

Pharmacists Can Now Bill Medicaid & Provide New Services

State of Nevada Medicaid

Prescriptions Made Easy!

Seeing a doctor to get contraception and HIV preventative medications can be a burden for Medicaid members. Now, they no longer have to. They can come directly to you for some services without a prescription.

During the 81st Nevada Legislative Session (2021), Senate Bill (SB) 190 and SB325 passed allowing pharmacist to provide and be reimbursed for services related to self-administered hormonal contraceptives and the prevention acquisition of Human Immunodeficiency Virus (HIV).

On July 7, 2022, the Centers for Medicare and Medicaid Services (CMS) approved Nevada Medicaid's State Plan Amendment to include pharmacist as a new provider type. Since then, Nevada Medicaid has implemented a new provider type (PT) 91 – Pharmacist and established Medicaid policy surrounding pharmacist-provided services.

COVERED SERVICES:

Nevada Medicaid now reimburses pharmacists for more than 40 codes including the following services without a prescription:

- Ordering certain HIV laboratory testing.
- The dispensing of self-administered hormonal contraceptives.
- The prescribing, dispensing and administration of drugs to prevent the acquisition of HIV.

For the complete list of codes and reimbursement rates, visit the [Fee Schedule website](#) and navigate to PT-91.

PHARMACIST ENROLLMENT:

Licensed pharmacist in Nevada can enroll as a [PT 91 – Pharmacist](#).

HOW TO ENROLL:

1. Visit PT 91 – Pharmacist Provider [Enrollment Checklist](#) to see complete list of necessary documents for enrollment.
2. Apply as a Nevada Medicaid PT 91 – Pharmacist at the [Provider Enrollment Portal](#).
