

MEDICAID SERVICES MANUAL
TRANSMITTAL LETTER

June 9, 2009

MEMORANDUM

TO: CUSTODIANS OF MEDICAID SERVICES MANUAL
FROM:  JOHN A. LIVERATTI, CHIEF, COMPLIANCE
SUBJECT: MEDICAID SERVICES MANUAL CHANGES
CHAPTER 2000 – AUDIOLOGY SERVICES

BACKGROUND AND EXPLANATIONS

Audiology services is a Nevada Medicaid covered service. Historically the audiology policy has been included in MSM Chapter 1300 - DME, Disposable Supplies and Supplements. Program Services decided to make the policy more provider-friendly, so a separate chapter for Audiology was needed, thus creating a new Medicaid Services Manual, Chapter, 2000 - Audiology Services. The chapter has been expanded to explain in greater detail the coverage, limitations and overall policy of the Audiology Program. The chapter will be effective upon approval of the public hearing.

DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2000
MEDICAID SERVICES MANUAL	Subject: INTRODUCTION

2000 INTRODUCTION

The Nevada Medicaid Audiology program reimburses medically necessary audiology services to eligible Medicaid recipients under the care of the prescribing practitioner. Such services shall maintain a high standard of quality and shall be provided within the limitations and exclusions described in this chapter.

All providers participating in the Medicaid program must offer services in accordance with the rules and regulations of the Medicaid program. Audiology services are an optional benefit within the Nevada Medicaid program. All Medicaid policies and requirements (such as prior authorization, etc.) are the same for Nevada Check Up, with the exception of three areas where Medicaid and Nevada Check Up policies differ. For further clarification, please refer to the Nevada Check Up Manual, Chapter 1000.

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2001
MEDICAID SERVICES MANUAL	Subject: AUTHORITY

2001 AUTHORITY

The citation denoting the amount, duration and scope of services are found in the Code of Federal Regulations, (CFR) Part 440.110 and the Nevada Medicaid State Plan Attachment 3.1-A.

The State Legislature grants authority to the relevant professional licensure boards to set the standards of practice for licensed professionals in the Nevada Revised Statutes (NRS) for the following Specialists:

- NRS-Chapter 630-Physicians
- NRS-Chapter 637A-Hearing Aid Specialists
- NRS-Chapter 637B-Audiologists and Speech Pathologists

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2002
MEDICAID SERVICES MANUAL	Subject: AUTHORITY

2002 DEFINITIONS

2002.1 AUDIOLOGIST

Audiologist means any person who engages in the practice of Audiology (NRS 637B030). An Audiologist must be licensed by the Board of Examiners for Audiology and Speech Pathology and meet the requirements of NRS 637.160.

The practice of audiology consists of rendering services for the measurement, testing, appraisal, prediction, consultation, counseling, research or treatment of hearing and hearing impairment for the purpose of modifying disorders in communication involving speech, language and hearing.

2002.2 AUDIOGRAM

An audiogram is a means of recording the results of a hearing test.

2002.3 AUDITORY BRAINSTEM IMPLANT (ABI)

Auditory Brainstem Implant (ABI) is similar to a cochlear implant, but the electrode is implanted in the brainstem, rather than the cochlear in the ear. The brainstem electrode is placed next to the cochlear nuclei. The electrode is connected to an external microphone and processor which allows the patient to identify sound.

2002.4 BONE ANCHORED HEARING AID (BAHA)

A Bone Anchored Hearing Aid (BAHA) system is a small titanium implant placed in the bone behind the ear where it osseointegrates. The vibrations from the sound processor are transmitted to the implant via a percutaneous abutment.

2002.5 COCHLEAR IMPLANT

A cochlear implant is a surgically implanted electronic hearing device designed to produce useful hearing sensations to a person with severe to profound nerve deafness by electrically stimulating nerves inside the inner ear. External components of the cochlear implant include a microphone, speech processor and transmitter.

2002.6 EAR MOLDS

Ear molds form the connection between the ear and hearing aid.

2002.7 EAR IMPRESSIONS

All custom made hearing aids and ear molds are made from a cast of the ear. The cast is referred

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2002
MEDICAID SERVICES MANUAL	Subject: AUTHORITY

to as an ear impression.

2002.8 HEALTHY KIDS (EPSDT)

Early and Periodic Screening, Diagnostic and Treatment Services (EPSDT) are preventive and diagnostic services are available to most recipients under age 21. In Nevada, the EPSDT program is known as Healthy Kids. Refer to Chapter 1500 of the Medicaid Services Manual for more information.

