

## A Plan to Monitor Healthcare Access for Nevada Medicaid Recipients

Medicaid Fee-For-Service Program:

Methods for Assuring Access to Covered Medicaid Services

Note: this is a draft report that will be finalized with any public comments

-Updated March 2024-

## Executive Summary

The Nevada Department of Health and Human Services (DHHS) promotes the health and well-being of its residents through the delivery or facilitation of a multitude of essential services to ensure families are strengthened, public health is protected, and individuals achieve their highest level of self-sufficiency. The DHHS is comprised of six Divisions: Aging and Disability Services Division (ADSD); Division of Child and Family Services (DCFS); Division of Health Care Financing and Policy (DHCFP); Division of Public and Behavioral Health (DPBH); Division of Welfare and Supportive Services (DWSS); and the Public Defender.

The DHCFP works in partnership with the [Centers for Medicare and Medicaid Services](#) (CMS) to assist in providing quality medical care for eligible individuals and families with low incomes and limited resources, via the Nevada Medicaid and Nevada Check Up (NCU) programs.

The DHCFP's framework for the Access to Care Monitoring Review Plan (ACMRP) for the Fee-For-Service (FFS) Nevada Medicaid population is adapted from a synthesis of several sources, including the agencies within the U.S. Department of Health and Human Services. The DHCFP framework includes the following components:

- A. Characteristics and challenges of the recipient population
- B. Approach for review and analysis
- C. Improving access

The Code of Federal Regulations at 42 CFR 447.203 refers to the requirements for the ACMRP for payment rates and comparisons to the general population. The provision indicates it is necessary for states to compare Medicaid payment rates to the rates of Medicare or private payers. Due to the requirements set forth in Nevada Revised Statute (NRS 686B.080), the information for the rates paid by private payers is considered proprietary and is not subject to disclosure, therefore, the DHCFP will monitor, review, and assess Medicaid rates and compare those rates to the rates paid by Medicare only.

Within the DHCFP framework of the ACMRP, measures were selected to provide a comprehensive overview of health care access in Nevada, while taking into account the limitations of available data sources.

The DHCFP process for monitoring health care access includes data collection and trend analysis for identification and interpretation of access to care needs. The DHCFP Quality, Access and Availability Unit will oversee the tracking of selected measures, compare with previous studies, and lead quality improvement activities. Upon the identification of healthcare access problems, the DHCFP will analyze each measure in conjunction with public input to identify processes that need improvement and implement a remediation action plan.

---

## I. Overview

The mission of the DHCFP is to purchase quality health care services for low-income Nevadans in the most efficient manner possible; promote equal access to health care at an affordable cost to the taxpayers of Nevada; restrain the growth of health care costs; and review Nevada Medicaid and other state health programs to maximize potential federal revenue.

The DHCFP, as part of the DHHS, administers two major health coverage programs which provide health care to Nevadans: (1) Nevada Medicaid provides health care to low-income families, as well as aged, blind, and disabled individuals. Nevada, as part of the Patient Protection and Affordable Care Act (PPACA), expanded the Medicaid program to include low-income childless adults effective January 1, 2014; and (2) Nevada Check Up (NCU) also known as, Children's Health Insurance Program (CHIP) which provides health coverage to low-income, uninsured children who are not eligible for Nevada Medicaid.

The evaluation of healthcare access for all Nevadans is important to the DHHS and the information provided by the other DHHS agencies assists the DHCFP in determining if the Nevada Medicaid and NCU programs are positively affecting recipients' health outcomes.

The DHCFP conducted a Public Hearing on June 28, 2022, to present on Medicaid COVID American Rescue Plan Act (ARPA) State Plan Amendment (SPA). The DHCFP received zero verbal public comments and zero written public comments regarding the proposed revisions to the Medicaid COVID ARPA SPA. On **month day, 2024**, the DHCFP published the draft ACMRP to our public website to solicit public comment. The ACMRP will be posted for 30 days with requests for written feedback to be submitted to [dhcftp@dhcftp.nv.gov](mailto:dhcftp@dhcftp.nv.gov).

The DHCFP access plan identifies an array of measurement methods and processes. The access monitoring system addressed in this document considers: (1) the characteristics of the Nevada Medicaid enrollees; (2) the availability of the Nevada Medicaid providers; and (3) utilize a quality improvement process to address access issues.

