Subject: Antipsychotic meds

WARNING - This email originated from outside the State of Nevada. Exercise caution when opening attachments or clicking links, especially from unknown senders.

9-21-22

Dear Sir:

I am in favor of open access to all antipsychotic meds, particularly long acting injectable antipsychotic meds, for Nevada residents. The cost of the meds is less than the costs of hospitalization, jail, and social services for schizophrenic patients. The benefit of the meds is reducing symptomology and increased level of functioning for our Nevada residents who have schizophrenia.

I am a Nevada psychiatrist who treats Nevada residents at NNAMHS, Lakes Crossing Center, Wellcare, and the Nevada Southern Detention Center Prison.

Respectfully submitted,

Steven H. Berger, M.D.
Clinical Professor of Psychiatry, UNR School of Medicine
