Nevadans Deserve Better Than An Unaffordable, One-Size-Fits-All State Government Option Health

Dear Nevada DHHS,

I am writing you today to share the serious concerns I have about the state government option.

Nevada residents are relying on our health care system now more than ever and, during this critical time, we need strong, stable health care that meets the needs of ALL Nevadans, no matter where they live or work. The state government option is the wrong choice to meet this goal.

The negative consequences of the state government option could be far reaching for Nevada families. It could raise costs, while reducing access to the high-quality care Nevada families are counting on. Furthermore, Nevada hospitals are already dealing with shortages of the doctors and nurses needed to provide care to every patient and the state government option could worsen this crisis – threatening my access to care.

I encourage you to slow down and consider the many negative consequences this system could have for Nevada patients before implementing it.

Sincerely,
Terrie McArthur