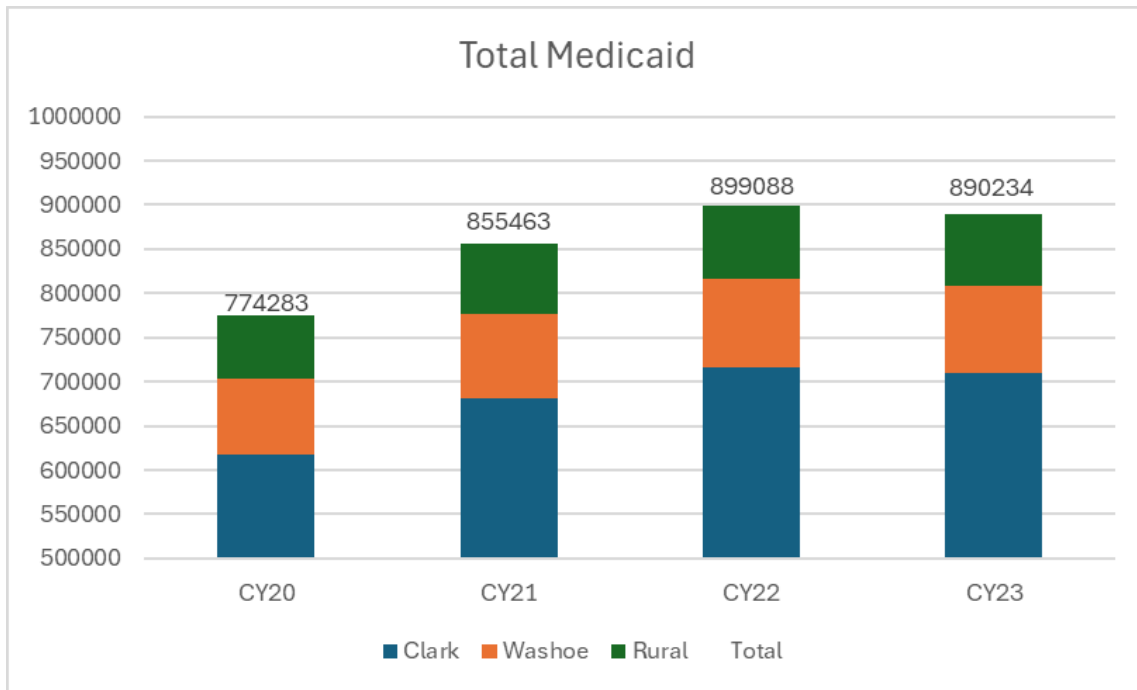

This report shows a comprehensive portrayal of healthcare access for the Nevada Medicaid and NCU recipients. The DHCFP will continue to track trends and identify access deficiencies in Nevada Medicaid for our FFS population using the set of measures identified in this document as we embark on implementing statewide Managed Care Organization (MCO).

## II. Characteristics of the Recipient Population

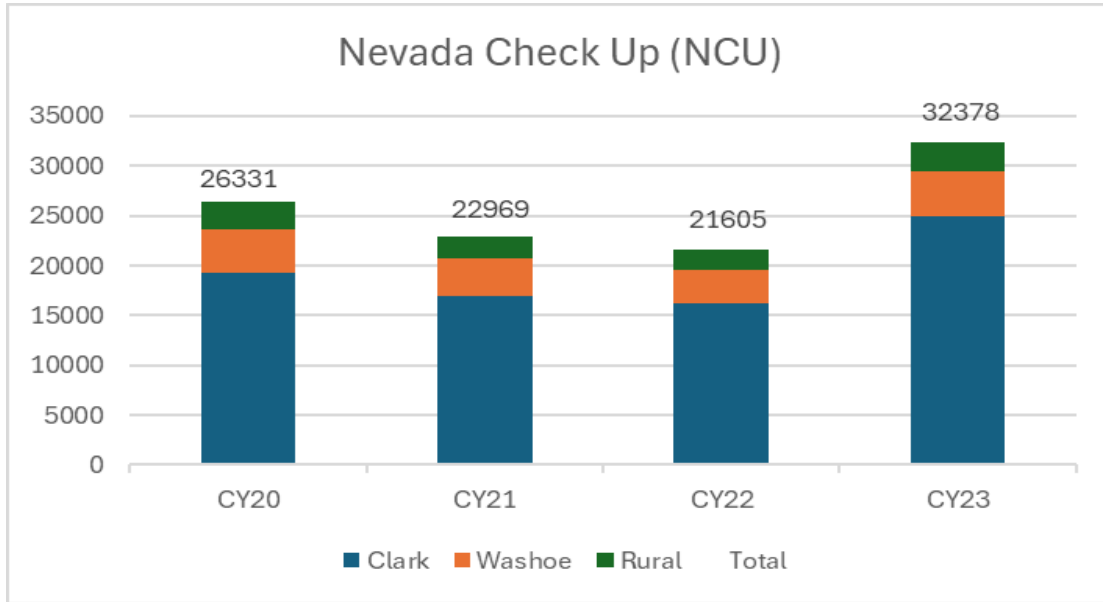

Nevada’s geographical structure as well as the rapid growth in Nevada Medicaid poses challenges in accessing health care. Nevada is made up of 17 counties which include urban, rural, and frontier areas. Due to the rural and frontier nature throughout the state, some recipients must seek medical care outside their residential area. These rural and frontier areas experience scarce providers and services. Residents living near state lines or borders may be geographically closer to out-of-state providers than in-state providers; therefore, Nevada recognizes border catchment areas as in-state providers and continues to seek guidance through the Medical Care Advisory Committee (MCAC) and public workshops in the identification of areas with shortages that impact the Nevada Medicaid recipients’ access to care.

The following figures: Total Medicaid Caseload **Figure 1** and Nevada Check Up (NCU) Caseload **Figure 2**, reflect the closing caseloads by Calendar Year (CY) January 1<sup>st</sup> – December 31<sup>st</sup> and include the geographical distributions. This data does not include retroactive cases but does include waivers and traditionally eligible Medicaid recipients (e.g. children; parents/caretakers; aged, blind, and disabled) as well as the adult expansion population from the Affordable Care Act (ACA).

