 5. Recipient has a definitive diagnosis of the following:
 - a. Neovascular (Wet) Age-Related Macular Degeneration (AMD)
 - b. Diabetic Macular Edema (DME)
2. Dosing Limits
 - a. Quantity Limit (max daily dose) [NDC Unit]
 1. Neovascular age-related macular degeneration (AMD):
 - a. Six mg single-dose vial or pre-filled syringe for injection: one vial/syringe per eye every 25 days for three doses initially, then one vial/syringe every eight weeks
 2. Diabetic Macular Edema (DME)
 1. Six mg single-dose vial or pre-filled syringe for injection: one vial/syringe per eye every six weeks for five doses initially, then one vial/syringe every eight weeks.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

3. Neovascular age-related macular degeneration (AMD)
 - a. MU for Initial Dosing
 1. 12 billable units every 25 days x three doses
 - b. MU for Maintenance Dosing
 1. 12 billable units every 56-84 days
 4. Diabetic Macular Edema (DME)
 - a. MU for Initial Dosing
 1. 12 billable units every six weeks x five doses
 - b. MU for Maintenance Dosing
 1. 12 billable units every 56-84 days
3. Recertification Request
- a. Recipient continues to meet the universal and indication-specific relevant criteria as identified in section III; and
 - b. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity: endophthalmitis and retinal detachment, increase in intraocular pressure, arterial thromboembolic events, retinal vasculitis, and/or retinal vascular occlusion etc.; and
 - c. Continued administration is necessary for the maintenance treatment of the condition; and
 - d. Neovascular (Wet) Age-Related Macular Degeneration (AMD)
 1. Recipient has had a beneficial response to therapy (e.g., improvement in the baseline corrected visual acuity (BCVA), etc.)); and
 2. Decreasing the interval of maintenance doses from 12 weeks to eight weeks will be allowed if the recipient has received all three-loading disease and has evidence of disease activity, indicated by one of the following, at (or beyond) treatment week 16:
 - a. Decrease in BCVA of greater than or equal to five letters compared to baseline; or
 - b. Decrease in BCVA of greater than or equal to three letters due to neovascular AMD disease activity compared with week 12; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- c. Decrease in BCVA of greater than or equal to five letters and central subfield thickness greater than or equal to 75 microns compared with week 12; or
 - d. New or worsening intra-retinal cysts or fluid compared with week 12.
 - e. Diabetic Macular Edema (DME)
 - 1. Recipient has had a beneficial response to therapy (e.g., improvement in the baseline best corrected visual acuity (BCVA, etc.); and
 - 2. Decreasing the interval or maintenance doses from 12-weeks to either weeks will be allowed if the recipient has received all five loading doses and has evidence of disease activity, indicated by one of the following, at (or beyond) treatment week 28:
 - a. Decrease in BCVA of greater than or equal to five letters compared to baseline; and
 - b. Increase in central subfield thickness compared to baseline.
- 4. PA Guidelines:
 - a. Initial approval be given for 12 months.
 - b. Recertification will be approved for 12 months.

D. Avastin®; Mvasi®; Zirabev™; Alymsys®; Vegzelma™ (Bevacizumab)

Therapeutic Class: ANP--Human Vascular Endothelial Growth Factor Inhib Rec-MC Antibody
 Last Reviewed by the DUR Board: N/A

Avastin®; Mvasi®; Zirabev™; Alymsys®; Vegzelma™(bevacizumab) are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is at least 18 years of age, unless otherwise specified; and
 - b. Universal Criteria
 1. Recipient has no recent history of hemoptysis (i.e., the presence of greater than or equal to 2.5mL of blood in sputum); and
 2. Recipient must not have had a surgical procedure within the preceding 28 days or have a surgical wound that has not fully healed; and
 - c. Ampullary Adenocarcinoma
 1. Used in combination with a fluoropyrimidine (e.g., five-fluorouracil/five-FU or capecitabine) based regimen for intestinal type disease; and
 - a. Used as first-line therapy for unresectable localized or metastatic disease or as subsequent therapy for disease progression; and
 1. Recipient has poor performance status (ECOG PS 2); or
 2. Recipient has good performance status (ECOG 0-1, with good biliary drainage and adequate nutritional intake) and received prior oxaliplatin-based therapy.
 - d. Adult Central Nervous System (CNS) Cancers
 1. Used for symptom management related to radiation necrosis, poorly controlled vasogenic edema, or mass effect as single-agent short-course therapy; and
 - a. Recipient has a diagnosis of one of the following CNS cancers
 1. Glioma (WHO Grade 1)
 2. Primary CNS Lymphoma

DIVISION OF HEALTH CARE FINANCING AND POLICY

3. Meningiomas
 4. Brain or Spine metastases
 5. Medulloblastoma
 6. Glioblastoma/Gliosarcoma
 7. IDH-mutant Astrocytoma (WHO Grade 2-4)
 8. IDH-mutant, 1p19q co-deleted Oligodendroglioma (WHO Grade 2 or 3)
 9. Intracranial or Spinal Ependymoma (excluding subependymoma); or
2. Used for recurrent disease; and
 - a. Recipient has a diagnosis of one of the following CNS cancers:
 1. IDH-mutant, 1p19q co-deleted Oligodendroglioma (WHO Grade 3)
 2. Glioblastoma/Gliosarcoma
 3. IDH-mutant Astrocytoma (WHO Grade 3 or 4); and
 - b. Used as a single agent; or
 - c. Used in combination with carmustine, lomustine, or temozolomide; and
 1. Recipient has failed bevacizumab monotherapy; or
 3. Used as a single agent for progressive or recurrent Intracranial or Spinal Ependymoma (excluding subependymoma) after prior radiation therapy; or
 4. Used as a single agent for recipients with surgically inaccessible recurrent or progressive Meningioma when radiation is not possible.
 - e. Cervical Cancer
 1. Recipient has persistent, recurrent, or metastatic disease; and
 - a. Disease has adenocarcinoma, adenosquamous, or squamous cell carcinoma histology; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

1. Used in combination with paclitaxel and either cisplatin, carboplatin, or topotecan; or
 2. Used in combination with pembrolizumab, paclitaxel, and cisplatin or carboplatin; and
 - a. Tumor expresses PD-L1 (Combined Positive Score [CPS] greater than or equal to 1) as determined by an FDA-approved or CLIA compliant test; or
 3. Recipient has small cell neuroendocrine carcinoma of the cervix (NECC); and
 - a. Used as subsequent therapy; and
 1. Used in combination with paclitaxel and either cisplatin, carboplatin, or topotecan; or
 2. Used in combination with pembrolizumab, paclitaxel, and cisplatin or carboplatin; and
 - a. Tumor expressed PD-L1 (Combined Positive Score [CPS] greater than or equal to one) as determined by an FDA-approved or CLIA compliant test.
- f. Colorectal Cancer (CRC)
1. Will not be used as part of adjuvant treatment; and
 - a. Used in combination with a fluoropyrimidine (e.g., five-fluorouracil/5-FU or capecitabine) or irinotecan-based regimen as first-line or subsequent therapy for metastatic, unresectable (or medically inoperable), or advanced disease; or
 - b. Used in combination with a fluoropyrimidine-irinotecan-or fluoropyrimidine-oxaliplatin-based regimen (not used first line) as second-line therapy for metastatic disease that has progressed on a first-line bevacizumab-containing regimen; or
 - c. Used in combination with trifluridine and tipiracil as subsequent therapy for advanced or metastatic disease after progression on all available regimens.
- g. Appendiceal Adenocarcinoma – Colon Cancer
1. Used as initial therapy for advanced or metastatic disease; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

- a. Used in combination with a fluoropyrimidine (e.g., 5-fluorouracil/5-FU or capecitabine) based regimen; or
 - 2. Used as subsequent therapy for progression of advanced or metastatic disease; and
 - a. Used in combination with a fluoropyrimidine (e.g., five-fluorouracil/five-FU or capecitabine) or irinotecan-based regimen following previous oxaliplatin-irinotecan-and/or fluoropyrimidine-based therapy; or
 - b. Used in combination with trifluridine and tipiracil after progression on all available regimens.
- h. Endometrial Carcinoma (Uterine Neoplasms)
 - 1. Used as single agent therapy for recurrent or metastatic disease that has progressed or prior cytotoxic chemotherapy; or
 - 2. Used in combination with carboplatin and paclitaxel for advanced and recurrent disease; or
 - 3. Used in combination with paclitaxel and carboplatin as adjuvant therapy; and
 - a. Recipient has advanced and recurrent stage III-IV endometroid adenocarcinoma.
- i. Hepatocellular Carcinoma (HCC)
 - 1. Used as first-line therapy in combination with atezolizumab; and
 - 2. Recipient has Child-Pugh Class A disease; and
 - a. Recipient has unresectable or metastatic disease; or
 - b. Recipient has liver confined disease inoperable by performance status, comorbidity or with minimal or uncertain extrahepatic-disease; or
 - c. Recipient has extensive liver tumor burden.
- j. Malignant Peritoneal Mesothelioma (MPeM)
 - 1. Used as first-line therapy; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- a. Used in combination with pemetrexed and either cisplatin or carboplatin (if cisplatin ineligible) followed by single agent maintenance bevacizumab; and
 - 1. Recipient has unresectable diffuse disease; or
 - 2. Recipient has unresectable recurrent benign multi-cystic or well-differentiated papillary disease; or
 - 2. Used as subsequent therapy; and
 - a. Used in combination with pemetrexed and either cisplatin or carboplatin (if cisplatin ineligible) followed by single agent maintenance bevacizumab; and
 - 1. Immunotherapy was administered as first-line treatment; or
 - b. Used in combination with atezolizumab.
- k. Malignant Pleural Mesothelioma (MPM)
 - 1. Used as first-line therapy; and
 - a. Used in combination with pemetrexed and either cisplatin or carboplatin (if cisplatin ineligible) followed by single agent maintenance bevacizumab; and
 - 1. Recipient has unresectable clinical stage I-IIIa disease and epithelioid histology; or
 - 2. Recipient has clinical stage IIIB or IV disease, sarcomatoid or biphasic histology, or medically inoperable tumors; or
 - 2. Used as subsequent therapy; and
 - b. Used in combination with pemetrexed and either cisplatin or carboplatin (if cisplatin ineligible); and
 - c. Immunotherapy was administered as first-line treatment.
- l. Non-Squamous Non-Small Cell Lung Cancer (NSCLC)
 - 1. Used for recurrent, advanced, or metastatic disease (excluding locoregional recurrence or symptomatic local disease with no evidence of disseminated disease) or mediastinal lymph node recurrence with prior radiation therapy; and
 - a. Used as first-line therapy; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

1. Used in combination with erlotinib for EGFR exon 19 deletion or L858R mutations; or
2. Used for one of the following:
 - a. Recipients with a performance status (PS) less than or equal to one who have tumors that are negative for actionable molecular biomarkers and PD-L1 expression less than one percent; or
 - b. PD-L1 expression positive tumors (PD-L1 greater than or equal to one percent) that are negative for actionable molecular biomarkers; or
 - c. Recipients with a PS less than or equal to one who are positive for one of the following molecular biomarkers: EGFR exon 20, KRAS G12C, BRAF V600E, NTRK1/2/3 gene fusion, MET exon 14 skipping, RET rearrangement, or ERBB2 (HER2); and
3. Used in combination with one of the following:
 - a. Carboplatin and paclitaxel; or
 - b. Pemetrexed and either carboplatin or cisplatin in recipients with contraindications to PD-1 or PD-L1 inhibitor
 - c. Atezolizumab, carboplatin, and paclitaxel; or
- b. Used for subsequent therapy in recipients with a PS less than or equal to one; and
 1. Used for one of the following:
 - a. EGFR exon 19 deletion or L858R mutation, EGFR S768I, L861Q, and/or G719X mutation, ALK rearrangement, or ROS1 rearrangement positive tumors and recipient received prior targeted therapy for those aberration
 - b. BRAF V600E mutation, NTRK1/2/3 gene fusion, MET exon 14 skipping mutation or RET rearrangement positive tumors
 - c. PD-L1 expression-positive (PD-L1 greater than or equal to one percent) tumors that are negative for