2002.9 HEARING AID DISPENSERS

Non-audiology providers of hearing aids (Durable Medical Equipment (DME) providers) may provide hearing aids and hearing aid related services and items but no professional audiology services for which an audiologist's academic credentials and licensing are required.

Non-audiology providers of hearing aids are covered to provide hearing aid counseling, hearing aid fitting and sale of the hearing aid(s) itself. Coverage also includes revision of hearing aid accessories, replacement of parts and repairs.

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2003
MEDICAID SERVICES MANUAL	Subject: POLICY

2003 **AUDIOLOGY POLICY**

2003.1 **COVERAGE AND LIMITATIONS**

Audiology services and supplies are covered by Nevada Medicaid for eligible recipients. Audiological services must be performed by a certified and licensed audiologist as described in the NRS.637B. Refer to specific coverage and limitations for each service.

2003.1A **PROVIDER RESPONSIBILITY**

Providers must verify recipient eligibility before rendering services. The presence of a Medicaid and Nevada Check Up identification card does not guarantee eligibility. It is the provider's responsibility to ask the recipient if there is additional audiology coverage through third party payers.

The provider will allow, upon request of proper representatives of the Division of Health Care Financing and Policy (DHCFP), access to all records which pertain to Medicaid or Nevada Check Up recipients for regular review, audit or utilization review. Providers must inform Nevada Medicaid of any misuse of the Medicaid or Nevada Check Up card or inappropriate utilization.

2003.1B **RECIPIENT RESPONSIBILITY**

Services requested by the recipient, but for which Medicaid makes no payment are the responsibility of, and may be billed to, the recipient. Nevada Medicaid recipients are only responsible for payment of services not covered by Medicaid. Prior to service, the recipient must be informed in writing he/she will be responsible for payment. The recipient is responsible for:

1. presenting a valid Nevada Medicaid and Nevada Check Up card to the provider at each visit;
2. presenting any form or identification necessary to utilize other health insurance coverage;
3. making and keeping appointments with the provider; and
4. notifying providers immediately of any change in eligibility status, e.g., eligibility changes from fee for service to managed care.

2003.2 **AUDIOLOGICAL TESTING**

2003.2A **COVERAGE AND LIMITATIONS**

1. Audiological testing is limited to once per 12 rolling months for eligible recipients and must be referred by an M.D.

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2003
MEDICAID SERVICES MANUAL	Subject: POLICY

2. A physician must examine the hearing aid beneficiary for pathology or disease no more than six months prior to the fitting of the aid(s) and submit a statement certifying the medical necessity of the evaluation to the audiologist.
3. One audiogram testing per 12 rolling months does not require prior authorization. The audiogram should be no more than six months old.
4. To qualify for coverage by Medicaid the report must show levels of hearing loss as follows:
 - a. Adults: at least 30 decibels for the frequency range of 500-3000 Hz.
 - b. Children: at least 20 decibels for the frequency range of 500-3000 Hz.

2003.2B PRIOR AUTHORIZATION

1. A prior authorization request is needed for any hearing aid(s) exceeding the allowed amount of \$350.00 per aid. The audiologist's testing reports must be attached and show the following:
 - a. hearing levels and discrimination scores including the type of hearing loss (conductive or neuron-sensory); and
 - b. a copy of the audiogram which should be no older than six months; and
 - c. patient's capabilities for use of the hearing aid(s), physical dexterity, mental capabilities and motivation ; and
 - d. type of hearing aid(s) recommended including the cost.
2. Additional hearing evaluations outside the normal program guidelines must be prior authorized. The audiologist must keep a copy of the referral and test results in the recipient's medical record.

2003.3 HEARING AIDS

2003.3A COVERAGE AND LIMITATIONS

Medicaid will reimburse only licensed physicians, licensed audiologists and certified hearing aid dispensers for hearing aid fitting and dispensing.

1. Hearing aids and related supplies are covered by Nevada Medicaid for eligible recipients. Coverage is limited to once every 24 rolling months. This may be exceeded through Healthy Kids (EPSDT) if it is determined to be medically necessary by the QIO-like vendor. Refer to Chapter 1500 of the Medicaid Services Manual for more information.