**Figure 1. Total Medicaid Caseload**

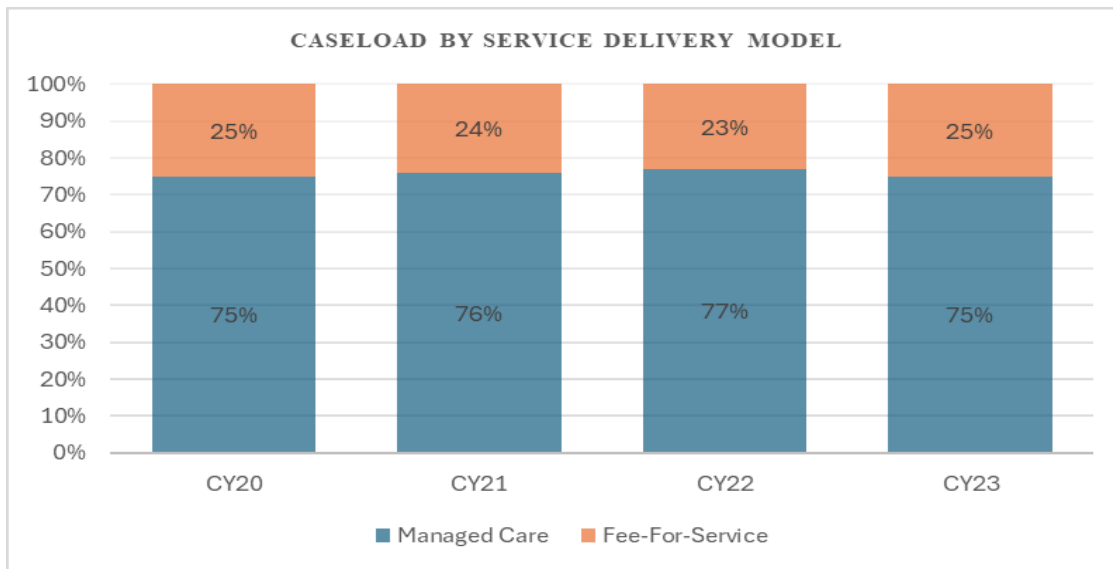

**Figure 2. Nevada Check Up (NCU) Caseload**

Nevada has two service delivery models: Fee-For-Service (FFS) and Managed Care Organization (MCO). Currently, the MCO service delivery model consists of four medical managed care plans and a Dental Benefits Administrator (DBA). As of the close of CY 2023, a little over 75 percent of the Nevada Medicaid and NCU recipients were enrolled with an MCO. The 25 percent of recipients being served through the FFS model include parents and children, newly eligible adults, individuals with disabilities, the elderly, and all recipients living in rural and frontier areas. **Figure 3** below shows that the share of recipients enrolled with the MCO model has been relatively stable during the last four CYs, however, the DHCNP anticipates a reduction in the FFS population with the implementation of statewide MCO.

