Foreword

Personal Health Choices is a joint publication of the Center for Health Information Analysis (CHIA) and the Nevada Department of Health and Human Services, Division of Health Care Financing and Policy. This report presents general acute care hospital outpatient discharge billing records data for 19 common Enhanced Ambulatory Patient Groupings (EAPG) per outpatient type as reported by Nevada’s acute care hospitals that discharged patients within the period.

The data are available through the standard Uniform Billing form, which is utilized by hospitals to bill for their hospital charges. The data include patients who were admitted to a hospital as an outpatient. The reports are categorized into 3 outpatient types: 1 - Outpatient Emergency Department (ED), 2 - Outpatient Surgery (OS), 3 - Other Outpatient (TH). It includes information about patients discharged from non-federal hospitals in Nevada. The data identify billed charges, not the actual payments received by the hospital. The data were compiled by CHIA using information from inpatient hospital billing records. This information was gathered and analyzed as part of a contractual agreement between the Department of Health and Human Services and the University under the authority granted in Section 439B of the Nevada Revised Statutes. CHIA reviews the data and requests corrections when errors are found. It is not possible to detect all errors. CHIA is not responsible for errors that cannot be found by a review.

Introduction

This thirty-third edition, book 3 of Personal Health Choices compares 38 of Nevada's general acute care hospitals with respect to 15 common medical diagnoses and surgical procedures per outpatient type, defined by 3M's Enhanced Ambulatory Patient Groups (EAPGs: see below). The definitions to all EAPGs can be found on the narrative page for each EAPG. Each diagnosis and procedure in this publication is based on an individual EAPG.

Credit Due: Google (www.google.com) and Medical Dictionary (<http://medical-dictionary.thefreedictionary.com>) were used to obtain definitions for medical terms.

The 3M™ Enhanced Ambulatory Patient Grouping System

Enhanced Ambulatory Patient Group (EAPG) is a classification system that is developed specifically for use in today's complex ambulatory environment to develop an effective and comprehensive outpatient prospective payment system (OPPS) that includes hospitals, freestanding ambulatory surgery centers (ASCs), renal dialysis centers, and other diverse care settings.

By reflecting the care that today's facilities provide to non-Medicare beneficiaries, the 3M EAPG System captures the current changes in clinical Practice and resource use. It can provide a broader, more inclusive classification of outpatient care than the Centers for Medicare & Medicaid (CMS) Ambulatory Payment Classifications (APCs).

[The 3M™ Enhanced Ambulatory Patient Grouping System fact sheet can be found here \(http://multimedia.3m.com/mws/media/4729970/3m-enhanced-apgs-fact-sheet.pdf\).](http://multimedia.3m.com/mws/media/4729970/3m-enhanced-apgs-fact-sheet.pdf)

Information Level

Personal Health Choices is intended as a source of information regarding the billed charges of hospitals in Nevada and should not be construed as a definitive guide for selecting a hospital in order to receive outpatient medical care. The financial information in this report is based on billed charges rather than the amount collected on discharged patients per EAPG. Billed charges and collected charges can differ significantly. This report provides the reader information about one component of healthcare pricing – hospital outpatient services. Inpatient hospitalization as well as professional physician and other non-hospital ancillary healthcare services are not covered in this report.

Factors

The information provided in this report is formatted to present narrative and tabular data on the first page and detailed tabular data on the second. This report covers a five-year trend line for EAPG-related data. Selected EAPGs are presented in ascending order of code.

The first page of each selected EAPG presents gender and age breakdowns of the overall hospital outpatient population, factored by the total number of visits and average billed charges. The age categories consist of 0-17, 18-35, 36-49, 50-64, and 65+. The narrative information on the first page for each EAPG is based on the available data and may contain information on specific diagnoses and surgical procedures involved in the treatment of the patient. These diagnoses and procedures may not always be directly related to the primary ailment. The second page examines specific hospitals in Clark, Washoe and the Rural counties regarding total discharges, average length of stays, and average billed charges.

It should be noted that, when comparing hospitals to average billed charges, information based on small numbers of cases cannot provide a reliable statistical base upon which information can reflect a given hospital's experience. Further, physician charges (including those of surgeons) are normally separate from hospital charges, except in rural areas where some physician services -- such as radiology, anesthesia, and laboratory tests -- may be included in the hospital charges.