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

actionable molecular biomarkers with prior PD-1/PD-L1 inhibitor therapy but no prior platinum-containing chemotherapy; and

2. Used in combination with one of the following:
 - a. Carboplatin and paclitaxel in recipient with contraindications to PD-1 or PD-L1 inhibitors
 - b. Pemetrexed and either carboplatin or cisplatin in recipients with contraindications to PD-1 or PD-L1 inhibitors
 - c. Atezolizumab, carboplatin, and paclitaxel (excluding use in recipients who have received prior PD-1/PD-L1 inhibitor therapy or who have EGFR exon 19 deletions or L858R mutations or ALK rearrangement positive tumors); or
- c. Used as continuation maintenance therapy (bevacizumab must have been included in the recipients first-line chemotherapy regimen) in recipients who achieved a tumor response or stable disease after first-line systemic therapy; and
 1. Used as a single agent; or
 2. Used in combination with pemetrexed following a first-line bevacizumab/pemetrexed/platinum chemotherapy regimen; or
 3. Used in combination with atezolizumab following a first line atezolizumab/carboplatin/paclitaxel/bevacizumab regimen; or
- d. Used as continuation of therapy following disease progression on erlotinib with bevacizumab; and
 1. Recipient has asymptomatic disease, symptomatic brain lesions, or symptomatic systemic limited metastases; and
 2. Recipient has T790M negative disease.
- m. Ovarian Cancer/Fallopian Tube Cancer/Primary Peritoneal Cancer
 1. Recipient has malignant stage II-IV sex cord-stromal tumors
 - a. Used a single agent therapy for clinically relapsed disease; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Recipient has epithelial ovarian, fallopian tube, or primary peritoneal cancer; and
 - b. Recipient has persistent or recurrent disease; and
 1. Bevacizumab has not been used previously; and
 2. Recipient is not experiencing an immediate biochemical relapse (i.e., rising CA-125 without radiographic evidence of disease); and
 - a. Recipient has platinum sensitive disease; and
 1. Used as a single agent; or
 2. Used in combination niraparib; or
 3. Used in combination with carboplatin and either gemcitabine, paclitaxel, or PEGylated liposomal doxorubicin; or
 - b. Recipient has platinum resistant disease; and
 1. Used as a single agent; or
 2. Used in combination with one of the following: oral cyclophosphamide, PEGylated liposomal doxorubicin, paclitaxel, or topotecan; or
 - c. Used in combination with paclitaxel and carboplatin for rising CA-125 levels or clinical relapse in recipients who have received no prior chemotherapy; or
 - d. Used as maintenance therapy; and
 1. Used following primary therapy including bevacizumab; and
 - a. Used as a single agent in recipients that are BRCA1/2 wild-type or unknown and homologous recombination (HR) proficient or status unknown (grade 2/3 endometrioid and high-grade serous histology only); or
 - b. Used in combination with Olaparib; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

1. Recipient is BRCA1/2 wild-type or unknown and HR deficient (grade 2/3 endometrioid and high-grade serous histology only), or
 2. Recipient has a germline or somatic BRCA1/2 mutation (grade 2/3 endometrioid, high grade serous, clear cell, carcinosarcoma histology only), or
2. Used a single agent following recurrence therapy with chemotherapy plus bevacizumab for platinum-sensitive disease; or
 3. Used in combination with paclitaxel and carboplatin for stable disease following neoadjuvant therapy as continued treatment (grade 2/3 endometrioid and high-grade serous histology only); or
- e. Used as neoadjuvant therapy in combination with paclitaxel and carboplatin (grade 2/3 endometrioid and high-grade serous histology only); and
1. Recipient is a poor surgical candidate or has a low likelihood of optimal cytoreduction; or
- f. Used as adjuvant therapy in combination with paclitaxel and carboplatin; and
1. Recipient has pathologic stage II-IV disease; or
 2. Used after interval debulking surgery (IDS) in recipients with a response or stable disease to neoadjuvant therapy (grade 2/3 endometrioid and high-grade serous histology only); and
 - a. Recipient is a poor surgical candidate or has a low likelihood of optimal cytoreduction.
- n. Pediatric Central Nervous System (CNS) Cancers
1. Recipient is less than or equal to 18 years of age; and
 2. Recipient has diffuse high-grade glioma; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

3. Used for palliation of recurrent or progressive disease (excluding oligodendroglioma, IDH-mutant and 1p/19q co-deleted or astrocytoma IDH-mutant).
- o. Renal Cell Carcinoma (RCC)
 1. Used in combination with interferon alfa for metastatic disease; or
 2. Recipient has metastatic or relapsed disease with non-clear cell histology; and
 - a. Used as a single agent; or
 - b. Used in combination with everolimus; or
 - c. Used in combination with erlotinib in recipients with advanced papillary disease including hereditary leiomyomatosis and renal cell carcinoma (HLRCC)-associated RCC.
- p. Small Bowel Adenocarcinoma
 1. Recipient has advanced or metastatic disease; and
 2. Used in combination with fluoropyrimidine-based regimen.
- q. Soft Tissue Sarcoma
 1. Used as a single agent for angiosarcoma; or
 2. Used in combination with temozolomide for solitary fibrous tumor.
- r. Vulvar Cancer
 1. Used in combination with paclitaxel and cisplatin; and
 2. Recipient has squamous cell carcinoma or adenocarcinoma; and
 3. Recipient has unresectable, locally advanced, metastatic, or recurrent disease.
2. Dosage Limits
 - a. Quantity Limit (max daily dose) [NDC Unit]:
 1. 100 mg/4 mL single-dose vial: three vials 21 days
 2. 400 mg/16 mL single-dose vial: four vials per 21 days

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- b. Max Units (per dose and over time) [HCPCS Unit]:
 - 1. Oncology Indications (J9035/Q5107/Q5118/J999/Q5126):
 - a. Small Bowel Adenocarcinoma/Ampullary Adenocarcinoma:
 - 1. 60 billable units per 14 days
 - b. NSCLC, Cervical Cancer, HCC, Vulvar Cancer, MPM, & MPeM:
 - 1. 170 billable units per 21 days
 - c. All other indications:
 - 1. 120 billable units per 14 days
- 3. Recertification Request:
 - a. Recipient continues to meet the universal and other indication-specific relevant criteria such as concomitant therapy requirements (not including prerequisite therapy), performance status, etc. identified in Section III; and
 - b. Disease response with treatment as defined by stabilization of disease or decrease in size of tumor or tumor spread; and
 - c. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: gastrointestinal perforations and fistulae, surgical/wound healing complications, necrotizing fasciitis, hemorrhage, arterial and venous thromboembolic events (ATE & VTE), uncontrolled hypertension, posterior reversible encephalopathy syndrome (PRES), nephrotic syndrome, proteinuria, severe infusion-related reactions, ovarian failure, congestive heart failure (CHF), etc.; and
 - d. Adult CNS Cancers – symptom management (short-course therapy):
 - 1. Coverage may not be renewed
 - e. Adult CNS Cancers – Oligodendroglioma, Glioblastoma, or Astrocytoma (in combination with carmustine, lomustine, or temozolomide):
 - 1. Refer to Section III for criteria
 - f. Colorectal Cancer (after first-line bevacizumab-containing regimen):
 - 1. Refer to Section III for criteria
 - g. MPM and MPeM (maintenance therapy):

DIVISION OF HEALTH CARE FINANCING AND POLICY

E. Darzalex® (daratumumab)

Therapeutic Class: Antineoplastic

Last Reviewed by the DUR Board: N/A

Darzalex® (daratumumab) are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if the following criteria are met and documented
 - a. Recipient is at least 18 years of age; and
 - b. Universal Criteria
 1. Therapy will not be used in combination with other anti-CD38 therapies (i.e., daratumumab and hyaluronidase-fihj, isatuximab, etc.); and
 - c. Multiple Myeloma
 1. Used in the treatment of newly diagnosed disease in recipients who are eligible for autologous stem cell transplant (ASCT) in combination with one of the following regimens:
 - a. Lenalidomine and dexamethasone; or
 - b. Bortezomib, melphalan, and prednisone; or
 - c. Cyclophosphamide, bortezomib, and dexamethasone; or
 2. Used in the treatment of newly diagnosed disease in recipient who are eligible for autologous stem cell transplant (ASCT) in combination with one of the following regimens:
 - a. Bortezomib, lenalidomide, and dexamethasone; or
 - b. Bortezomib, thalidomide, and dexamethasone (VTd); or
 - c. Carfilzomib, lenalidomide, and dexamethasone; or
 - d. Cyclophosphamide, bortezomib, and dexamethasone; or
 3. Used for disease relapse after six months following primary induction therapy with the same regimen in combination with one of the following regimens:
 - a. Lenalidomide and dexamethasone for non-transplant candidates; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- b. Cyclophosphamide, bortezomib, and dexamethasone; or
- 4. Used as subsequent therapy for relapsed or refractory/progressive disease in combination with dexamethasone and one of the following:
 - a. Lenalidomide; or
 - b. Bortezomib; or
 - c. Carfilzomib; or
 - d. Cyclophosphamide and bortezomib; or
 - e. Selinexor; or
- 5. Used in combination with pomalidomide and dexamethasone after at least two prior therapies including lenalidomide and a proteasome inhibitor (bortezomib, carfilzomib, etc.); or
- 6. Used as single agent therapy; and
 - a. Recipient received at least three prior lines of therapy including a proteasome inhibitor (e.g., bortezomib, carfilzomib, etc.) and an immunomodulatory agent (e.g., lenalidomide, pomalidomide, etc.); or
 - b. Recipient is double refractory to a proteasome inhibitor and immunomodulatory agent; or
- 7. Used as maintenance therapy for symptomatic disease in transplant candidates; and
 - a. Used as single agent therapy; and
 - 1. Used after response to primary myeloma therapy; or
 - 2. Used for response or stable disease following an autologous hematopoietic cell transplant (HCT); or
 - 3. Used for response or stable disease following a tandem autologous or allogeneic HCT for high-risk patients.
- d. Systemic Light Chain Amyloidosis
 - 1. Used as single agent therapy; and
 - 2. Used for the treatment of relapsed/refractory disease.

2. Dosage Limits

a. Quantity Limit (max daily dose) [NDC Unit]:

1. Darzalex 100 mg single dose vial for injection: up to three vials per dose

a. Weekly Weeks 1 to 8, then every two weeks 9-24, then every four weeks-week 25 onwards; or

2. Darzalex 400 mg single dose vial for injections: up to four vial per dose

a. Weekly weeks one to eight, then every two weeks 9-24, then every four weeks – week 25 onwards; or

b. Max Units (per dose and over time) [HCPCS Unit]:

1. Up to 180 billable units per dose

a. Weekly week one to eight, then every two weeks, week 9-24, then every four weeks – week 25 onwards.

c. Max Units (per dose and over time) [HCPCS Unit]:

1. Up to 180 billable units per dose

a. Weekly week one to eight, then every two weeks, week 9-24, then every four weeks – week 25 onwards.