**Figure 3. Share of Caseload by Service Delivery Model**

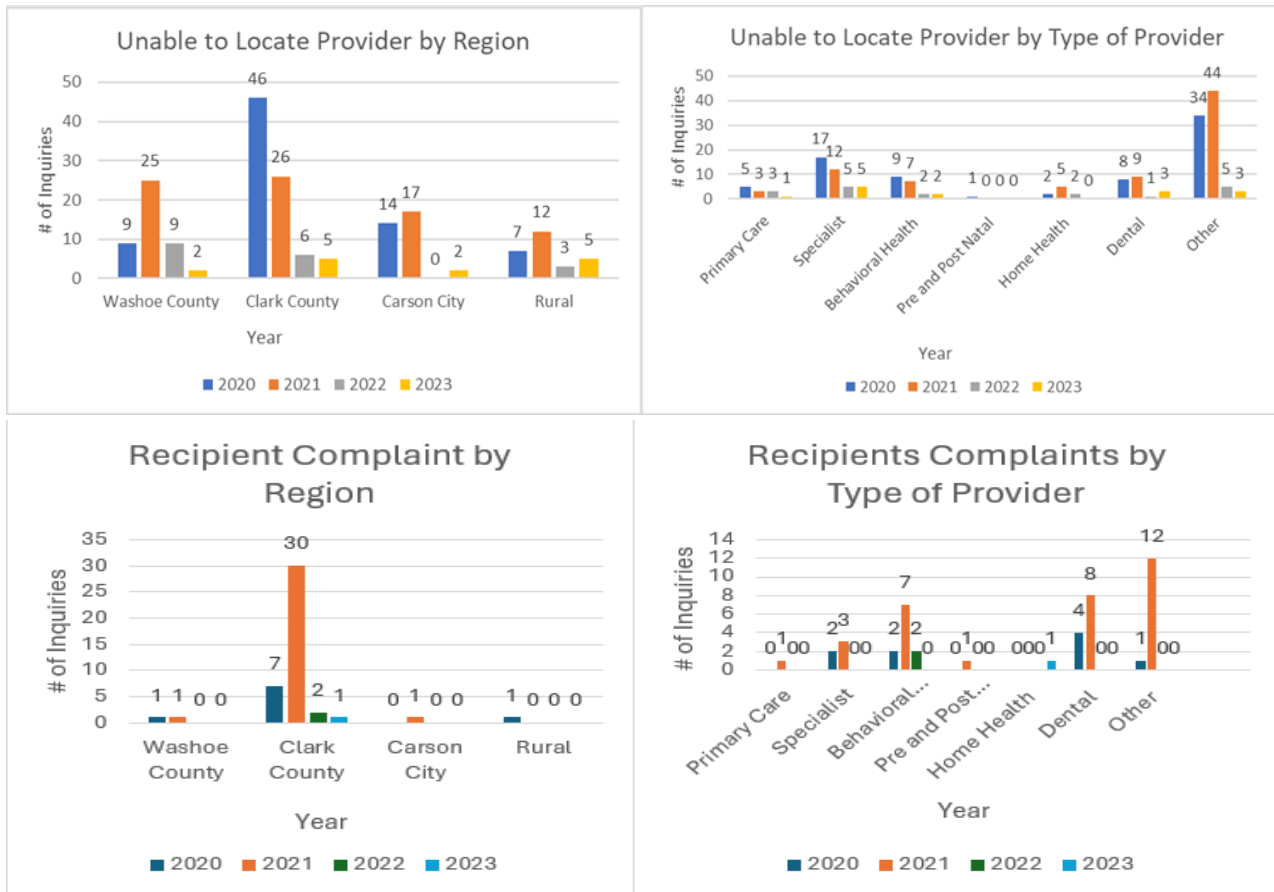

### III. Access Concerns Raised by Recipients

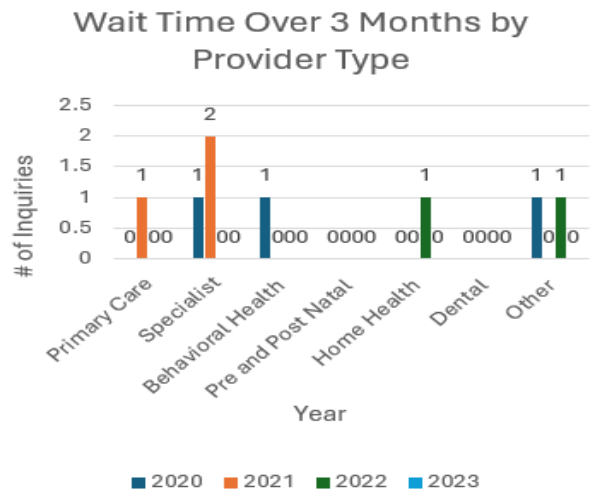

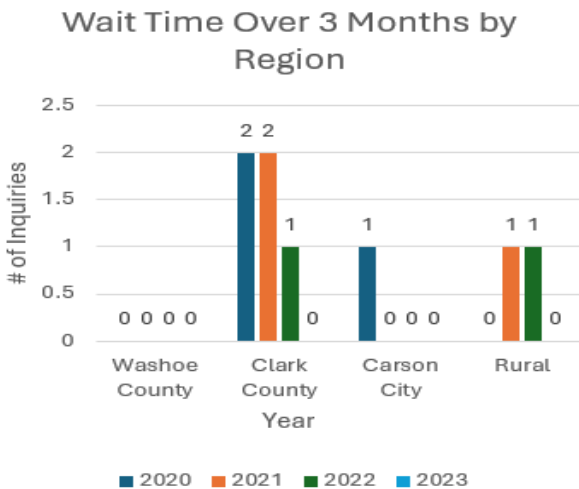

The DHCFP currently gathers information from recipients regarding access to care through customer service phone lines, public workshops, public hearings, stakeholder meetings, and through the legislative process. The customer phone service line is a toll-free line operated through the four DHCFP district offices (DO). Customer service representatives will assist callers to find health care providers or will refer the recipient to a Health Care Coordinator (HCC) if more assistance is required or an access to care issue is apparent. The DHCFP currently tracks recipient access to care concerns through a case management system. The customer service phone line is similar to the DWSS customer service call center and the MCO customer service line. These customer service systems and staff work together when necessary to provide referrals and information to recipients.

When a recipient under the FFS model calls in regarding an access to care inquiry, they are assigned to an HCC within the DHCFP DOs to assist with locating providers. When a recipient under the MCO model calls, they are referred to their assigned MCO for assistance. **Figure 4** below tracks recipient issues from CY 2020 through CY 2023. The DHCFP monitored recipient access to care calls by entering data pertaining to the reason for the call in the form of an electronic tracking log. This data identifies the access to care issues, by both region and provider type (the “other” category within the provider type breakdown is used for items not tied to an identified provider type), for the following: unable to locate provider, recipient complaint, and wait time over three months. Four main regions were used: Washoe, Clark, Carson and Rural.

Continual tracking will allow the DHCFP to better address access to care issues. The following graphs depict the information gathered by HCC’s who have received referrals due to a reported access to care issue.

**Figure 4. Referrals Due to Access to Care Issues**

The DHCFP staff also attends stakeholder councils, consortiums, and boards where stakeholders share concerns and develop long term strategic plans. In addition, the DHCFP gathers input through legislative meetings and testimony.

The State continues to hold public workshops and hearings to solicit public input including provider qualifications and potential access issues when services are developed or changed.

#### IV. Comparison Analysis of Nevada Medicaid Payment Rates to Medicare

The data provided in **Tables 1-3** below are the rate comparison between Medicare and Medicaid rates. Nevada Medicaid rates are based on the methodology defined in the Nevada Medicaid State Plan. The DHCFP reimburses the same amount for adults and children for the comparison provided in **Tables 1-3**.

The information below is taken from the Nevada Medicaid State Plan and provides the methodology currently used for most provider types included in the rate comparison:

Payments for services using Current Procedural Terminology (CPT) codes will be calculated using the January 1, 2014, unit values for the Nevada-specific resource based relative value scale (RBRVS) and the 2014 Medicare Physician Fee Schedule conversion factor.

The methodology varies depending on code ranges and are based on Medicare facility or non-facility rates. The rate comparison in the tables break out the facility and non-facility rate comparisons. Percentages for the service codes and provider types are outlined in the Nevada Medicaid State Plan.

The rate methodology for Dental services is currently based on the following:

Services billed using Current Dental Terminology (CDT) and CPT codes will be calculated using unit values for the Nevada-specific RBRVS for the year that the specific CPT code was set in the system and the 2002 Medicare Physician Fee Schedule conversion factor. Payment will be the lower of billed charges, or the amounts specified below:

- Surgical Codes 10000 – 58999 and 60000 – 69999 will be reimbursed at 90% of the Medicare facility rate.
- Radiology Codes 70000 – 79999 will be reimbursed at 100% of the Medicare facility rate.
- Evaluation and Management Codes 99202 – 99499 will be reimbursed at 90% of the Medicare non-facility rate.

Due to the requirements set forth in the Nevada Revised Statute (NRS) 686B.080, an analysis was not performed comparing the Nevada Medicaid rates to other payers, as the information for rates is considered proprietary and is not subject to disclosure, as such, rates were compared to the State of Utah in the tables below.

