

The background features a blue gradient with several white circular gauges and arrows. One large gauge on the left has numerical markings from 140 to 260. Other gauges are smaller and scattered across the image, some with arrows indicating direction. The overall aesthetic is technical and futuristic.

HIT TASKFORCE MEETING 3

JUNE 24, 2015

DATA ASSET QUESTIONNAIRE UPDATE

- Since May 6, 2015 there has been one additional update to the questionnaire file.
- There are two more submissions pending (I believe).

DATA ASSET QUESTIONNAIRE UPDATE

- Division of Child and Family Services
 - CASE MANAGEMENT FOR: Aging, Disability, Early Intervention
 - Extracts can be created
 - Data cannot be accessed externally
 - Supports SQL and SAS
 - ? Any additional input from David Sater.
 - ? What groups remain pending.

DATA ASSET QUESTIONNAIRE – NEXT STEPS

- **LAST MEETING:** Discussed potential test report on Diabetes.
- Jerry will discuss this in more detail in his presentation.
- Overarching goal – Improve overall population health without increasing costs.

DIABETES TEST SCENARIO

EXTRACTS FROM THE DIABETES REPORT SPECIFICATIONS –*Prepared by Myers and Stauffer LC*

Measure Description:

- The percentage of patients 18-75 years of age with diabetes (Type 1 and Type 2) who had: Hemoglobin
- A1c (HbA1c) testing

DIABETES TEST SCENARIO

EXTRACTS FROM THE DIABETES REPORT SPECIFICATIONS –*Prepared by Myers and Stauffer LC*

Denominator: Patients aged 18-75 years of age as of December 31 of the measurement year who had a diagnosis of diabetes (type 1 or type 2).

Numerator: Count of patients with HbA1c test results $\leq 7\%$

Two methods are provided to identify patients with diabetes during the measurement year, or the year prior to the measurement year.

- 1. Pharmacy data – Patients who were dispensed insulin or oral hypoglycemic/ antihyperglycemics
- during the measurement year or the year prior to the measurement year.

DIABETES TEST SCENARIO

EXTRACTS FROM THE DIABETES REPORT SPECIFICATIONS –*Prepared by Myers and Stauffer LC*

2. Claims data –

- a. Patients who had two face-to-face encounters, in an outpatient setting or non-acute inpatient setting, on different dates of service, with a diagnosis of diabetes.
- b. Patients who had one face-to-face encounter in an acute inpatient or ED setting, with a diagnosis of diabetes,
 - During the measurement year or the year or prior to the measurement year. Services may be counted over both years.

HBA1C TEST BY RACE

Race	HbA1c_Test_Visits	Diabetes_Visits	Percent
Native American/Alaskan	605	17,702	3.42%
Asian/Pacific Islander	2,533	33,243	7.62%