3. Recertification Request

a. Recipient continues to meet universal and other indication-specific relevant criteria such as concomitant therapy requirements (not including prerequisite therapy), performance status, etc. identified in section III: and

b. Disease response with treatment as defined by stabilization of disease or decrease in size of tumor or tumor spread; and

c. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: severe infusion reactions including anaphylactic reactions, neutropenia, thrombocytopenia, etc.; and

d. Multiple Myeloma

1. Use for newly diagnosed disease in combination with bortezomib, thalidomide, and dexamethasone may not be renewed.

DIVISION OF HEALTH CARE FINANCING AND POLICY

G. Elaprase® (idursulfase)

Therapeutic Class: Lysosomal Enzymes

Last Reviewed by the DUR Board: N/A

Elaprase® (idursulfase) are subject to PA and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is at least 16 months of age; and
 - b. Documented baseline age-appropriate values for one or more of the following have been obtained:
 1. Recipients five years of age or greater: six-minute walk test (6MWT), percent predicted forced vital capacity (FVC), joint range of motion, left ventricular hypertrophy, growth, quality of life (CHAQ/HAQ/MPS HAQ), and/or urinary glycosaminoglycan (uGAG); and
 2. Recipients 16 months to less than five years of age: spleen volume, liver volume, FVC, six-MWT, and/or urinary glycosaminoglycan (uGAG); and
 - c. Universal Criteria
 1. Recipient does not have severe cognitive impairment; and
 2. Recipient has a definitive diagnosis of MPS II as confirmed by one of the following:
 - a. Deficient or absent iduronate 2-sulfate (I2S) enzyme activity in white cells, fibroblasts, or plasma in the presence of normal activity of at least one other sulfatase; or
 - b. Detection of pathogenic mutations in the IDS gene by molecular genetic testing.
2. Dose Limits
 - a. Quantity Limit (max daily dose) [NDC Unit]:
 1. Elaprase six mg/three mL vial: 10 vials per seven days.
 - b. Max Units (per dose and over time) [HCPCS Unit]:
 2. 60 billable units every seven days.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

3. Recertification Request

- a. Recipient continues to meet the universal and other indication-specific relevant criteria such as concomitant therapy requirements (not including prerequisite therapy), performance status, etc. identified in section III; and
- b. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include severe hypersensitivity reactions including anaphylaxis, antibody development and serious adverse reactions in Hunter Syndrome recipients with severe genetic mutations, acute respiratory complications, acute cardiorespiratory failure, etc.; and
- c. Recipient has demonstrated a beneficial response to therapy compared to pretreatment age-appropriate baseline values in one or more of the following:
 - 1. Recipients five years of age or greater: stabilization or improvement in percent predicted FVC and/or six-MWT, increased joint range of motion, decreased left ventricular hypertrophy, improved growth, improved quality of life (clinically meaningful change in the CHAQ/HAQ/MPS HAQ disability index), and/or uGAG levels; or
 - 2. Recipients 16 months to less than five years of age: reductions in spleen volume and/or liver volume or stabilization/improvement in FVC and/or 6-MWT, and/or uGAG levels.

4. PA Guidelines:

- a. Initial approval will be given for 12 months.
- b. Recertification will be given for 12 months.

H. Eylea® (aflibercept)

Therapeutic Class: Anti-angiogenic ophthalmic agents

Last Reviewed by the DUR Board: N/A

Eylea® (aflibercept) are subject to PA and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is at least 18 years of age; and
 - b. Universal Criteria
 1. Recipient is free of ocular and/or peri-ocular infections; and
 2. Recipient does not have active intraocular inflammation; and
 3. Therapy will not be used with other ophthalmic VEGF inhibitors (i.e., brolocizumab-dbl, ranibizumab, pegaptanib, bevacizumab, faricimab-svoa, etc.); and
 4. Recipients best corrected visual activity (BCVA) is measured at baseline and periodically during treatment; and
 5. Recipient has a definitive diagnosis of one of the following:
 - c. Neovascular (Wet) Age-Related Macular Degeneration (AMD)
 - d. Macular Edema following Retinal Vein Occlusion (RVO)
 - e. Diabetic Macular Edema (DME)
 - f. Diabetic Retinopathy (DR)
2. Dosage Limit
 - a. Quantity Limit (max daily dose) [NDC Unit]:
 - a. 2 mg injection: one vial per eye every 28 days.
 - b. Max Units (per dose and over time) [HCPCS Unit]:
 1. Diagnosis
 - a. Neovascular age-related macular degeneration (AMD)

I. Immune Globulins (immunoglobulin)

Therapeutic Class: Immune Globulins

Last Reviewed by DUR Board: N/A

Immune Globulins (immunoglobulin) are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if all the following criteria are met and documented:
 - a. Baseline valyes for BUN and serum creatinine within 30 days of request; and
 - b. Primary immunodeficiency (PID)/Wiskott – Aldrich Syndrome
 1. Such as: x-linked agammaglobulinemia, common variable immunodeficiency, transient hypogammaglobulinemia of infancy, IgG subclass deficiency with or without IgA deficiency, antibody deficiency with near normal immunoglobulin levels, and combined deficiencies (severe combined immunodeficiencies, ataxia-telangiectasia, x-linked lymphoproliferative syndrome) [list not all inclusive].
 - a. Recipients IgG level is less than 200 mg/dL or both of the following:
 1. Recipient has a history of multiple hard to treat infections as indicated by at least one of the following:
 - a. Four or more ear infections within one year; or
 - b. Two or more serious sinus infections; or
 - c. Two or more months of antibiotics with little effect; or
 - d. Two or more pneumonias within one year; or
 - e. Recurrent or deep skin abscesses; or
 - f. Need for intravenous antibiotics to clear infections; or
 - g. Two or more deep-seated infections including septicemia; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. The recipient has a deficiency in producing antibodies in response to vaccination; and
 - a. Titers were drawn before challenging with vaccination; and
 - b. Titers were drawn between four and eight weeks of vaccination.
- c. IgG Subclass Deficiency
 1. Recipient's IgG level is less than 400 mg/dL; and
 2. Recipient has a history of recurrent infections; and
 3. Recipient is receiving prophylactic antibiotic therapy.
- d. Immune thrombocytopenia/Idiopathic thrombocytopenia purpura (ITP)
 1. For acute disease state:
 - a. To manage acute bleeding due to severe thrombocytopenia (platelet count less than $30 \times 10^9/L$); or
 - b. To increase platelet counts prior to invasive surgical procedures such as splenectomy (platelet count less than $20 \times 10^9/L$).
 - c. Authorization will be given for one month only and cannot be renewed.
 2. Chronic Immune Thrombocytopenia (CIT)
 - a. The recipient is at increased risk for bleeding as indicated by a platelet count less than $30 \times 10^9/L$; and
 - b. History of failure, contraindication, or intolerance to corticosteroids; and
 - c. Duration of illness greater than six months.
- e. Chronic Inflammatory Demyelination Polyneuropathy (CIDP)
 1. Recipient's disease course is progressive or relapsing and remitting for greater than two months; and
 2. Recipient has abnormal or absent deep tendon reflexes in upper or lower limbs; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

3. Electrodiagnostic testing indicating demyelination:
 - a. Partial motor conduction block in at least two motor nerves or in one nerve plus one other demyelination criterion listed here in at least one other nerve; or
 - b. Distal CMAP duration increase in at least one nerve plus one other demyelination criterion listed here in at least one other nerve; or
 - c. Abnormal temporal dispersion conduction must be present in at least two motor nerves; or
 - d. Reduced motor conduction velocity in at least two motor nerves; or
 - e. Prolonged distal motor latency in at least two motor nerves; or
 - f. Absent F wave in at least two motor nerves plus one other demyelination criterion listed here in at least one other nerve; or
 - g. Prolonged F wave latency in at least two motor nerves; and
 4. Recipient is refractory or intolerant to corticosteroids (e.g., prednisolone, prednisone, etc.) given in therapeutic doses over at least three months; and
 5. Baseline in strength/weakness has been documented using an objective clinical measuring tool (e.g., INCAT, Medical Research Council (MRC) muscle strength, 6-MWT, Rankin, Modified Rankin, etc.).
 6. Initial approval will be given for three months.
- f. Guillain-Barre Syndrome (Acute inflammatory polyneuropathy)
1. Recipient has severe disease (i.e., recipient requires assistance to ambulate); and
 2. Onset of symptoms are recent (i.e., less than one month); and
 3. Recipient has abnormal or absent deep tendon reflexes in upper or lower limbs; and
 4. Recipient has diagnosis is confirmed using a cerebrospinal fluid (CSF) analysis; and
 5. Approval will be granted for a maximum of two rounds of therapy within six weeks of onset.
 6. Initial approval will be given for two months only and cannot be renewed.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

g. Multifocal Motor Neuropathy

1. Recipient has progressive, focal, asymmetric limb weakness (without sensory symptoms) for greater than one month; and
2. Recipient has complete or partial conduction block or abnormal temporal dispersion conduction in at least two motor nerves; and
3. Recipient has normal sensory nerve conduction on all nerves tested; and
4. Baseline in strength/weakness has been documented using an objective clinical measuring tool (e.g., INCAT, Medical Research Council (MRC) muscle strength, 6-MWT, Rankin, Modified Rankin, etc.).
5. Initial approval will be given for three months.

h. HIV infected children: Bacterial control or prevention

1. Recipient age does not exceed 13 years of age; and
2. Recipients IgG level is less than 400 mg/dL.

i. Myasthenia Gravis

1. Recipient has a positive serologic test for anti-acetylcholine receptor (AChR) antibodies; and
2. Recipient has an acute exacerbation resulting in impending myasthenic crisis (i.e., respiratory compromise, acute respiratory failure, and/or bulbar compromise); and
3. Recipient is failing on conventional immunosuppressant therapy alone (e.g., corticosteroids, azathioprine, cyclosporine, mycophenolate, methotrexate, tacrolimus, cyclophosphamide, etc.); and
4. Recipient will be on combination therapy with corticosteroids or other immunosuppressant (e.g., azathioprine, mycophenolate, cyclosporine, methotrexate, tacrolimus, cyclophosphamide, etc.).
5. Initial approval will be valid for one course (one month) only and cannot be renewed.

j. Dermatomyositis/Polymyositis

1. Recipient has severe active disease; and
2. Recipient has proximal weakness in all upper and/or lower limbs; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

3. Diagnosis has been confirmed by muscle biopsy; and
 4. Recipient has failed a trial of corticosteroids (i.e., prednisone); and
 5. Recipient has failed a trial of an immunosuppressant (e.g., methotrexate, azathioprine, etc.); and
 6. Must be used as part of combination therapy with other agents; and
 7. Recipient has a documented baseline physical exam and muscular strength/function.
 8. Initial approval will be given for three months.
- k. Complications of transplanted solid organ (kidney, liver, lung, heart, pancreas), and bone marrow transplant
1. Suppression of panel reactive anti-human leukocyte antigen (HLA) antibodies prior to transplantation.
 2. Treatment of antibody-mediated rejection of solid organ transplantation.
 3. Prevention or treatment of viral infections (e.g., cytomegalovirus, Parvo B-19 virus, and Polyoma BK virus).
- l. Stiff-Person Syndrome
1. Recipient has anti-glutamic acid decarboxylase (GAD) antibodies; and
 2. Recipient has failed at least two of the following treatments: benzodiazepines, baclofen, gabapentin, valproate, tiagabine, or levetiracetam; and
 3. Recipient has a documented baseline on physical exam.
- m. Allogeneic Bone Marrow or Stem Cell Transplant
1. Used for prevention of acute Graft-Versus-Host-Disease (aGVHD) or infection; and
 2. Recipient's bone marrow (BMT) or hematopoietic stem cell (HSCT) transplant was allogeneic; and
 3. Recipients IgG level is less than 400 mg/dL.
 4. Initial approval will be given for three months.
- n. Kawasaki's Disease

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

1. Initial approval will be valid for one course (one month) only and cannot be renewed.
- o. Fetal Alloimmune Thrombocytopenia (FAIT)
1. Recipient has a history of one or more of the following:
 - a. Previous FAIT pregnancy; or
 - b. Family history of the disease.
 - c. Screening reveals platelet alloantibodies.
 2. Initial approval will be given through the delivery date only and cannot be renewed.
- p. Neonatal Alloimmune Thrombocytopenia (NAIT)
1. Initial approval will be valid for one course (one month) only and cannot be renewed.
- q. Auto-immune Mucocutaneous Blistering Diseases
1. Recipient has been diagnosed with one of the following:
 - a. Pemphigus Vulgaris
 - b. Pemphigus Foliaceus
 - c. Bullous Pemphigoid
 - d. Mucous Membrane Pemphigoid (a.k.a. Cicatricial Pemphigoid)
 - e. Epidermolysis Bullosa Aquisita
 - f. Pemphigus Gestationis (Herpes gestationis)
 - g. Linear IgA Dermatosis; and
 2. Recipient has severe disease that is extensive and debilitating; and
 3. Diagnosis has been confirmed by biopsy; and
 4. Recipient's disease is progressive; and
 5. Disease is refractory to a trial of conventional therapy with corticosteroids and concurrent immunosuppressive treatment (e.g., azathioprine, cyclophosphamide, mycophenolate mofetil, etc.); and