Prior to submitting a State Plan Amendment (SPA), Nevada currently reviews any rate changes to identify the impact on access to care. When preparing a SPA that reduces rates or restructures provider payment, an access review may be conducted that is relevant to the affected service prior to submission to determine any potential impact of access to care. The results will be provided to the CMS for their review when the SPA is submitted. An exception would be if an access review were completed that addresses the affected service within the 12 months prior to the SPA submission. In those instances, Nevada Medicaid will continue to provide the previous review to the CMS.

The DHCFP will complete an ongoing review and analysis for the identified core provider types at a minimum of every three years. The DHCFP will also monitor access for any affected provider groups after implementation of a SPA that reduces or restructures provider payment that takes into consideration: enrollee needs; availability of care and providers; utilization of services; and service payment information.

### Facility & Non-Facility Rate Comparison

**Tables 1-3** are a sampling of the procedures with the highest utilization for the services outlined in the Access to Care guidance and then compared to rates for Utah's Medicaid and Medicare rates. *CY2022 referenced by the DHCFP Rates unit for this report utilizes the January 1, 2023, fee schedule.*

**Table 1. Facility Rates**

Procedure Code & Description		Nevada Medicaid Rates	CY2022 Medicare (MC) Facility Rates for Nevada	Utah Medicaid Rates	CY2022 MC Facility Utah

## V. Review of Current Access to Care

**Tables 4-7** detail the DHCFP's utilization of claims data reviews to monitor and trend four measures: 1. Active Providers: Comparing the number of providers that are enrolled in Nevada Medicaid to the number of providers that are billing for services; 2. Recipient Utilization: Trending the number of recipients that are accessing services by region and monitoring fluctuation in increases and decreases over time; 3. Recipient Penetration Rates: Monitoring the recipient penetration rate by reviewing service utilizers compared to enrolled recipients; and 4. Analyzing the top 10 diagnosis codes in each region by provider type, reviewing how many specialists are enrolled within that provider type, and analyzing the number of enrolled providers that are billing for services related to the diagnoses.

The DHCFP intended to review these metrics on a quarterly basis, however due to the 2020 COVID pandemic priorities and projects were adjusted to meet the demands of the pandemic. The DHCFP will review these metrics moving forward and if significant changes are noted, the DHCFP access staff will present these changes to executive leadership who will assign multidisciplinary staff to participate in a Quality Improvement Team (QIT) to review the data and implement strategies and corrective actions to address access outcomes.

**Table 4. Measure 1**

1: Active Providers: Compare the number of providers enrolled to the number of providers billing for services.												
Calendar Year	Clark County			Washoe County			All Other Nevada Counties			Total		
	Enrolled Providers	Billing Providers	Rate	Enrolled Providers	Billing Providers	Rate	Enrolled Providers	Billing Providers	Rate	Enrolled Providers	Billing Providers	Rate
CY 2020	18,946	3,452	18.2%	5,183	844	16.3%	2,356	693	29.4%	26,484	4,988	18.8%
CY 2021	19,594	3,517	17.9%	5,184	865	16.7%	2,369	679	28.7%	27,147	5,060	18.6%

	Z00129	Encounter for routine child health examination without abnormal findings	13,568	14,633	N/A	14,476

\*Nevada Medicaid policy, providers are allowed 90 days from the date of service(s) or date of eligibility decision, whichever is later to submit claims, as such not all December 2023 claims have been accounted for within this report.

## VI. Nevada Medicaid/Nevada Check Up Provider Composition

The geographical structure of Nevada is made up of 17 counties with unique demographic and clinical characteristics. Through geographical analysis studies, a complete understanding of the population we serve will ensure that all recipients are able to successfully obtain the healthcare services they need and are entitled to under Federal and State law. **Figure 5** shows the geographic mapping of Nevada providers per 1,000 Nevada Medicaid FFS recipients. All Nevada Medicaid providers must enroll as FFS providers, even if they only serve MCO recipients. MCOs operate in Washoe and Clark Counties. **Table 8** shows the number of providers enrolled for; primary care, specialist, dental, pre-and post-natal, behavioral health, and home health, and the Medicaid population by service delivery for each county in CY 2023.

**Figure 5. Nevada Map of Enrolled Medicaid Providers and FFS Recipients**

**Table 8. Provider enrollment within each county**

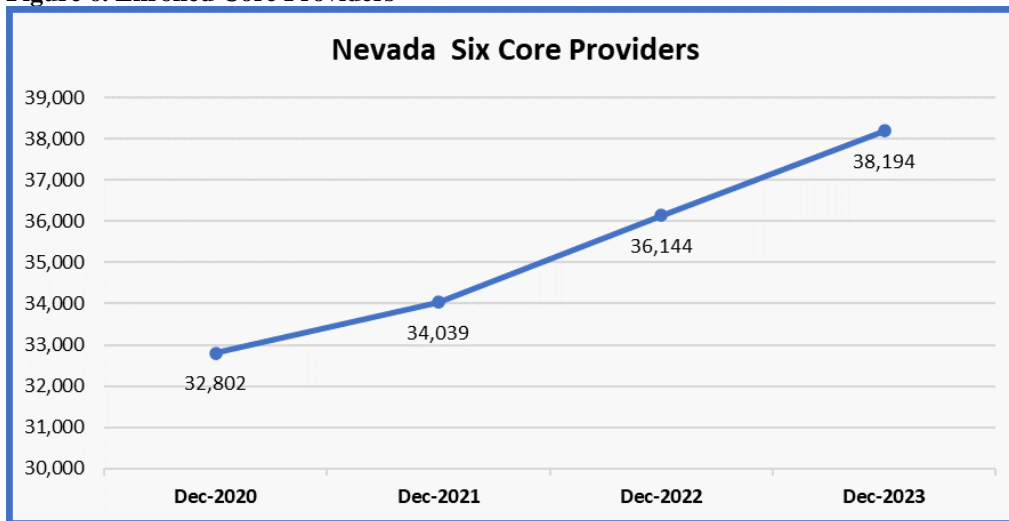

County	Primary Care	Specialist	Dental	Pre- & Post-Natal	Behavioral Health	Home Health	FFS Medicaid Population*	MCO Medicaid Population*	Total Medicaid Population*	Nevada Population**
Carson City	338	239	20	15	119	0	16,231	756	16,466	58,923