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2003
MEDICAID SERVICES MANUAL	Subject: POLICY

2. The manufacturer must be willing to accept the payment for the hearing aid(s) from the Medicaid hearing aid dispensers. Such payment constitutes payment in full. Shipping and handling for the hearing aid(s) is not a covered benefit. Recipients are not to be billed for any additional charges.
3. Hearing Aid Batteries: Hearing aid batteries are limited to one package per aid per rolling 30 days. Batteries must be dispensed per rolling 30 days and do not need prior authorization.
4. Ear Molds: Ear molds are to be provided with each new behind-the-ear hearing aid. Replacement for children is covered without prior authorization through Healthy Kids (EPSDT). Replacement for adults and children on Nevada Check Up is covered when medically necessary without prior authorization up to two in 24 months.
5. Hearing Aid Fitting and Dispensing: Hearing aid fitting and dispensing includes selecting, ordering, fitting, evaluating of appropriate amplification and dispensing the hearing aid(s). It also includes an initial supply of batteries. Medicaid reimburses for ear impressions and ear molds as a separate procedure.

The provider must allow the recipient to have a 30-day trial period with a money back guarantee if the aid(s) does not benefit the patient. A recheck of the patient with the aid(s) must be offered two weeks or sooner following dispensing to determine if there are improved hearing levels and discrimination scores. The visit(s) should also include counseling on the use and care of the hearing aid(s) and ensure proper fit of the ear molds.

6. Warranty: Hearing aids must include a minimum 12 month warranty from the manufacturer that covers repair, damage and loss of the hearing aid(s). The provider must maintain the warranty in the recipient's medical record. A second year warranty or insurance is required. If the manufacturer does not include a second year warranty the provider should request a prior authorization for additional insurance.
7. Replacement: Hearing aids may be replaced when:
 - a. the current aid(s) cannot be repaired as determined by the Medicaid provider;
 - b. the recipient's hearing deficit requires a different type of device for maximum benefit;
 - c. the manufacturer's warranty has expired; or
 - d. there is no other insurance.
8. Broken or Lost Hearing Aids: If replacement of a hearing aid(s) becomes necessary after 12 rolling months or more, the recipient will have a reevaluation by the audiologist prior to fitting of the replacement aid(s). The replacement aid(s) must be prior authorized if the aid(s) are no longer covered by a manufacturer's warranty or other insurance.

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2003
MEDICAID SERVICES MANUAL	Subject: POLICY

9. Supplies/Accessories: Hearing aid supplies/accessories (i.e. ear hooks, tubes) do not need prior authorization.

10. Testing/Repairs: Reimbursement will not be made for repairs covered by the manufacturer's warranty or other insurance.

If testing/repair of the hearing aid(s) is needed after this time period, it is limited to once every 12 rolling months per aid. The provider will need to identify which aid (right or left) is being repaired. Repairs must be covered by a six month warranty.

Medicaid will reimburse for repairs on hearing aids that were not purchased by Medicaid. Medicaid does not reimburse for repairs if the hearing aid was damaged by tampering or misuse. Recipients are not to be billed for any additional charges.

11. Non-Covered Hearing Aids: Semi-implantable middle ear hearing aids are not a covered benefit as they are considered investigational.

2003.3B PRIOR AUTHORIZATION

1. Hearing aids exceeding the allowed amount of \$350.00 per aid require prior authorization from the QIO-like vendor and need to include medical necessity for the more expensive aids, including cost.
2. Prior authorization with medical necessity is required for any additional aid(s) needed during the 24 rolling month period.
3. Additional evaluations, fitting and dispensing, ear molds, testing/repair, replacement of broken or lost hearing aid(s), supplies or insurance outside the normal program guidelines will require prior authorization from the QIO-like vendor. Each request must have the appropriate documentation attached.

2003.3C RECIPIENT RESPONSIBILITY

Along with previously mentioned responsibilities, the recipient is also responsible for:

1. routine maintenance,
2. additional batteries beyond the coverage restrictions of one package per aid per rolling 30 days,
3. repairs and replacement of the hearing aid(s) if the recipient loses Medicaid eligibility
4. picking up the hearing aid(s) and returning for any necessary adjustments within the time allotted for such adjustments.

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2003
MEDICAID SERVICES MANUAL	Subject: POLICY

2003.4 COCHLEAR AND AUDITORY BRAINSTEM IMPLANTS

2003.4A COVERAGE AND LIMITATIONS

1. Bilateral and unilateral cochlear implants are a Nevada Medicaid covered benefit when determined to be medically necessary for eligible recipients with profound hearing impairment. Covered services include but are not limited to:
 - a. otologic examination
 - b. audiological evaluation
 - c. physical examination
 - d. psychological evaluation
 - e. surgical implantation of the device
 - f. postoperative follow-up evaluation and rehabilitation.