DIVISION OF HEALTH CARE FINANCING AND POLICY

6. Recipient has a documented baseline on physical exam.
- r. Acquired Immune Deficiency secondary to Acute Lymphoblastic Leukemia (ALL)
 1. Used for prevention of infection; and
 2. Recipient's IgG level is less than 400 mg/dL.
- s. Acquired Immune Deficiency secondary to Chronic Lymphocytic Leukemia or Multiple Myeloma
 1. Recipients IgG level is less than 200 mg/dL or both of the following:
 - a. Recipient has a history of multiple hard to treat infections as indicated by at least one of the following:
 1. Four or more ear infections within one year; or
 2. Two or more serious sinus infections within one year; or
 3. Two or more months of antibiotics with little effect; or
 4. Two or more pneumonias within one year; or
 5. Recurrent or deep skin abscesses; or
 6. Need for intravenous antibiotics to clear infections; or
 7. Two or more deep-seated infections including septicemia; and
 - b. The recipient has a deficiency in producing antibodies in response to vaccination: and
 1. Titers were drawn before challenging with vaccination; and
 2. Titers were drawn between four and eight weeks of vaccination.
- t. Toxic Shock Syndrome
 1. Initial approval be given for one course (one month) only and cannot be renewed.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

u. Management of Immune-Checkpoint-Inhibitor Related Toxicity

1. Recipient has been receiving therapy with immune checkpoint inhibitor (e.g., nivolumab, pembrolizumab, atezolizumab, avelumab, durvalumab, dostarlimab, etc.); and
2. Recipient has one of the following toxicities related to their immunotherapy:
 - a. Severe (G3) or life-threatening (G4) bullous dermatitis as an adjunct to rituximab
 - b. Stevens-Johnson Syndrome (SJS)
 - c. Toxic epidermal necrolysis (TEN)
 - d. Severe (G3-4) myasthenia gravis
 - e. Transverse myelitis
 - f. Myocarditis as further intervention if no improvement within 24-48 hours of starting pulse-dose methylprednisolone
 - g. Moderate (G2) or severe (G3-4) Guillain-Barre Syndrome or severe (G3-4) peripheral neuropathy used in combination with pulse-dose methylprednisolone
 - h. Moderate (G2) pneumonitis if no improvement after 48-72 hours of corticosteroids
 - i. Severe (G3-4) pneumonitis if no improvement after 48 hours of methylprednisolone
 - j. Encephalitis used in combination with pulse-dose methylprednisolone for severe or progressing symptoms or if oligoclonal bands are present
 - k. Moderate, severe, or life-threatening steroid-refractory myalgias or myositis

v. Management of CAR T-Cell-Related Toxicity

1. Recipient has been receiving treatment with anti-CD19 chimeric antigen receptor (CAR) T-cell therapy (e.g., axicabtagene ciloleucel, brexucabtagene autoleucel, idecabtagene vicleucel, lisocabtagene, maraleucel, tisagenlecleucel, etc.); and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- a. Used for the management of G4 cytokine release syndrome that is refractory to high-dose corticosteroids and anti-IL-6 therapy (e.g., tocilizumab); or
 - b. Recipient has hypogammaglobulinemia as confirmed by serum IgG levels less than 600 mg/dL and serious, persistent, or recurrent bacterial infections; or
 - 1. Used as prophylactic therapy prior to receiving treatment with anti-CD19 chimeric antigen receptor (CAR) T-cell therapy (e.g., axicabtagene ciloleucel, brexucabtagen autoleucel, idecabtagene vicleucel, lisocabtagene maraleucel, tisagenlecleucel, etc.); and
 - 2. Recipient has hypogammaglobulinemia as confirmed by serum IgG levels less than or equal to 400 mg/dL and serious persistent, or recurrent bacterial infections.
 - w. Supportive Care after Rethymic transplant
 - 1. Used as immunoglobulin replacement therapy in pediatric recipients with congenital athymia after surgical implantation of Rethymic; or
 - 2. Used as re-initiation of treatment two months after stopping immunoglobulin replacement therapy in pediatric recipients who have an IgG trough level lower than normal range for age.
- 2. Dosage Limits
 - a. Dosing should be calculated using adjusted body weight if one or more following criteria are met:
 - 1. Recipient's body mass index (BMI) is 30 kg/m(2) or more; or
 - 2. Recipient's actual body weight is 20% higher than his or her ideal body weight (IBW).
- 3. Recertification Request:
 - a. Recipient continues to meet indication-specific relevant criteria identified in section III; and
 - b. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include renal dysfunction and acute renal failure, thrombosis, hemolysis, severe hypersensitivity reactions, pulmonary adverse reactions/transfusion-related acute lung injury (TRALI), hyperproteinemia, increased serum viscosity, hyponatremia, aseptic meningitis syndrome, hypertension, volume overload, etc.; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- c. BUN and serum creatinine have been obtained within the last six months and the concentration and rate of infusion have been adjusted accordingly; and
- d. Recipient meets the disease-specific criteria identified below:
- e. Primary Immunodeficiency (PID)
 - 1. Disease response as evidence by one or more of the following:
 - a. Decrease in the frequency of infection.
 - b. Decrease in the severity of infection.
- f. IgG Subclass Deficiency
 - 1. Disease response as evidenced by one or more of the following:
 - a. Decrease in the frequency of infection
 - b. Decrease in the severity of infection; and
 - 2. Recipient is at a decreased risk of infection as a result of treatment necessitating continued therapy.
- g. Chronic Immune Thrombocytopenia/ITP
 - 1. Disease response as indicated by the achievement and maintenance of a platelet count of greater than or equal to $30 \times 10^9/L$ and at least doubling the baseline platelet count.
- h. Chronic Inflammatory Demyelinating Polyneuropathy
 - 1. Renewals will be authorized for recipients that have demonstrated a clinical response to therapy based on an objective clinical measuring tool (e.g., INCAT, Medical Research Council (MRC) muscle strength, 6-MWT, Rankin, Modified Rankin, etc.).
- i. Guillain-Barre Syndrome (Acute Inflammatory polyneuropathy)
 - 1. May not be renewed.
- j. Multifocal Motor Neuropathy
 - 1. Renewals will be authorized for recipients that have demonstrated a clinical response to therapy based on an objective clinical measuring tool (e.g., INCAT, Medical Research Council (MRC) muscle strength, 6-MWT, Rankin, Modified Rankin, etc.).

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- k. HIV infected children: Bacterial control or prevention
 - 1. Disease response as evidenced by one or more of the following:
 - a. Decrease in the frequency of infection
 - b. Decrease in the severity of infection; and
 - 2. Recipient continues to be at an increased risk of infection necessitating continued therapy as evidenced by an IgG level less than 400 mg/dL.
- l. Myasthenia Gravis
 - 1. May not be renewed.
- m. Dermatomyositis/Polymyositis
 - 1. Recipient had an improvement from baseline on physical exam and/or muscular strength and function.
- n. Complications of transplanted solid organ (kidney, liver, lung, heart, pancreas), and bone marrow transplant
 - 1. Disease response as evidenced by one or more of the following:
 - a. Decrease in the frequency of infection
 - b. Decrease in the severity of infection; and
 - 2. Recipient is at a decreased risk of infection as a result of treatment necessitating continued therapy.
- o. Stiff Person Syndrome
 - 1. Documented improvement from baseline on physical exam.
- p. Allogeneic Bone Marrow or Stem Cell Transplant
 - 1. Patients IgG trough is less than 400 mg/dL.
- q. Kawasaki's Disease
 - 1. May not be renewed.
- r. Fetal Alloimmune Thrombocytopenia (FAIT)

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

1. Authorization is valid through the delivery date only and cannot be renewed.
- s. Neonatal Alloimmune Thrombocytopenia
 1. May not be renewed.
- t. Auto-Immune Mucocutaneous Blistering Diseases
 1. Documented improvement from baseline on physical exam.
- u. Acquired Immune Deficiency secondary to Acute Lymphoblastic Leukemia (ALL), Chronic Lymphocytic Leukemia (CLL), or Multiple Myeloma
 1. Disease response as evidenced by one or more of the following:
 - a. Decrease in the frequency of infection
 - b. Decrease in the severity of infection; and
 2. Recipient is at a decreased risk of infection as a result of treatment necessitating continued therapy.
- v. Toxic Shock Syndrome
 1. May not be renewed.
- w. Management of Immune Checkpoint Inhibitor related Toxicity
 1. May not be renewed.
- x. Management of CAR T-Cell-Related Toxicity
 1. Recipient is still receiving treatment with anti-CD19 CAR T-cell therapy (e.g., axicabtagene ciloleucel, brexucabtagene autoleucel, lisocabtagene maraleucel, tisagenlecleucel, etc.); and
 2. Recipient has serum IgG levels less than 600 mg/dL.
- y. Supportive Care after Rethymic transplant
 1. Renewals for use as initial immunoglobulin replacement therapy will be authorized until all of the following criteria are met:
 - a. Recipient is no longer on immunosuppression (at least ten percent of CD3+ T cells are naïve in phenotype); and
 - b. Recipient is at least nine months post-treatment; and

DIVISION OF HEALTH CARE FINANCING AND POLICY
MEDICAID SERVICES MANUAL

- c. Recipient’s phytohemagglutinin (PHA) response within normal limits; or
 - 2. Renewals for use as re-initiation of treatment after stopping immunoglobulin replacement therapy for recipients with an IgG trough level lower than normal range will be continued for one year before being retested using the above guidelines.
- 4. Prior Authorization Guidelines:
 - a. Initial and renewal authorization periods vary by specific covered indication.
 - b. Unless otherwise specified, the initial approval will be given for six months.
 - c. Recertification will be approved for 12 months.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

J. Antineoplastic-Anti-Programmed Cell Death Receptor-1 (PD-1)

Therapeutic Class: Antineoplastic-Anti-Programmed Cell Death Receptor-1 (PD-1)

Last Reviewed by DUR Board: N/A

Antineoplastic-Anti-Programmed Cell Death Receptor-1 (PD-1) are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Jemperli® (dostarlimab-gwly)

a. Approval will be given if the following criteria are met and documented:

1. Recipient is at least 18 years of age; and

2. Universal Criteria

a. Recipient has not received previous therapy with a programmed death (PD-1/PD-L1)-directed therapy (e.g., cemiplimab, avelumab, nivolumab, atezolizumab, durvalumab, pembrolizumab, nivolumab/relatlimab-rmbw, etc.), unless otherwise specified; and

3. Mismatch Repair Deficient (dMMR/Microsatellite Instability-High (MSI-H) Cancer

a. Recipient has mismatch repair deficient (dMMR) or microsatellite instability-high (MSI-H) cancer as determined by an FDA-approved or CLIA-compliant test; and

b. Used as a single agent; and

c. Recipient has, but is not limited to, one of the following cancers:

1. Endometrial Carcinoma

a. Recipient does not have endometrial sarcoma (excluding carcinosarcoma); and

b. Used for advanced or recurrent disease; and

c. Disease has progressed on or following prior treatment with a platinum-containing regimen.

2. Ampullary Adenocarcinoma

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- a. Used as subsequent therapy for recurrent or advance disease; and
 - b. Disease has progressed on or following prior treatment; and
 - c. Recipient has no satisfactory alternative treatment options.
- 3. Breast Cancer
 - a. Used for recurrent unresectable or metastatic disease; and
 - b. Disease has progressed on or following prior treatment; and
 - c. Recipient has no satisfactory alternative treatment options.
- 4. Appendiceal Adenocarcinoma – Colon Cancer
 - a. Used as subsequent therapy for advanced or metastatic disease; and
 - b. Disease has progressed following treatment with oxaliplatin-, irinotecan- and/or fluoropyrimidine-based therapy.
- 5. Colorectal Cancer (CRC)
 - a. Used as subsequent therapy for advanced or metastatic disease; and
 - b. Disease has progressed following treatment with oxaliplatin-, irinotecan- and/or fluoropyrimidine-based therapy.
- 6. Esophageal and Esophagogastric Junction Cancer
 - a. Used as subsequent therapy for recipients who are not surgical candidates or who have unresectable locally advanced, recurrent, or metastatic disease; and
 - b. Disease has progressed on or following prior treatment; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- c. Recipient has no satisfactory alternative treatment options.