## VII. Review Analysis of Services

The DHCFP will put the monitoring procedures in place for primary care services, physician specialists, behavioral health services, pre- and post-natal obstetric services, home health services, and dental services outlined in **Table 9** below. The plan will evaluate access to care issues and implement process improvement to continue or improve current processes, to identify the extent to which provider payment rates are consistent with efficiency, economy, and quality of care. Nevada's aim is to enlist enough providers so that the care and services available to the general population in the geographic area are also available to Nevada Medicaid recipients. The DHCFP will also evaluate network composition and availability to address recipient concerns.

**Figure 6** reflects the number of core providers that were enrolled in at the end of December for each CY from 2020 to 2023. Enrollment in core providers has increased from 32,802 providers in CY 2020 to 38,194 providers in CY 2023 resulting in an increase of enrolled core providers of just over 16 percent.

**Figure 6. Enrolled Core Providers**

In addition to the above discussed processes, the DHCFP's monitoring activities will consist of gathering and analyzing information from public workshops and hearings, stakeholder meetings, and through the legislative process. **Table 9** outlines the six core providers, provider types and specialty codes that will be monitored throughout the year to identify early indications of changes in health care access.

**Table 9: Nevada Six Core Provider Focus Areas**

Identifiers	Provider Type	Provider Specialty
1. Primary Care Services	17-Special Clinics	180 - Rural Health Clinic
		181 - Federally Qualified Health Center
	20-Physician, M.D., Osteopath, D.O.	053 - Family Practice
		056 - General Practice
		060 - Internal Medicine
		139 - Pediatrics
	148 - Public Health	
24 - Advanced Practice Registered Nurse	All Specialties	
77 - Physician Assistant	All Specialties	
89 - Community Health Workers	All Specialties	
2. Physician Specialist Services	20 - Physician, M.D., Osteopath, D.O.	All remaining specialties not listed elsewhere
	25 - Optometrist	All Specialties
	34 - Therapy	027 - Physical Therapy
		028 - Occupational Therapy
		029 - Speech Pathologist
		219 - Speech Pathologist (Language)
	41 - Optician, Optical Business	All Specialties
76 - Audiologist	All Specialties	
3. Behavioral Health Services	13 - Psychiatric Hospital, Inpatient	All Specialties
	14 - Behavioral Health Outpatient Treatment	All Specialties
	17 - Special Clinics	215 - Substance Abuse Agency Model (SAAM)
	20 - Physician, M.D., Osteopath, D.O.	113 - Forensic Psychiatry
		146 - Psychiatry
		147 - Psychiatry-Child
	26 - Psychologist	All Specialties
	63 - Residential Treatment Center (RTC)	All Specialties
82 - Behavioral Health Rehabilitative Treatment	All Specialties	
86 - Specialized Foster Care	All Specialties	
4. Pre- and Post- Natal Obstetric Services	20 - Physician, M.D., Osteopath, D.O.	062 - Obstetrics/Gynecology
		067 - Neonatology
		117 - Gynecology
		124 - Maternal Fetal Medicine
		129 - Obstetrics
	145 - Prenatal Medicine	
	74 - Nurse Midwife	All Specialties
90 - Doula	All Specialties	
5. Home Health	29 - Home Health Agency	All Specialties
6. Dental	22 - Dentist	All Specialties

**a. Primary Care Services**

For the ACMRP, primary care services were defined by Nevada Medicaid to include Physicians, Physician Assistants, Advance Practice Registered Nurse, Pediatricians, and those with a focus in family health. Primary care services also include special clinics consisting of Federally Qualified Health Centers (FQHCs) and Rural Health Clinics (RHCs). **Table 10** is a snapshot of the number of FQHCs/RHCs as of December of each year from 2020 to 2023. Trended over time, Nevada's FQHCs/RHCs increased from 63 clinics in 2020 to 68 in 2023 resulting in an eight percent increase in the number of FQHCs/RHCs. **Figure 7** below shows a snapshot of the number of enrolled providers for primary care services with Nevada Medicaid in CY 2020 to CY 2023. In CY 2020, Nevada had a total of 10,250 primary care providers which increased to 13,270 in CY 2023 resulting in a 29 percent increase. This information will continue to be used as the benchmark in Nevada's review of access to care for primary care services.

**Table 10. FQHC/RHC**

Provider Type/Specialty	Dec-2020	Dec-2021	Dec-2022	Dec-2023
180 Rural Health Clinic	18	19	18	20
181 Federally Qualified Health Center	45	48	49	48
<b>Total</b>	<b>63</b>	<b>67</b>	<b>67</b>	<b>68</b>

**b. Physician Specialist Services**

For the ACMRP, physician specialist services were defined by Nevada Medicaid to include specialists such as, but not limited to, Optometrist, Optician, Urologist, Cardiologist, Endocrinologist and Neurologist. **Figure 7** below shows a snapshot of the number of enrolled physician specialists with Nevada Medicaid in CY 2020 to CY 2023. In CY 2020, Nevada had a total of 14,308 specialists which increased to 16,865 in CY 2023 resulting in an 18 percent increase. This information will continue to be used as the benchmark in Nevada's review of access to care for physician specialist services.