2. Coverage is restricted to those recipients, who meet the following audiologic/medical criteria as determined by a physician or audiologist:
 - a. recipient must be referred by an M.D. or Ear, Nose and Throat specialist with documentation to determine medical candidacy for such a device. This is to include recent (within 6 months) results of a CT or MRI scan to evaluate the anatomy of the inner ear; and
 - b. must be at least 12 months of age or older ; and
 - c. must suffer from severe to profound pre-or-postlingual hearing loss (70 decibels or greater) confirmed by audiologic testing that obtains limited or no benefit from appropriate hearing aids for six months or greater; and
 - d. must have the cognitive ability to use auditory clues and a willingness to undergo an extended program of rehabilitation; and
 - e. must be free of middle ear infection; and
 - f. must have an accessible cochlear lumen that is structurally suited to implantation; and
 - g. be free of lesions in the auditory nerve and acoustic areas of the central nervous system; and
 - h. have no contraindications for the surgery.

3. Use of the device must be in accordance with the Food and Drug Administration (FDA) approved labeling.

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2003
MEDICAID SERVICES MANUAL	Subject: POLICY

4. There must be good family support with self motivation, as determined by a physician or audiologist. Education of families/caregiver and the recipient must be conducted to ensure understanding of the benefits and limitations of the device, appropriate expectations, commitment to the development of auditory and verbal skills, dedication to the therapeutic program and the ability to adequately care for the external equipment.

5. Adults

Cochlear implants may be covered for prelinguistically (before the development of language), perilinguistically (during the development of language), and postlinguistically (after language has fully developed) deafened adults (over age 21). Postlinguistically deafened adults must demonstrate test scores of 40% or less on sentence recognition scores from tape recorded tests in the recipient's best listening condition.

6. Children

Cochlear implants may be covered for prelinguistically and postlinguistically deafened children from 12 months through 20 years of age. Bilateral profound sensorineural deafness must be demonstrated by the inability to improve on age appropriate closed set word identification tasks with amplification.

7. Rehabilitation Program

A post-cochlear implant rehabilitation program is necessary to achieve benefit from the cochlear implant for both children and adults. The program is performed by an audiologist and speech-language pathologists. The rehabilitation program includes development of skills in understanding running speech, recognition of consonants, vowels and tests of speech perception ability. Refer to Chapter 1700 for Therapy Services of the Medicaid Service Manual.

8. Warranty

The limited warranty must be included in the documentation from the product manufacturer. Services beyond the warranty must be prior authorized.

9. Damage and Loss

Damage and loss insurance is required at the time of implant. Insurance must be all-inclusive for replacement and loss, no deductibles or co-pays are allowed. There must be continuous insurance coverage for five years. Insurance is not to exceed \$250/year.

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2003
MEDICAID SERVICES MANUAL	Subject: POLICY

2003.4B PRIOR AUTHORIZATION

Prior authorization is required with medical documentation to substantiate the request for the cochlear implant.

2003.4C RECIPIENT RESPONSIBILITY

Along with previously mentioned responsibilities, the recipient is also responsible for:

1. wearing a helmet while bicycling, roller blading, playing football and soccer; players must not “head” the ball.
2. keeping equipment out of reach of animals.
3. removing the speech processor and headset before entering a room where an MRI scanner is located.
4. wearing the special harness that secures the speech processor during active sports. For water sports and activities that generate high levels of static electricity, such as playing on trampoline and plastic slides, the equipment must be removed.

2003.5 AUDITORY BRAINSTEM IMPLANT (ABI)

2003.5A COVERAGE AND LIMITATIONS

1. An Auditory Brainstem Implant (ABI) is a covered benefit as medically necessary when all of the following criteria are met;
 - a. the recipient is 12 years of age or older; and
 - b. the recipients has been diagnosed with Neurofibromatosis Type 2 (NF2); and
 - c. the recipient is undergoing bilateral removal of tumors of the auditory nerves; and
 - d. it is anticipated that the recipient will become completely deaf as a result of the surgery; or
 - e. the recipient had bilateral auditory nerve tumors removed and is now bilaterally deaf.
2. Warranty: The limited warranty must be included in the documentation from the product manufacturer. Services beyond the warranty must be prior authorized.
3. Rehabilitation Program: The recipient must have multiple sessions with the audiologist to test, adjust the sound processor and learn to interpret new sounds.

