

Nevada State Innovation Model (SIM)
Division of Health Care Financing and Policy

Questions to consider for July Delivery System and Payment Alignment
Workgroup:

I. Patient-centered Medical Home

- a. What is the best method to capture the count of PCMHs in Nevada?
- b. Is a state expectation for 80% of all Nevadans connected to a PCMH the right goal?
- c. What payment arrangement would best support increasing the number and enhancing the level of PCMHs?
- d. If a PMPM payment was considered, what factors should determine the payment schedule? Geography, case index, PCMH recognition level, infrastructure, etc.
- e. If infrastructure support was reimbursed, would time-limited or bonus payment models be important to support the goal for increasing the number of PCMHs in Nevada?

II. Health Home for SuperUtilizers

- a. Definition of superutilizer?
- b. Distinction between health home and mere PCMH approach in Nevada?
- c. Payer recognition of health home model from a benefit package and reimbursement perspective?

III. Value-based Purchasing

- a. How will VBP be administered?
- b. Will provider performance be aggregated across payers or will each payer maintain their own measures?
- c. How will provider practices be supported during implementation?
- d. Can we define the general structure of VBP by the end of August 2015?