7. Gastric Cancer (adenocarcinoma)

- a. Used as subsequent therapy for recipients with locoregional disease who are not surgical candidates or who have unresectable locally advanced, recurrent, or metastatic disease; and
- b. Disease has progressed on or following prior treatment; and
- c. Recipient has no satisfactory alternative treatment options.

8. Occult Primary/Cancer of Unknown Primary (CUP)

- a. Used in symptomatic recipients with performance status (PS) 1-2 or asymptomatic recipients with PS 0 and aggressive recurrent or advanced disease; and
- b. Recipient has adenocarcinoma or carcinoma not otherwise specified; and
- c. Disease has progressed on or following prior treatment; and
- d. Recipient has no satisfactory alternative treatment options; and
- e. Recipient has one of the following:
 - 1. Axillary involvement in those with a prostate or post-prostatectomy if clinically indicated.
 - 2. Lung nodules or breast marker-negative pleural effusion.
 - 3. Resectable liver disease.
 - 4. Peritoneal mass or ascites with non-ovarian histology.
 - 5. Retroperitoneal mass of non-germ cell histology in selected recipients.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

6. Unresectable liver disease or disseminated metastases.

9. Ovarian, Fallopian Tube, and Primary Peritoneal Cancers

a. Recipient has Grade 1 Endometrioid Carcinoma, Carcinosarcoma (Malignant Mixed Mullerian Tumors), Mucinous Carcinoma of the Ovary, Epithelial Ovarian/Fallopian Tube/Primary Peritoneal Cancer, Clear Cell Carcinoma of the Ovary; and

1. Recipient has persistent, recurrent, or advanced disease; and

2. Recipient is not experiencing an immediate biochemical relapse (i.e., rising CA-125 with no radiographic evidence of disease); or

b. Recipient has Low-Grade Serous Carcinoma; and

1. Recipient has recurrent or advanced tumors.

10. Small Bowel Adenocarcinoma

a. Used for advanced or metastatic disease; and

1. Used for initial therapy in recipient with prior oxaliplatin exposure in the adjuvant treatment setting or with a contraindication to oxaliplatin; or

2. Used as subsequent therapy in recipients without prior oxaliplatin exposure in the adjuvant treatment setting and without a contraindication to oxaliplatin.

b. Dosage Limits

1. Administer 500 mg intravenously every three weeks for doses one through four, followed by subsequent doses of 1,000 mg every six weeks (dose five begins three weeks after the fourth dose) until disease progression or unacceptable toxicity.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

c. Recertification Request:

1. Recipient continues to meet the universal and other indication-specific relevant criteria identified in section III; and
2. Disease response with treatment as defined by stabilization of disease or decrease in size of tumor or tumor spread; and
3. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: severe infusion-related reactions, severe immune-mediated adverse reactions (e.g., pneumonitis, hepatitis, colitis, endocrinopathies, nephritis with renal dysfunction, dermatologic adverse reactions/rash), complications of allogeneic hematopoietic stem cell transplantation (HSCT), etc.

d. PA Guidelines:

1. Initial approval will be given for six months.
2. Recertification will be given for six months.

2. Keytruda® (pembrolizumab)

a. Approval will be given if the following criteria are met and documented:

1. Recipient is at least 18 years of age (unless otherwise specified); and
2. Universal Criteria
 - a. Recipient has not received previous therapy with a programmed death (PD-1/PD-L1)-directed therapy (e.g., cemiplumab, avelumab, nivolumab, atezolizumab, durvalumab, dostarlimab, nivolumab/relatlimab-rmbw, etc.), unless otherwise specified; and
3. Anal Carcinoma
 - a. Recipient has metastatic squamous cell carcinoma; and
 - b. Used as a single agent for subsequent therapy.
4. Primary Mediastinal Large B-Cell Lymphoma (PMBCL)
 - a. Used as single agent; and
 1. Recipient is at least six months of age; and
 2. Recipient has relapsed or refractory disease; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

3. Recipient does not require urgent cytoreductive therapy; or
- b. Used in combination with brentuximab vedotin; and
 1. Recipient is at least six months to 39 years of age; and
 2. Used as consolidation/additional therapy in recipients who achieve a partial response after therapy for relapsed or refractory disease.
5. Urothelial Carcinoma (Bladder Cancer)
 - a. Used as a single agent; and
 1. Recipient has Bacillus Calmette-Guerin (BCG)-unresponsive, high-risk, non-muscle invasive bladder cancer (NMBIC) defined as one of the following:
 - a. Persistent disease despite adequate BCG therapy
 - b. Disease recurrence after an initial tumor free state following an adequate BCG course of therapy
 - c. T1 disease following a single induction course of BCG therapy; and
 - d. Recipient has carcinoma in situ (CIS); and
 - e. Recipient is ineligible for or has elected not to undergo cystectomy; or
 2. Recipient has one of the following diagnoses:
 - a. Locally advanced or metastatic urothelial carcinoma; or
 - b. Muscle invasive bladder cancer with local recurrence or persistent disease in a preserved bladder
 - c. Metastatic or local bladder cancer recurrence post-cystectomy
 - d. Recurrent or metastatic primary carcinoma of the urethra (excluding recurrence of stage T3-4 disease or palpable inguinal lymph nodes)

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- e. Primary carcinoma of the urethra that is stage T3-4 cN1-2 or cN1-2 with palpable inguinal lymph nodes (first-line therapy only)
 - f. Metastatic upper genitourinary (GU) tract tumors
 - g. Metastatic urothelial carcinoma of the prostate; and
 - h. Used for disease that progressed during or following platinum-containing chemotherapy; or
 - i. Used as second-line treatment after chemotherapy other than a platinum; or
 - j. Used as first-line therapy in cisplatin-ineligible recipients; and
 - 1. Recipient is not eligible for any platinum-containing chemotherapy (i.e., both cisplatin and carboplatin-ineligible).
- 6. Triple-Negative Breast Cancer
 - a. Recipient has recurrent unresectable or metastatic disease or inflammatory breast cancer with no response to preoperative systemic therapy; and
 - 1. Used in combination with chemotherapy; and
 - 2. Tumor expresses PD-L1 (combined positive score [CPS] greater than or equal to 10) as determined by an FDA-approved or CLIA-compliant test; or
 - b. Recipient has high-risk early-stage disease; and
 - 1. Used as neoadjuvant therapy in combination with chemotherapy; and
 - 2. Used as adjuvant therapy as a single agent following use as neoadjuvant therapy in combination with chemotherapy.
- 7. Adult Central Nervous System (CNS) Cancer
 - a. Used as a single agent; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- b. Primary tumor is due to BRAF non-specific melanoma or PD-L1 positive non-small cell lung cancer (NSCLC); and
 - 1. Used as initial treatment in recipients with small asymptomatic brain metastases; or
 - 2. Used for relapsed limited brain metastases with either stable systemic disease or reasonable systemic treatment options; or
 - 3. Used for recurrent limited brain metastases; or
 - 4. Used for recurrent extensive brain metastases with stable systemic disease or reasonable systemic treatment options.
- 8. Pediatric Central Nervous System (CNS) Cancers
 - a. Recipient is less than or equal to 18 years of age; and
 - b. Recipient has hypermutated diffuse high-grade glioma; and
 - 1. Used for recurrent or progressive disease as a single agent (excluding oligodendroglioma, IDH-mutant and 1p/19q co-deleted or astrocytoma IDH-mutant); or
 - 2. Used as adjuvant therapy (excluding diffuse midline glioma, H3 K27-altered or pontine location); and
 - a. Recipient is less than three years of age and used as a single agent; or
 - b. Recipient is greater than or equal to three years of age and used following standard brain radiation therapy (RT) with or without concurrent temozolomide.
- 9. Cervical Cancer
 - a. Recipient has persistent, recurrent, or metastatic disease; and
 - b. Tumor expressed PD-L1 (CPS greater than or equal to one) as determined by an FDA-approved or CLIA-compliant test; and
 - 1. Used as a single agent; and
 - a. Disease has progressed on or after chemotherapy; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Used in combination with chemotherapy.
10. Esophageal or Gastroesophageal Junction Cancer:
 - a. Recipient is not a surgical candidate or has unresectable locally advanced, recurrent, or metastatic disease; and
 1. Used in combination with platinum-and fluoropyrimidine-based chemotherapy; and
 - a. Used as first-line therapy; or
 2. Used in combination with trastuzumab, fluoropyrimidine-and platinum-containing chemotherapy; and
 - a. Used as first-line therapy for HER2-positive disease; and
 - b. Recipient has adenocarcinoma; or
 3. Used as a single agent; and
 - a. Recipient has squamous cell carcinoma; and
 1. Tumor expresses PD-L1 (CPS greater than or equal to 10) as determined by an FDA-approved or CLIA compliant test; and
 2. Recipient progressed after one or more prior lines of systemic therapy.
 11. Gastric Cancer
 - a. Recipient is not a surgical candidate or has unresectable locally advanced, recurrent, or metastatic disease; and
 - b. Recipient has adenocarcinoma; and
 - c. Used in combination with trastuzumab, fluoropyrimidine- and platinum-containing chemotherapy; and
 - d. Used as first-line therapy for HER2-positive disease.
 12. Gestational Trophoblastic Neoplasia

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- a. Used as a single agent or multiagent chemotherapy-resistant disease; and
 - 1. Recipient has intermediate placental site trophoblastic (PSTT) or epithelioid trophoblastic tumor (ETT); and
 - a. Used for recurrent or progressive disease; and
 - b. Recipient has previously treated with a platinum-based regimen; or
 - 2. Recipient has high risk disease (i.e., greater than or equal to seven prognostic score or stage IV disease).
- 13. Squamous Cell Carcinoma of the Head and Neck (SCCHN)
 - a. Recipient has Cancer of the Nasopharynx; and
 - 1. Used in combination with cisplatin and gemcitabine; and
 - b. Recipient has Very Advanced Head and Neck Cancer; and
 - 1. Recipient has nasopharyngeal cancer; and
 - a. Recipient has a performance status 0-1; and
 - b. Used in combination with cisplatin and gemcitabine; and
 - c. Used for one of the following:
 - 1. Unresectable locoregional recurrence with prior radiation therapy (RT)
 - 2. Unresectable second primary with prior RT
 - 3. Unresectable persistent disease with prior RT
 - 4. Recurrent/persistent disease with distant metastases; or
 - 2. Recipient has NON-nasopharyngeal cancer; and
 - a. Recipient is unfit for surgery or has locally advanced disease; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

1. Used as a single agent as first-line therapy in recipients with a performance status (PS) 3; and
2. Tumor expresses PD-L1 (CPS greater than or equal to one) as determined by an FDA-approved or CLIA-compliant test; or
- b. Recipient has unresectable, recurrent, persistent, or metastatic disease; and
 1. Used as a single agent; and
 - a. Tumor expresses PD-L1 (CPS greater than or equal to one) as determined by an FDA-approved or CLIA-compliant test; or
 - b. Used as subsequent therapy for disease that has progressed on or after platinum-containing chemotherapy; or
 2. Used in combination with fluorouracil and a platinum chemotherapy agent or in combination with docetaxel and either carboplatin or cisplatin; and
 - a. Recipient has a performance status zero through one.
14. Hepatocellular Carcinoma (HCC)
 - a. Used as a single agent; and
 - b. Recipient was previously treated with sorafenib; and
 - c. Recipient has Child-Pugh Class A liver impairment (i.e., excluding Child-Pugh Class B and C).
15. Adult Classical Hodgkin Lymphoma (cHL)
 - a. Recipient has relapsed or refractory disease; and
 1. Used as a single agent; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Used in combination with GVD (gemcitabine, vinorelbine, liposomal doxorubicin); or
 - b. Used as a palliative therapy in recipients greater than 60 years of age; and
 1. Recipient has relapsed or progressive disease after high-dose therapy (HDT)/autologous stem cell transplantation (ASCT); or
 2. Recipient has relapsed or refractory disease and is transplant-ineligible based on comorbidities or failure of second-line chemotherapy; or
 3. Recipient is post-allogeneic stem-cell transplant.
16. Pediatric Classical Hodgkin Lymphoma
- a. Recipient is at least six months of age; and
 - b. Used as a single agent; and
 1. Recipient has refractory disease; or
 2. Recipient has relapsed disease; and
 - a. Used after two or more prior lines of therapy; or
 - b. Used as subsequent therapy in recipients heavily pretreated with platinum or anthracycline-based chemotherapy; or
 - c. Used as subsequent therapy in recipients with an observed decreased in cardiac function.
17. Renal Cell Carcinoma (RCC)
- a. Recipient has clear cell histology; and
 1. Used in combination with axitinib or lenvatinib; and
 - a. Used as first-line therapy for advanced, relapsed, or stage IV disease; or
 - b. Used as subsequent therapy for relapsed or stage IV disease; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Used as a single agent; and

a. Used as adjuvant therapy; and

1. Recipient has undergone a nephrectomy prior to receiving treatment; and

a. Recipient has stage II disease with grade four tumors (with or without sarcomatoid features); or

b. Recipient has stage III disease; or

2. Recipient has a metastasectomy within one year of having undergone a nephrectomy for relapsed or stage IV disease; or

a. Recipient has non-clear cell histology; and

b. Used as single agent for relapsed or stage IV disease.

