

Date: November 17, 2020

Attention: Nevada P&T Committee,

I am writing to encourage Nevada P&T Committee to add Nurtec ODT (Rimegepant) to the preferred drug formulary list. I am the Pharmacist Manager at 986 Specialty Pharmacy in Las Vegas, NV.

As one of the primary pharmacies for Dr. Mehdi Ansarinia, and many other physicians, we have filled numerous scripts and refills since the drugs approval. Nurtec ODT (*Rimegepant*) is the most prescribed *gepant* in my pharmacy. Patients have responded well with minimal side effects and are able to get back to normal function. The ease of one dose in 24 hours, due to Rimegepant's 11-hour half live gives patients lasting results from their pain and most bothersome symptoms. The blister pack which contains 8 tablets allows us to stock this product easily and dispense it to patients.

Please consider my recommendation; Medicaid patients deserve an option that is not only fast but lasts with minimal side effects, without being habit forming.

Sincerely,

Danny Thai