**c. Behavioral Health Services**

For the ACMRP, behavioral health services were defined by Nevada Medicaid to include Inpatient Psychiatric Hospitals, Behavioral Health Outpatient Treatment Providers, Psychiatrists, Psychologists, Psychiatric Residential Treatment Facilities (PRTF), and Behavioral Health Rehabilitative Treatment Providers. **Figure 7** below shows a snapshot of the number of enrolled behavioral health service providers with Nevada Medicaid in CY 2020 to CY 2023. In CY 2020, Nevada had a total of 6,214 behavioral health service providers which decreased to 5,847 in CY 2023 resulting in a 6 percent decrease. This information will continue to be used as the benchmark in Nevada's review of access to care for behavioral health services.

**d. Pre- and Post-Natal Obstetric Services including Labor and Delivery**

For the ACMRP, pre-and post-natal obstetric services including labor and delivery were defined by Nevada Medicaid to include Obstetricians (OB), Gynecologists (GYN), and Certified Nurse Midwives. **Figure 7** below shows a snapshot of the number of enrolled OB/GYN providers with Nevada Medicaid in CY 2020 to CY 2023. In CY 2020, Nevada had a total of 842 OB/GYN providers which increased to 886 in CY 2023 resulting in a 5 percent increase. This information will continue to be used as the benchmark in Nevada's review of access to care for pre- and post-natal obstetric services including labor and delivery.

**e. Home Health Services**

For the ACMRP, home health services were defined by Nevada Medicaid to include services provided by home health agencies. **Figure 7** below shows a snapshot of the number of enrolled home health providers with Nevada Medicaid in CY 2020 to CY 2023. In CY 2020, Nevada had a total of 60 home health agencies which increased to 64 in CY 2023 resulting in a 6 percent increase. This information will continue to be used as the benchmark in Nevada's review of access to care for home health services.

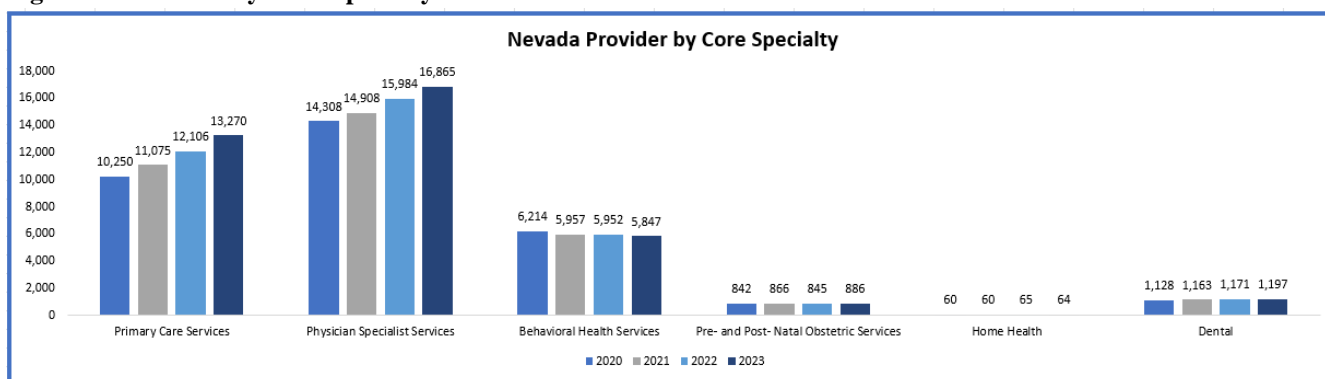

## f. Dental Services

For the ACMRP, dental services were defined by Nevada Medicaid to include General Dentist, Oral Surgery, Pediatric Dentist, and Dental Hygienist. **Figure 7** below shows a snapshot of the number of enrolled dental providers with Nevada Medicaid in CY 2020 to CY 2023. In CY 2020, Nevada had a total of 1,128 dental service providers which increased to 1,197 in CY 2023 resulting in a 6 percent increase. This information will continue to be used as the benchmark in Nevada’s review of access to care for dental services.

**Figure 7** reflects Nevada’s six core providers increased from 32,802 in CY 2020 to 38,129 in CY 2023 resulting in a 16 percent increase.

## VIII. Remediation Action Plan

Nevada Medicaid will use the Plan Do Study Act (PDSA) model in quality improvement initiatives. The model incorporates the idea of continuous quality improvement through a process and problem-solving approach. The process will monitor access to care, timeliness of care, recipient satisfaction with their access to care, and a rate analysis. This process will help identify opportunities for improvement that exist throughout the Nevada Medicaid program. Once opportunities have been identified, the DHCFP will implement intervention strategies to improve outcomes and performance, evaluate the interventions, and reassess performance through re-measurement to identify new opportunities for improvement.

As needed, the DHCFP will develop a remediation action plan to address identified access to healthcare issues in the core service areas. Once Nevada becomes aware of the need to correct any access to care issues, an in-depth analysis will be conducted. This analysis includes policy research, public input including recipients, and collaboration with the MCAC. Remedial actions may include policy revision, process simplifications, rate adjustment, and/or enhanced provider outreach.

Nevada Medicaid’s ongoing plan will include the review and analysis of associated claims data, the DO customer service call center data, and the rates review. An analysis will be completed when a SPA that reduces or restructures provider payment is submitted to the CMS. Information gained from these analyses, as well as stakeholder processes and any remediation activities, will be utilized to update Nevada’s ACMRP.