The Center for Health Information Analysis (CHIA) receives patient bill records directly from all the hospitals. These data are reviewed, and if errors are found, a resend is requested. Missing or out of range fields as well as statistical mixes of fields such as payer, gender, and race are looked at in the review.

General Acute Care Hospitals

Hospital Name	Address	Phone	County
Battle Mountain General Hospital	535 Humboldt St., Battle Mountain, NV 89820	(775) 635-2550	Lander

1. Respiratory Therapy (00065)

EAPG: 00065 - Respiratory Therapy;

Definitions: **Asthma:** Chronic inflammatory disease of the airways. **Bronchitis:** An inflammation of the air passages between the nose and the lungs, including the windpipe or trachea and the larger air tubes of the lung that bring air in from the trachea (bronchi). **Bronchial tubes:** The major airways to the lungs and their main branches. **Croup:** An infection of the upper airway, generally in children, which obstructs breathing and causes a characteristic barking cough. **Larynx:** The structure between the pharynx and the trachea that contains the vocal cords. **Pharynx:** The upper expanded portion of the digestive tube, between the esophagus below and the mouth and nasal cavities above and in front. **Trachea:** A tube-like portion of the respiratory tract that connects the larynx with the bronchial parts of the lungs. Also known as windpipe. **Bronchiolitis:** An acute viral infection of the small air passages of the lungs called the bronchioles. **Bronchioles:** Small airways extending from the bronchi into the lobes of the lungs. **Pneumonia:** Inflammation of the lungs, usually due to infection with bacteria, viruses, or other pathogenic organisms.

3. Infections Of Upper Respiratory Tract (00562)

EAPG: 00562 - Infections Of Upper Respiratory Tract;

Definitions: **Otitis media:** An inflammation or infection of the middle ear, common in early childhood. **Pharyngitis:** Inflammation of the pharynx, causing a sore throat. **Bronchitis:** An inflammation of the air passages between the nose and the lungs, including the windpipe or trachea and the larger air tubes of the lung that bring air in from the trachea (bronchi). **Tonsillitis:** Inflammation of the tonsils. **Croup:** An infection of the upper airway, generally in children, which obstructs breathing and causes a characteristic barking cough. **Sinusitis:** Inflammation of a nasal sinus. **Streptococcus:** A genus of nonmotile, non-spore-forming, aerobic to facultatively anaerobic bacteria containing gram-positive, spherical, or ovoid cells that occur in pairs or short or long chains. These organisms occur regularly in the mouth and intestines of humans and other animals, in dairy products and other foods, and in fermenting plant juices. Some species are pathogenic. **Suppurative otitis media:** Otitis media with the presence of purulent fluid in the middle ear. **Purulent:** Containing, discharging, or causing the production of pus.

6. Chest Pain (00604)

EAPG: 00604 - Chest Pain;

Definitions: Tietze's disease: A rare, inflammatory disorder characterized by chest pain and swelling of the cartilage of one or more of the upper ribs (costochondral junction).
Costal cartilages: The cartilages that connect the sternum and the ends of the ribs; its elasticity allows the chest to move in respiration. **Esophageal reflux:** Regurgitation of the contents of the stomach into the esophagus. **Hyperlipidemia:** An abnormally high concentration of fats or lipids in the blood. **Precordial pain:** Pain in the chest wall over the heart.

8. Fractures & Dislocations Except Femur, Pelvis & Back (00652)

EAPG: 00652 - Fractures & Dislocations Except Femur, Pelvis & Back;

Definitions: **Phalanges:** The bones of the fingers and of the toes. **Metatarsal:** Any of the five long cylindrical bones extending from the heel to the toes. **Acromioclavicular:** Relating to the acromion and clavicle; denoting the articulation between the clavicle and the acromion of the scapula. **Acromion:** The outer end of the scapula, extending over the shoulder joint and forming the highest point of the shoulder, to which the collarbone is attached. **Meniscus:** A disk of cartilage that acts as a cushion between the ends of bones in a joint. **Supracondylar:** Above a condyle. **Condyle:** A rounded projection on a bone, usually for articulation with another bone.

