Applied Behavioral Analysis (ABA) Quarterly Services Report

Nevada Medicaid (FFS/MCO), State Fiscal Year 2024 Q4 - 2025 Q3 (April 1, 2024 – March 31, 2025)

Data was gathered and the report was authored using the Nevada Medicaid Data Warehouse DDM BV. The Nevada Health Authority (NVHA) data warehouse is comprised of claims data submitted by over 35,000 Medicaid providers from within

Nevada and across the country. While NVHA staff conscientiously make every effort to validate these data through continuous provider education and the use of highly experienced audit staff, the Division relies heavily on providers to submit accurate and complete information on Medicaid patients. It should therefore be understood by the users of NVHA reports on disease morbidity and patient health that the data source for these reports are based solely on patient claims data and may not be a complete and comprehensive health record.

Behavioral and Mental Health Provider: Billing or Performing providers that were enrolled in Nevada Medicaid and providing services during the indicated time period. This report time period is State Fiscal Year. Data gathered are based on the first date of service indicated on a paid claim. Fee for Service (FFS) and Managed Care Organization (MCO) claims that were paid at the header and detail level were collected using a data dimensional model that summarizes Medicaid claims data. The Nevada Medicaid Data Warehouse was queried on the day noted on the bottom of this report. Patient counts are unique, however, if a patient was eligible under both FFS and MCO during the indicated time period, they were indicated one time under each plan. Provider data are based on the Medicaid enrolled Billing and Performing provider information reported on a claim. Claims without a provider type code were excluded from the data. Provider counts are unique; however, if a provider was enrolled under both FFS and MCO during the indicated time period, they were counted one time under each plan. Due to the MCO's payment structure, the quantity of services reported are based on the billed quantity of services; therefore, use caution when analyzing this data as the quantity of services actually paid may be significantly lower than the quantity billed. Due to claims processing, data may still be preliminary for 2025 and subject to change. Services provided to all ages were included in this analysis. Provider Type 85 was used to identify Applied Behavior Analysis (ABA) providers and CPT Procedure Codes: 97153, 97155, 97156 were used to identify Adaptive Behavior Treatment (ABT) services.

The following Provider Type codes and Procedure codes were used to identify the populations defined in this analysis.

Applied Behavior Analysis (ABA)	Adaptive Behavior Treatment (ABT)
Provider Type Code and Description	CPT HCPCS Procedure Code and Description
14 Behavioral Health Outpatient Treatment 20 Physician M.D. Osteopath D.O. 26 Psychologist 34 Therapy 85 Applied Behavior Analysis	97153 ADAPTIVE BEHAVIOR TX BY TECH 97155 ADAPT BEHAVIOR TX PHY/QHP 97156 FAM ADAPT BHV TX GDN PHY/QHP
