To whom it may concern,

My name is Dr. Steve Holroyd and I am the co-medical director at Carson Tahoe Hospital's Behavioral Health Services in Carson City, NV. I am writing to ask that you continue to support the open access of all oral and long acting injectable antipsychotic medications. The lack of patient access to these medications would greatly effect their care and quality of life. Most of these patients have been on multiple medications prior to finding the one that works for them. Keeping access to all these medication options will help them stay out of the hospital and allow them the best opportunity for a meaningful and fulfilling life.

Thank You for your consideration,

Steve Holroyd, MD