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2003
MEDICAID SERVICES MANUAL	Subject: POLICY

2003.5B PRIOR AUTHORIZATION

Prior authorization is required with medical documentation to substantiate the request for the auditory brainstem implant.

The physician who performs the cochlear implant or auditory brainstem implant surgery must obtain prior authorization from the QIO-like vendor before providing the service. Authorization is determined based on medical necessity. Each request must include documentation to show the recipient has met Medicaid guidelines for the procedure.

2003.6 BONE-ANCHORED HEARING AID (BAHA) SYSTEM

2003.6A COVERAGE AND LIMITATIONS

Bone Anchored Hearing Aid (BAHA) also called an implantable bone conduction hearing aid, is a Nevada Medicaid covered benefit when it is determined medically necessary for eligible recipients five years and older. The BAHA is an alternative hearing device for recipients unable to use conventional hearing instruments.

BAHA Softbands and BAHA Headbands are a covered benefit for children of any age who have conditions that are eligible for a BAHA implant. The BAHA system is designed to treat:

1. Conductive or Mixed Hearing Loss from possible causes of:
 - a. chronic otitis media
 - b. congenital malformations where the cochlear function is good but there are no ear canals
 - c. cholesteatoma
 - d. middle ear dysfunction/disease
 - e. external otitis

2. Unilateral Sensorineural Deafness or Single Sided Deafness (SSD) from possible causes of:
 - a. acoustic neuroma tumors, other surgical intervention
 - b. sudden deafness
 - c. neurological degenerative disease
 - d. trauma
 - e. ototoxic treatments
 - f. genetic
 - g. Meniere' Disease

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2003
MEDICAID SERVICES MANUAL	Subject: POLICY

3. **Audiologic/Medical criteria:**

Recipients must be referred by an M.D. or Ear, Nose and Throat Specialist with documentation to determine medical candidacy for such a device. This may include a radiology report. Assessment by an audiologist to determine if the type and degree of hearing loss meet the necessary criteria is also required.

a. **Mixed and Conductive Hearing Loss with the following criteria:**

1. >5 years of age
2. <45 dB HL BC pure tone average (PTA) (measured at 0.5, 1, 2 and 3K Hz)
3. >or equal to 60% speech discrimination scores (using standardized test)
4. bilateral fitting-symmetric bone conduction thresholds are defined as no more than 10 dB difference of the pure tone average (PTA) or less than 15 dB individual frequencies.

b. **Single Sided Deafness with the following criteria**

1. >5 years of age
2. normal hearing in contralateral ear. (Normal hearing is defined as pure tone average air conduction (PTAAC) threshold equal to or better than 20 dB HL [measured at 0.5, 2 and 3 kHz]).
3. Functions by transcranial routing of the signal.

c. **Additional qualifying criteria should include:**

1. sufficient bone volume and bone quality present for successful implant placement; and
2. no contraindications to anesthesia or surgery; and
3. careful consideration given to the recipient's physical, psychological and emotional state as determined by physician or audiologist; and
4. well informed recipients who have the right expectations of the BAHA system and are highly motivated, as determined by physician or audiologist; and
5. recipients who are able to maintain and clean the skin around the abutment or with the aid of others. For children, the responsibility falls on the parents of guardians; and
6. recipients trained in the care, use of the device and comfortable with connecting and disconnecting the sound processor from the abutment, prior to the fitting of the speech processor.

4. **Warranty:** The limited warranty must be included in the documentation from the product manufacturer. Services beyond the warranty must be prior authorized.

	MTL 12/09
DIVISION OF HEALTH CARE FINANCING AND POLICY	Section: 2003
MEDICAID SERVICES MANUAL	Subject: POLICY

5. Follow-Up: It is important the audiologist provides a follow-up program for the recipient.

2003.6B PRIOR AUTHORIZATION

Prior authorization is required with medical documentation to substantiate the request for the BAHA implant, softband or headband.

The physician who performs the BAHA implant surgery must obtain prior authorization from the QIO-like vendor before providing the service. Authorization is based on medical necessity. Each request must include documentation to show the recipient has met Medicaid criteria for the procedure.

2003.6C RECIPIENT RESPONSIBILITY

Along with previously mentioned responsibilities, the recipient is also responsible for:

1. removing the sound processor prior to bathing, showering, swimming or engaging in any water activities, as it is not water proof,
2. never exposing the sound processor to extreme heat or cold,
3. avoiding the loss of the sound processor during physical activity by removing it or using the safety line provided