18. Cutaneous Melanoma

a. Used as first-line therapy as a single agent for unresectable or metastatic disease; or

b. Used as initial treatment of limited resectable disease; and

1. Used as a single agent; and

a. Recipient has stage III disease with clinical satellite/in-transit metastases; or

b. Recipient has local satellite/in-transit recurrence; or

c. Used as subsequent therapy for unresectable or metastatic disease after disease progression or maximum clinical benefit from BRAF targeted therapy (e.g., dabrafenib/trametinib, vemurafenib/cobimetinib, encorafen/binimetinib, etc.); and

1. Used as a single agent; and

a. Anti-PD-1 therapy was not previously used; or

b. Used as re-induction therapy in recipients who experienced disease control (i.e., complete response, partial response, or stable disease with no

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

residual toxicity) from prior anti-PD-1 therapy, but subsequently have disease progression/relapse greater than three months after treatment discontinuation; or

2. Used in combination with ipilimumab; and

- a. Used after progression on single-agent anti-PD-1 therapy and combination ipilimumab/anti-PD-1 therapy was not previously used; or
- b. Used as re-induction therapy in recipients who experienced disease control (i.e., complete response, partial response, or stable disease with no residual toxicity) from prior combination ipilimumab/anti-PD-1 therapy, but subsequently have disease progression/relapse greater than three months after treatment discontinuation; or

d. Used as a single agent for adjuvant treatment; and

- 1. Recipient has stage IIB or IIC melanoma following complete restriction; and
 - a. Recipient is at least 12 years of age; or
- 2. Recipient has stage III disease; and
 - a. Used following complete resection; and
 - 1. Recipient is at least 12 years of age; or
 - b. Recipient has lymph node involvement and has undergone complete lymph node dissection (CLND), therapeutic lymph node dissection (TLND), or nodal basin ultrasound surveillance; or
 - c. Recipient has clinical satellite/in-transit metastases and has no evidence of disease (NED) after complete excision; or
- 3. Recipient has local satellite/in-transit recurrence and has NED after complete excision; or
- 4. Recipient has undergone TLND and/or complete excision of disease limited to nodal recurrence; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

5. Recipient has oligometastatic disease and NED after receiving metastasis-directed therapy (e.g., stereotactic ablative therapy or complete resection) or systemic therapy.

19. Uveal Melanoma

- a. Used as a single parent; and
- b. Recipient has distant metastatic disease.

20. Merkel Cell Carcinoma (MCC)

- a. Recipient is at least six months of age; and
- b. Used as a single agent; and
 1. Recipient has recurrent disease and both curative surgery and curative radiation therapy are not feasible; or
 2. Recipient has recurrent locally advanced or metastatic disease.

21. Adrenal Gland Tumors

- a. Recipient has locoregional unresectable or metastatic adrenocortical carcinoma (ACC); and
- b. Used with or without mitotane.

22. Non-Small Cell Lung Cancer (NSCLC)

- a. Used for stage III disease; and
 1. Used as a first-line therapy as a single-agent in recipients who are not candidates for surgical resection or definitive chemoradiation; and
 2. Used in recipients with tumors expressing PD-L1 (TPS greater than or equal to one percent) as determined by an FDA-approved or CLIA compliant test and with no EGFR or ALK genomic tumor aberrations; or
- b. Used for stage IB (T2a greater than or equal to four centimeters), II, or IIIA disease; and
 1. Used as adjuvant therapy as a single agent; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Used following resection and platinum-based chemotherapy; or
- c. Used for recurrent, advanced, or metastatic disease (excluding locoregional recurrence or symptomatic local disease without evidence of disseminated disease) or mediastinal lymph node recurrence with prior radiation therapy; and
 1. Used as first-line therapy; and
 - a. Used for one of the following:
 1. PD-L1 expression-positive (TPS greater than or equal to one percent) tumors, as detected by an FDA-approved or CLIA compliant test, that are negative for actionable molecular biomarkers
 2. Recipients with performance status (PS) 0-1 who have tumors that are negative for actionable molecular biomarkers and PD-L1 expression less than one percent
 3. Recipients with PS 0-1 who are positive for one of the following molecular mutations: EGFR exon 20, KRAS G12C, BRAF V600E, NTRK1/2/3 gene fusion, MET exon 14 skipping, RET rearrangement, or ERBB2 (HER2); and
 - b. Used in combination with pemetrexed and either carboplatin or cisplatin for non-squamous cell histology; or
 - c. Used in combination with carboplatin and either paclitaxel or albumin-bound paclitaxel for squamous cell histology; or
 - d. Used as single agent therapy (for PD-L1 expression-positive tumors only); or
 2. Used as subsequent therapy; and
 - a. Used in recipients with tumors expressing PD-L1 (TPS greater than or equal to one percent) as

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

determined by an FDA-approved or CLIA compliant test; and

1. Used as single agent therapy; or
- b. Used for one of the following:
 1. Recipients with PS 0-1 who are positive for one of the following molecular mutations and have received prior targeted therapy; EGFR exon 19 deletion or L858R tumors, EGFR S768I, L861Q and/or G719x-positive tumors, ALK rearrangement, or ROS1 rearrangement
 2. Recipients with PS 0-1 who are positive for one of the following molecular mutations: BRAF V600E, NTRK1/2/3 gene fusion, MET Exon 14 skipping, or RET rearrangement; and
- c. Used in combination with carboplatin and either paclitaxel or albumin-bound paclitaxel for squamous cell histology; or
- d. Used in combination with pemetrexed and either carboplatin or cisplatin for non-squamous cell histology; or
3. Used as continuation maintenance therapy in recipients who have achieved tumor response or stable disease following initial therapy; and
 - a. Used in combination with pemetrexed following a first-line pembrolizumab/pemetrexed/(carboplatin or cisplatin) regimen for non-squamous cell histology; or
 - b. Used as a single agent following a first-line pembrolizumab/carboplatin/(paclitaxel or albumin-bound paclitaxel) regimen for squamous cell histology; or
 - c. Used as a single agent following a first-line pembrolizumab monotherapy regimen.

23. Primary Cutaneous Lymphomas

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- a. Used as a single agent; and
 - 1. Recipient has Mycosis Fungoides/Sezary Syndrome; and
 - a. Used as primary therapy or as subsequent therapy for relapsed or persistent disease; and
 - 1. Recipient has stage III Mycosis Fungoides or stage IV Sezary Syndrome; or
 - 2. Recipient has generalized cutaneous or extracutaneous lesions with large cell transformation (LCT); or
 - b. Used as subsequent therapy for disease refractory to multiple previous therapies; or
 - 2. Recipient has primary cutaneous CD30+ T-Cell lymphoproliferative disorders; and
 - a. Used for relapsed or refractory disease; and
 - b. Used for primary cutaneous anaplastic large cell lymphoma (ALCL) with multifocal lesions, or cutaneous ALCL with regional node (N1) (excludes systemic ALCL).

24. Small Cell Lung Cancer (SCLC)

- a. Used as subsequent therapy as a single agent; and
 - 1. Disease has relapsed following a complete or partial response or stable disease with primary treatment (excluding use in recipients who progressed on maintenance atezolizumab or durvalumab at time of relapse); or
 - 2. Recipient has primary progressive disease.

25. Soft Tissue Sarcoma

- a. Used as a single agent; and
 - 1. Recipient has alveolar soft part sarcoma (ASPS); or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Recipient has cutaneous angiosarcoma; or
- b. Used in combination with axitinib; and
 1. Recipient has alveolar soft part sarcoma (ASPS).
26. Cutaneous Squamous Cell Carcinoma (cSCC)
 - a. Used as a single agent; and
 1. Recipient has locally advanced, recurrent, or metastatic disease that is not curable by surgery or radiation; or
 2. Recipient has unresectable, inoperable, or incompletely resected regional disease or new regional disease that is not curable by radiation therapy.
27. Extranodal NK/T-Cell Lymphomas
 - a. Used as a single agent for relapsed or refractory disease; and
 - b. Disease progressed following additional treatment with an alternative asparaginase-based combination chemotherapy regimen not previously used; and
 - c. Participation in a clinical trial is unavailable.
28. Thymic Carcinoma
 - a. Used as a single agent: and
 1. Used as first-line therapy for unresectable, locally advanced, or metastatic disease in recipients who are unable to tolerate first-line combination regimens; or
 2. Used as postoperative treatment in recipients who are unable to tolerate first-line combination regimens; or
 3. Used as second-line therapy for unresectable or metastatic disease.
29. Endometrial Carcinoma (Uterine Neoplasms)
 - a. Recipient has advanced, recurrent, or metastatic disease that is mismatch repair proficient (pMMR) as determined by an FDA-

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

approved or CLIA-compliant test or not microsatellite instability-high (MSI-H); and

- b. Disease has progressed following prior systemic therapy; and
- c. Used in combination with Lenvatinib.

30. Vulvar Cancer

- a. Used as a single agent; and
- b. Recipient has adenocarcinoma or squamous cell carcinoma; and
- c. Recipient has advanced, recurrent, or metastatic disease; and
- d. Tumor expresses PD-L1 (CPS greater than or equal to one) as determined by and FDA-approved or CLIA-compliant test; and
- e. Used as second-line therapy for disease progression on or after chemotherapy.