## a. Dental Revisions

During the 2017 Legislative Session, an Assembly Bill was passed (AB108) mandating Nevada Medicaid to review all rates including dental on a rotating four-year cycle. The DHCFP held the Quadrennial Rate Review in 2020 with recommendations of rate increase for Dentist/Oral and Maxillofacial Surgery. The DHCFP submitted a SPA to increase dental rates in 2023 which was approved by CMS. There are no Medicare dental rates to compare to as dental is not a Medicare covered benefit. Also in 2017, dental services were carved out of the MCO health plans. The DHCFP submitted to the CMS the 1915i(b)(4) Waiver requesting approval to implement a DBA plan. This waiver allows Nevada Medicaid to direct recipients that are enrolled in a mandatory MCO health plan to obtain dental services from a single DBA. A public workshop was held to discuss available options and to allow stakeholder input. Access to care for dental benefits will be monitored by the DHCFP's contracted EQRO vendor, as part of the network adequacy review for MCO recipients. Recipients that receive dental care from Nevada's FFS delivery model will be reviewed and analyzed as outlined in this ACMRP. Changes in utilization may not be directly related to rate reimbursement changes, however, if the DHCFP notices a significant change in utilization patterns it will be reviewed by the DHCFP's QIT.

91	991: Pharmacist 400: Ordering, Prescribing, Referring (OPR)
94	Medicare Cost Sharing 401: Medicare Cost Sharing

*\*Provider Types and Specialties in gray boxes are providers that have not been assigned to a Core Service in the ACMRP.*

*\*\*Provider Types and Specialties in a blue box should have been included in the Behavioral Health Core Service Provider Area in the ACMRP.*

## A.2. Access to Care Data

### Data Clarifications

The initial ACMRP report provided data as of July of each year from 2010-2017. The next ACMRP report provided data noted as state fiscal year (SFY) 2016-2020. This ACMRP report utilized a calendar year (CY) and was using December of each year from 2020-2023 for most information, including claims data which may have not been all inclusive due to Medicaid's allowance of 90 days for providers to submit claims. Moving forward the DHCFP will pull this level of detail on a regular basis to trend and monitor enrollment data.

### A.2.i. Measure 1

1: Active Providers: Compare the number of providers enrolled to the number of providers billing for services.												
Calendar Year	Clark County			Washoe County			All Other Nevada Counties			Total		
	Enrolled Providers	Billing Providers	Rate	Enrolled Providers	Billing Providers	Rate	Enrolled Providers	Billing Providers	Rate	Enrolled Providers	Billing Providers	Rate
CY 2020	18,946	3,452	18.2%	5,183	844	16.3%	2,356	693	29.4%	26,484	4,988	18.8%
CY 2021	19,594	3,517	17.9%	5,184	865	16.7%	2,369	679	28.7%	27,147	5,060	18.6%
CY 2022	20,285	3,457	17.0%	5,259	819	15.6%	2,426	627	25.8%	27,970	4,903	17.5%
CY 2023	21,554	3,611	16.8%	5,370	833	15.5%	2,583	633	24.5%	29,506	5,076	17.2%

### A.2.ii. Measure 1.1

1.1: Compare the number of providers enrolled to the number of providers billing for services by code.										
FY2023		Providers Enrolled			Providers Billing			Ratio		
PT Code	PT Description	Clark County	Washoe County	All Other Nevada Counties	Clark County	Washoe County	All Other Nevada Counties	Clark County	Washoe County	All Other Nevada Counties
10-910	Outpatient Surgery Hospital Based - Outpatient Surgery Hospital Based	17	5	7	13	5	6	76.5%	100%	85.7%
11-100	Hospital Inpatient - Mammography	0	0	1	0	0	1	N/A	N/A	100%
11-911	Hospital Inpatient - Hospital Inpatient	26	6	1	18	5	1	69.2%	83.3%	100%
12-912	Hospital Outpatient - Hospital Outpatient	32	8	15	30	8	15	93.8%	100%	100%
13-913	Psychiatric Hospital Inpatient - Psychiatric Hospital Inpatient	9	2	0	9	1	0	100%	50%	N/A
14-300	Behavioral Health Outpatient Treatment - Qualified Mental Health Professional (QMHP)	986	224	60	166	32	23	16.8%	14.3%	38.3%
14-301	Behavioral Health Outpatient Treatment - Qualified Mental Health Associate (QMHA)	702	265	60	61	13	14	8.7%	4.9%	23.3%
14-302	Behavioral Health Outpatient Treatment - Qualified Behavioral Aide (QBA)	730	69	16	26	2	1	3.6%	2.9%	6.3%
14-305	Behavioral Health Outpatient Treatment - Licensed Clinical Social Worker	515	122	83	194	38	42	37.7%	31.1%	50.6%
14-306	Behavioral Health Outpatient Treatment - Licensed Marriage and Family Therapist	266	123	40	108	39	30	40.6%	31.7%	75.0%
14-307	Behavioral Health Outpatient Treatment - Clinical Professional Counselor	209	44	32	97	17	23	46.4%	38.6%	71.9%

1.1: Compare the number of providers enrolled to the number of providers billing for services by code.

\*Numerator is equal to the total population for each geographical are. Denominator is the number of billing providers by PT/Spec in each SPA area.

### \*\*Provider to Recipient Ratios

Nevada's Medicaid Management Information System (MMIS) does not have the capacity to distinguish Nevada Medicaid providers based on who they elect to provide services to. Meaning, once enrolled, the DHCFP cannot distinguish between the number of providers who intend to provide services to the FFS population, the managed care population, or both. For this reason, all provider numbers reported in this appendix are inclusive of FFS and MCO providers.