31. Microsatellite Instability-High (MSI-H) or Mismatch Repair Deficient (dMMR) Cancer

- a. Recipient has at least six months of age; and
- b. Used as a single agent; and
- c. Recipient has microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) disease as determined by an FDA-approved or CLIA compliant test; and
- d. Pediatric recipients must not have a diagnosis of MSI-H central nervous system cancer; and
- e. Recipient has, but is not limited to, one of the following cancers:
 - 1. Colorectal Cancer
 - a. Used for unresectable or medically inoperable, advanced, or metastatic disease; or
 - 2. Appendiceal Adenocarcinoma – Colon Cancer
 - a. Used as initial therapy for advanced or metastatic disease; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- b. Used as subsequent therapy for advanced or metastatic disease that progressed following previous oxaliplatin-irinotecan-and/or fluoropyrimidine-based therapy.
- 3. Pancreatic Adenocarcinoma
 - a. Used as subsequent therapy for locally advanced or metastatic disease after progression; or
 - b. Used for recurrent or metastatic disease after resection; or
 - c. Used as first-line therapy for metastatic disease; or
 - d. Used as continuation (maintenance) therapy for metastatic disease if acceptable tolerance and no disease progression after at least four to six months of first-line therapy in recipients with good performance status (i.e., ECOG PS 0-1).
- 4. Bone Cancer (Ewing Sarcoma, Chordoma [chondroid or conventional histology], Chondrosarcoma [excluding dedifferentiated or mesenchymal subtypes], or Osteosarcoma [excluding high-grade undifferentiated pleomorphic sarcoma])
 - a. Used for unresectable or metastatic disease that has progressed following prior treatment; and
 - b. Recipient has no satisfactory alternative treatment options.
- 5. Gastric Cancer (Adenocarcinoma) or Esophageal/Gastrophageal Junction Adenocarcinoma or Squamous Cell Carcinoma
 - a. Used as subsequent therapy for recipients who are not surgical candidates or have unresectable locally advanced, recurrent, or metastatic disease.
- 6. Ovarian Cancer (Epithelial Ovarian, Fallopian Tube, and Primary Peritoneal Cancers)
 - a. Used for persistent or recurrent disease; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- b. Recipients is not experiencing an immediate biochemical relapse (i.e., rising CA-125 with no radiographic evidence of disease).
- 7. Uterine Neoplasms (Endometrial Carcinoma)
 - a. Used as second-line therapy for recurrent or metastatic disease; or
 - b. Recipient has advanced disease that has progressed following prior systemic therapy in any setting and is not a candidate for curative surgery or radiation.
- 8. Penile Cancer
 - a. Used as subsequent therapy for unresectable or metastatic disease that has progressed following prior treatment; and
 - b. Recipient has no satisfactory alternative treatment options.
- 9. Vulvular Cancer
 - a. Recipient has adenocarcinoma or squamous cell carcinoma; and
 - b. Used as second-line therapy for advanced, recurrent, or metastatic disease that progressed following prior treatment; and
 - c. Recipient has no satisfactory alternative treatment options.
- 10. Testicular Cancer
 - a. Used as third-line therapy
- 11. Hepatobiliary Adenocarcinoma (Gallbladder Cancer, Intra-/Extra-hepatic Cholangiocarcinoma)
 - a. Used as primary treatment for unresectable or metastatic disease; or
 - b. Used for unresectable or metastatic disease that has progressed on or after prior treatment.
- 12. Vulvar Cancer

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- a. Recipient has adenocarcinoma or squamous cell carcinoma; and
 - b. Used as second-line therapy for advanced, recurrent, or metastatic disease.
- 13. Cervical Cancer
 - a. Used as subsequent therapy for persistent, recurrent, or metastatic disease.
- 14. Small Bowel Adenocarcinoma
 - a. Used for advanced or metastatic disease; and
 - 1. Used as initial therapy; or
 - 2. Used as subsequent therapy for recipients with no prior oxaliplatin exposure in the adjuvant treatment setting and no contraindication to oxaliplatin therapy.
- 15. Ampullary Adenocarcinoma
 - a. Used as subsequent therapy for disease progression; or
 - b. Used as first-line therapy for unresectable localized or metastatic disease.
- 16. Breast Cancer
 - a. Used for recurrent unresectable or metastatic disease or inflammatory breast cancer with no response to preoperative systemic therapy; and
 - b. Recipient has progressed following prior treatment; and
 - c. Recipient has no satisfactory alternative treatment options.
- 17. Occult Primary/Cancer of Unknown Primary (CUP)
 - a. Used in symptomatic recipients with PS one-two or asymptomatic recipients with PS 0 and aggressive disease; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

1. Recipient has squamous cell carcinoma; and
 - a. Recipient has multiple lung nodules; pleural effusion, or disseminated metastases; or
2. Recipient has adenocarcinoma or carcinoma not otherwise specified; and
 - a. Recipient has one of the following:
 1. Axillary involvement in those with a prostate or post-prostatectomy if clinically indicated
 2. Lung nodules or breast marker-negative pleural effusion
 3. Resectable liver disease
 4. Peritoneal mass or ascites with non-ovarian histology
 5. Retroperitoneal mass of non-germ cell histology in selected recipients
 6. Unresectable liver disease or disseminated metastases.
18. Very Advanced Squamous Cell Carcinoma of the Head and Neck (SCCHN)
 - a. Recipient has non-nasopharyngeal cancer; and
 - b. Recipient is unfit for surgery or has locally advanced, unresectable, recurrent/persistent, or metastatic disease
19. Prostate Cancer
 - a. Recipient has castration-resistant metastatic disease; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- b. Recipient will continue androgen deprivation therapy (ADT); and
 - c. Recipient received prior docetaxel and prior novel hormone therapy (excluding recipients with visceral metastases).
- 20. Well-Differentiated Grade 3 Neuroendocrine Tumors
 - a. Recipient has progressed following prior treatment and has no satisfactory alternative treatment options; and
 - 1. Recipient has locally advanced/metastatic disease with unfavorable biology (e.g., relative high Ki-67 [greater than or equal to 55%], rapid growth rate, negative SSTR-based PET imaging); or
 - 2. Recipient has unresectable locally advanced/metastatic disease with favorable biology (e.g., relatively low Ki-67 [less than 55%], positive SSTR-based PET imaging); or
 - a. Recipient has locally advanced/metastatic disease with unfavorable biology (e.g., relative high Ki-67 [greater than or equal to 55%], rapid growth rate, negative SSTR-based PET imaging); or
 - b. Recipient has unresectable locally advanced/metastatic disease with favorable biology (e.g., relatively low Ki-67 [less than 55%], positive SSTR-based PET imaging); and
 - 1. Recipient clinically significant tumor burden or evidence of disease progression.
- 21. Neuroendocrine Tumors (Extrapulmonary Poorly Differentiated Neuroendocrine Carcinoma/Large or Small Cell Carcinoma/Mixed Neuroendocrine-Non-Neuroendocrine Neoplasm)

DIVISION OF HEALTH CARE FINANCING AND POLICY

- a. Recipient has locoregional unresectable or metastatic disease; and
- b. Recipient progressed following prior treatment and has no satisfactory alternative treatment options.

32. Tumor Mutational Burden-High (TMB-H) Cancer

- a. Recipient is at least six months of age; and
- b. Recipient has solid tumors that are tumor mutational burden-high (TMB-H0 [greater than or equal to 10 mutations/megabase 9mut/Mb]) as determined by an FDA-approved or CLIA-compliant test; and
- c. Used as a single agent; and
- d. Pediatric recipients must not have a diagnosis of TMB-H central nervous system cancer; and
- e. Recipient has, but is not limited to, one of the following cancers:
 - 1. Bone Cancer (Ewing Sarcoma, Chordoma [chondroid or conventional histology], Chondrosarcoma [excluding dedifferentiated or mesenchymal subtypes], or Osteosarcoma [excluding high-grade undifferentiated pleomorphic sarcoma])
 - a. Recipient has unresectable or metastatic disease that progressed following prior treatment; and
 - b. Recipient has no satisfactory alternative treatment options.
 - 2. Breast Cancer
 - a. Recipient has recurrent unresectable or metastatic disease or inflammatory breast cancer with no response to preoperative systemic therapy; and
 - b. Recipient has progressed following prior treatment; and
 - c. Recipient has no satisfactory alternative treatment options.
 - 3. Cervical Cancer

- 4. Gastric Cancer (Adenocarcinoma) or Esophageal/Gastroesophageal Junction Adenocarcinoma or Squamous Cell Carcinoma
 - a. Used as subsequent therapy for recipients who are not surgical candidates or have unresectable locally advanced, recurrent, or metastatic disease.
- 5. Hepatobiliary Adenocarcinoma (Gallbladder Cancer, Intra-/Extra-hepatic Cholangiocarcinoma)
 - a. Used for unresectable or metastatic disease that has progressed on or after prior systemic treatment.
- 6. Head and Neck Cancers
 - a. Salivary Gland Tumors
 - 1. Used for recurrent metastatic disease in recipients with a PS zero to three; or
 - 2. Used for unresectable locoregional recurrence or second primary with prior radiation therapy.
 - b. Cancer of the Nasopharynx
 - 1. Used as subsequent therapy for oligometastatic or metastatic disease.
- 7. Thyroid Carcinoma
 - a. Anaplastic Carcinoma

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

1. Used as first- or second-line therapy for metastatic disease
- b. Follicular Carcinoma, Papillary Carcinoma, Hurthle Cell Carcinoma
 1. Recipient has progressive and/or symptomatic unresectable locoregional recurrent/persistent or metastatic disease not amenable to radioactive iodine (RAI) therapy.
- c. Medullary Carcinoma
 1. Recipient has unresectable locoregional or recurrent/persistent metastatic disease that is either symptomatic or progressing.
8. Uterine Neoplasms (Uterine Sarcoma [excluding low-grade endometrial stromal sarcoma], Endometrial Carcinoma)
 - a. Used as second-line therapy for unresectable or metastatic disease that progressed following prior treatment; and
 - b. Recipient has no satisfactory alternative treatment options.
9. Testicular Cancer
 - a. Used as third line therapy
10. Occult Primary/Cancer of Unknown Primary (CUP)
 - a. Used in symptomatic recipients with PS one-two or asymptomatic recipients with PS zero and aggressive disease; and

 1. Used as subsequent therapy for advanced or metastatic Extremity/Body Wall, Head/Neck disease; or
 2. Used as subsequent therapy for recurrent unresectable or recurrent stage IV Retroperitoneal/Intra-Abdominal disease.
- b. Dosage Limits
 1. Keytruda 100mg/four mL single use vial: 11 vials per 14-day supply.
- c. Recertification Requests:
 1. Recipient continues to meet the universal and other indication-specific relevant criteria identified in section III; and
 2. Disease response with treatment as defined by stabilization of disease or decrease in size of tumor or tumor spread; and
 3. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: severe infusion-related reactions, severe immune-mediated adverse reactions (e.g., pneumonitis, hepatitis, colitis, endocrinopathies, nephritis with renal dysfunction, dermatologic adverse reactions/rash, etc.), hepatotoxicity when used in combination with axitinib, complications of allogeneic hematopoietic stem cell transplantation (HSCT), etc.; and
 4. For the following indications, recipient has not exceeded a maximum of twenty-four months of therapy:
 - a. Adrenal Gland Tumors
 - b. Anal Carcinoma
 - c. Bladder Cancer/Urothelial Carcinoma
 - d. Cervical Cancer
 - e. Classical Hodgkin Lymphoma (cHL)

MEDICAID SERVICES MANUAL

K. Kadcyła® (ado-trastuzumab emtansine)

Therapeutic Class: Antineoplastic-Antibody Drug Conjugates (ADCs)
Last Reviewed by DUR Board: N/A

Kadcyła® (ado-trastuzumab emtansine) are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is at least 18 years of age; and
 - b. Universal Criteria
 1. Left ventricular ejection fraction (LVEF) is within normal limits prior to initiating therapy and will be assessed at regular intervals (e.g., every three months) during treatment; and
 2. Used as a single agent; and
 3. Therapy will not be substituted with or for any trastuzumab-based formulation (i.e., trastuzumab [or trastuzumab biosimilar product], fam-trastuzumab deruxtecan-nxki, trastuzumab-hyaluronidase, pertuzumab/trastuzumab and hyaluronidase-zzxf, etc.); and
 - c. Breast Cancer
 1. Recipient has human epidermal growth factor receptor 2 (HER2)-positive* disease as determined by an FDA-approved or CLIA-compliant test; and
 - a. Used as adjuvant therapy; and
 1. Recipient has locally advanced or node positive disease; and
 - a. Used for residual disease following completion of planned chemotherapy and mastectomy or breast-conserving surgery (BCS); or
 - b. Used in recipients not considering pre-operative systemic therapy; or

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Recipient has inflammatory breast cancer; and
 - a. Used in recipients who had a response to preoperative systemic therapy, followed by surgery, and needs to complete planned chemotherapy; or
 - b. Recipient has residual disease following preoperative therapy; or
3. Recipient has early breast cancer with residual invasive disease after neoadjuvant taxane and trastuzumab-based therapy; or
- b. Recipient has metastatic or recurrent unresectable disease or inflammatory breast cancer with no response to preoperative systemic therapy; and
 1. Used as second-line therapy and beyond; or
- c. Recipient has metastatic disease that recurred during or within six months of completing adjuvant therapy; and
 1. Recipient previously received trastuzumab and a taxane, separately or in combination.
- d. Central Nervous System (CNS) Cancer
 1. Recipient has human epidermal growth factor receptor two (HER2)-positive* disease as determined by an FDA-approved or CLIA-compliant test; and
 2. Used for the treatment of brain metastases in recipients with breast cancer; and
 - a. Used as initial treatment in recipients with small asymptomatic brain metastases; or
 - b. Used for relapsed limited brain metastases with either stable systemic disease or reasonable systemic treatment options; or
 - c. Recipient has recurrent limited brain metastases; or
 - d. Used for recurrent extensive brain metastases with stable systemic disease or reasonable systemic treatment options.

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

e. Non-Small Cell Lung Cancer (NSCLC)

1. Recipient has ERBB2 (HER2) mutation positive disease as determined by an FDA-approved or CLIA-compliant test; and
2. Recipient has recurrent, advanced, or metastatic disease (excluding locoregional recurrence or symptomatic local disease without evidence of disseminated disease) or mediastinal lymph node recurrence with prior radiation therapy.

f. Head and Neck Cancer

1. Recipient has human epidermal growth factor receptor 2 (HER2)-positive* disease as determined by an FDA-approved or CLIA-compliant test; and
2. Recipient has salivary gland tumors; and
3. Used for one of the following:
 - a. Recurrent disease with distant metastases
 - b. Unresectable locoregional recurrence with prior radiation therapy (RT)
 - c. Unresectable second primary with prior RT.

2. Dosing Limits

a. Quantity Limit (max daily dose) [NDC Unit]:

1. Kadcylla 100 mg singe-dose vial: one vial every 21 days.
2. Kadcylla 160 mg single-dose vial: three vials every 21 days.

b. Max Units (per dose and over time) [HCPCS Unit]:

1. 480 billable units every 21 days.

3. Renewal Criteria:

- a. Recipient continues to meet the universal and other indication-specific relevant criteria such as concomitant therapy requirements (not including prerequisite therapy), performance status, etc. identified in Section III; and
- b. Disease response with treatment as defined by stabilization of disease or decrease in size of tumor or tumor spread; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

- c. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: hepatotoxicity, pulmonary toxicity (i.e., interstitial lung disease, pneumonitis), thrombocytopenia, neurotoxicity, infusion-related and hypersensitivity reactions, hemorrhage, extravasation at infusion site, etc.; and
- d. Left ventricular ejection fraction (LVEF) obtained within the previous 3 months as follows:
 - 1. Metastatic or Recurrent Breast Cancer: LVEF is $>45\%$ OR LVEF is 40% to $\leq 45\%$ and absolute decrease is $<10\%$ from baseline; or
 - 2. All other indications: LVEF is $\geq 50\%$ OR LVEF is 45% to $<50\%$ and absolute decrease is $<10\%$ from baseline; and
- e. Breast Cancer (adjuvant treatment)
 - 1. Recipient has not exceeded a maximum of 14 cycles of therapy (42 weeks total).

L. Aranesp® (darbepoetin alfa)

Therapeutic Class: Recombinant Human Erythropoietins

Last Reviewed by DUR Board: January 19, 2023

Aranesp® (darbepoetin alfa) are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Approval will be given if the following criteria are met and documented:
 - a. Recipient is at least 18 years of age (unless otherwise specified); and
 - b. Initiation of therapy Hemoglobin (Hb) less than 10 g/dL and/or Hematocrit (Hct); and
 - c. Universal Criteria
 1. Lab values are obtained within 30 days of the date of administration (unless otherwise indicated); and
 2. Recipient has adequate iron stores as demonstrated by serum ferritin greater than or equal to 100 ng/mL (mcg/L) and transferrin saturation (TSAT) greater than or equal to 20% (measured within the previous three months for renewal); and
 3. Other causes of anemia (e.g. hemolysis, bleeding, vitamin deficiency, etc.) have been ruled out; and
 4. Recipient does not have uncontrolled hypertension; and
 - d. Anemia Due to Myelodysplastic Syndrome (MDS)
 1. Endogenous serum erythropoietin level of less than or equal to 500 mUnits/mL; and
 2. Recipient has lower risk disease (i.e., defined by IPSS-R [Very Low, Low, Intermediate]); and
 3. Recipient has symptomatic anemia.
 - e. Anemia Due to Myeloproliferative Neoplasms (MPN) – Myelofibrosis
 1. Endogenous serum erythropoietin level of less than 500 mUnits/mL.
 - f. Anemia Due to Chemotherapy Treatment
 1. Recipient is receiving concomitant myelosuppressive chemotherapy; and

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

2. Recipient's chemotherapy is not intended to cure their disease (i.e., palliative treatment); and

3. There are a minimum of two additional months of planned chemotherapy.

g. Anemia Due to Chronic Kidney Disease (Non-Dialysis Recipients)

1. Recipient at least one month of age.

2. Dosage Limits

a. Quantity Limits (max daily dose) [NDC Unit]

1. Aranesp 10 mcg prefilled syringe: one syringe up to every seven days

2. Aranesp 25 mcg vial or prefilled syringe: one vial or syringe up to every seven days

3. Aranesp 40 mcg vial or prefilled syringe: one vial or syringe up to every seven days

4. Aranesp 60 mcg vial or prefilled syringe: one vial or syringe up to every seven days

5. Aranesp 100 mcg vial or prefilled syringe: one vial or syringe up to every seven days

6. Aranesp 150 mcg prefilled syringe: one syringe up to every seven days

7. Aranesp 200 mcg vial or prefilled syringe: one vial or syringe up to every seven days

8. Aranesp 300 mcg vial or prefilled syringe: one vial or syringe up to every 14 days (MPN may be as frequent as every seven days)

9. Aranesp 500 mcg prefilled syringe: one syringe up to every 14 days

b. Max Units (per dose and over time) [HCPCS Unit]:

1. MDS (J0881 only): 500 billable units every 14 days

2. MPN (J0881 only): 300 billable units every seven days

3. CKD (Non-Dialysis Recipients):

a. Initial: 100 billable units every 14 days

b. Maintenance: 600 billable units every 28 days

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

4. Chemotherapy-induced: 600 billable units every 21 days
3. Recertification Requests:
 - a. Recipient continues to meet universal and other indication-specific relevant criteria identified in section III; and
 - b. Previous dose was administered within the past 60 days; and
 - c. Disease response with treatment as defined by improvement in anemia compared to pretreatment baseline; and
 - d. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: pure red cell aplasia, severe allergic reactions (anaphylaxis, angioedema, bronchospasm, etc.), severe cardiovascular events (stroke, myocardial infarction, congestive heart failure, thromboembolism, etc.), uncontrolled hypertension, seizures, increased risk of tumor progression/recurrence in recipients with cancer, severe cutaneous reactions (erythema multiforme, Stevens-Johnson Syndrome [SJS]/Toxic Epidermal Necrolysis [TEN], etc.), etc; and
 - e. Anemia Due to Myelodysplastic Syndrome (MDS):
 1. Hemoglobin (Hb) less than 12 g/dL and/or Hematocrit (Hct) less than 36%
 - f. Anemia Due to Myeloproliferative Neoplasms (MPN) – Myelofibrosis:
 1. Hemoglobin (Hb) less than 10 g/dL and/or Hematocrit (Hct) less than 30%
 - g. Anemia Due to Chemotherapy Treatment:
 1. Refer to Section III for criteria
 - h. Anemia Due to Chronic Kidney Disease (Non-Dialysis Recipients):
 1. Pediatric recipients: Hemoglobin (Hb) less than 12 g/dL and/or Hematocrit (Hct) less than 36%
 2. Adult recipients: Hemoglobin (Hb) less than 11 g/dL and/or Hematocrit (Hct) less than 33%.
4. PA Guidelines:
 - a. Initial approval will be given for 45 days.
 - b. Recertification will be given for 45 days.

MEDICAID SERVICES MANUAL

M. Colony Stimulating Factors

Therapeutic Drug Class: Colony Stimulating Factors

Last Reviewed by DUR Board: January 19, 2023

Colony Stimulating Factors are subject to prior authorization and quantity limitations based on the Application of Standards in Section 1927 of the SSA Act and/or approved by the DUR Board. Refer to the Nevada Medicaid and Check Up Pharmacy Manual for specific quantity limits.

1. Pegfilgrastim

a. Approval will be given if the following criteria are met and documented:

1. Prophylactic use in recipients with solid tumors or non-myeloid malignancy
 - a. Recipient is undergoing myelosuppressive chemotherapy with an expected incidence of febrile neutropenia of greater than 20%; or
 - b. Recipient is undergoing myelosuppressive chemotherapy with an expected incidence of febrile neutropenia of 10% to 20% and one or more of the following co-morbidities:
 1. Age is greater than or equal to 65 years receiving full dose intensity chemotherapy
 2. Extensive prior exposure to chemotherapy
 3. Previous exposure of pelvis, or other areas of large amounts of bone marrow, to radiation
 4. Persistent neutropenia (ANC less than or equal to 1000/mm(3))
 5. Bone marrow involvement by tumor
 6. Recipient has a condition that can potentially increase the risk of serious infection (i.e., HIV/AIDS with low CD4 counts)
 7. Recent surgery and/or open wounds
 8. Poor performance status
 9. Renal dysfunction (creatinine clearance less than 50 mL/min)
 10. Liver dysfunction (elevated bilirubin greater than 2.0 mg/dL)

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

11. Chronic immunosuppression in the post-transplant setting, including organ transplant
2. Recipient who experience a neutropenic complication from a prior cycle of the same chemotherapy
3. Recipients acutely exposed to myelosuppressive doses from radiation (Hematopoietic Acute Radiation Syndrome [H-ARS])
4. Bone marrow transplantation (BMT) failure or engraftment delay
5. Peripheral blood progenitor cell (PBPC) mobilization and transplant
6. Wilms Tumor (Nephroblastoma)
 - a. Recipient has favorable histology disease; and
 - b. Used in combination with a cyclophosphamide-based chemotherapy regimen (i.e., Regimen M or I only)
- b. Dosage Limits
 1. Quantity Limit (max daily dose) [NDC Unit]:
 - a. Neulasta six mg prefilled syringe: one syringe per 14 days
 - b. Neulasta Onpro kit: one kit per 14 days
 - c. Fulphila six mg prefilled syringe: one syringe per 14 days
 - d. Udenyca six mg prefilled syringe: one syringe per 14 days
 - e. Ziextenzo six mg prefilled syringe: one syringe per 14 days
 - f. Nyvepria six mg prefilled syringe: one syringe per 14 days
 - g. Fylnetra six mg prefilled syringe: one syringe per 14 days
 - h. Stimufend six mg prefilled syringe: one syringe per 14 days
 2. Max Units (per dose and over time) [HCPCS Unit]:
 - a. Acute Radiation Exposure
 1. 12 billable units weekly x two doses
 2. 12 billable units x two doses

DIVISION OF HEALTH CARE FINANCING AND POLICY

MEDICAID SERVICES MANUAL

b. All other indications:

1. 12 billable units per 14 days

c. Recertification Requests:

1. Coverage for all other indications can be renewed based upon the following criteria:
 - a. Recipient continues to meet indication-specific relevant criteria such as concomitant therapy requirements (not including prerequisite therapy), performance status, etc. identified in section III; and
 - b. Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include: splenic rupture, acute respiratory distress syndrome (ARDS), serious allergic reactions/anaphylaxis, sickle cell crisis, glomerulonephritis, leukocytosis, thrombocytopenia, capillary leak syndrome, potential for tumor growth stimulation of malignant cells, aortitis, myelodysplastic syndrome and acute myeloid leukemia, etc.

d. PA Guidelines:

1. Bone marrow transplantation (BMT) failure or engraftment delay: Coverage will be provided for one dose only and may not be renewed.
2. Peripheral blood progenitor cell (PBPC) mobilization and transplant: Coverage will be provided for one dose only and may not be renewed.
3. Initial approval will be given for four months.
4. Recertification will be given for four months.