9. Back & Neck Disorders Except Lumbar Disc Disease (00656)

EAPG: 00656 - Back & Neck Disorders Except Lumbar Disc Disease;

Definitions: **Cervicalgia:** Neck pain. **Thoracic:** Pertaining to the thorax (chest). **Lumbosacral:** Of or relating to or near the small of the back and the back part of the pelvis between the hips. **Lumbago:** An older, non-medical term used to describe lower back pain or back pain in general. **Torticollis:** A contraction, often spasmodic, of the muscles of the neck, chiefly those supplied by the spinal accessory nerve; the head is drawn to one side and usually rotated so that the chin points to the other side.

12. Other Skin, Subcutaneous Tissue & Breast Disorders (00675)

EAPG: 00675 - Other Skin, Subcutaneous Tissue & Breast Disorders;

Definitions: **Urticaria:** An eruption of itching wheals, colloquially called hives, usually of systemic origin; it may be due to a state of hypersensitivity to foods or drugs, foci of infection, physical agents (heat, cold, light, friction), or psychic stimuli. **Scabies:** A contagious disease caused by *Sarcoptes scabiei*, the human itch mite, characterized by intense itching of the skin and excoriation from scratching. **Dermatitis:** A general term used to describe inflammation of the skin. **Dermatophytosis:** An infection of the hair, skin, or nails caused by any one of the dermatophytes (fungus parasitic upon the skin). **Candidiasis:** An infection caused by a species of the yeast *Candida*, usually *Candida albicans*.

Sebaceous cyst: A rounded swollen area of the skin formed by an abnormal sac of retained excretion (sebum) from the sebaceous follicles. **Mastodynia:** Pain in the breast.

13. Viral Illness (00808)

EAPG: 00808 - Viral Illness;

Definitions: **Exanthem:** A skin eruption or rash. **Pharyngitis:** Inflammation of the pharynx, causing a sore throat. **Varicella:** (AKA chickenpox) An acute contagious disease, usually occurring in children, caused by the varicella-zoster virus and marked by a sparse eruption of papules, which become vesicles and then pustules, usually with mild constitutional symptoms; incubation period is about 14-17 days. **Coxsackie virus:** Any of a group of enteroviruses that cause various respiratory, neurological, and muscular diseases in humans. **Enterovirus:** A genus of picornaviruses, including polioviruses, coxsackieviruses, and echoviruses, that infect the gastrointestinal tract and often spread to other areas of the body, especially the nervous system.

15. Allergic Reactions (00850)

EAPG: 00850 - Allergic Reactions;

Definitions: angioedema: The rapid swelling of the dermis, subcutaneous tissue, mucosa and submucosal tissues. **Urticaria:** An eruption of itching wheals, colloquially called hives, usually of systemic origin; it may be due to a state of hypersensitivity to foods or drugs, foci of infection, physical agents (heat, cold, light, friction), or psychic stimuli.

Pruritic disorder: A sensation that causes the desire or reflex to scratch. **Anaphylactic shock:** A serious and profound state of shock brought about by hypersensitivity (anaphylaxis) to an allergen such as a drug, foreign protein, or toxin. **Hypothyroidism:** Diminished production of thyroid hormone, leading to clinical manifestations of thyroid insufficiency, including low metabolic rate, tendency to gain weight, somnolence, and sometimes myxedema. **Hypercholesterolemia:** An abnormally high concentration of cholesterol in the blood.

Discussion and Graphics: 15 Outpatient Surgery (OS) Enhanced Ambulatory Patient Groups

1. Level II Breast Procedures (00021)

EAPG: 00021 - Level II Breast Procedures;

Definitions: LEVEL: Type of evidence used in the selection of certain courses of treatment. I - Randomized controlled trials, II - case-control studies, III - opinions of expert panels.

Neoplasm: An abnormal tissue that grows by cellular proliferation more rapidly than normal and continues to grow after the stimuli that initiated the new growth cease.

Neoplasms show partial or complete lack of structural organization and functional coordination with the normal tissue, and usually form a distinct mass of tissue that may be either benign (benign tumor) or malignant (cancer). **Malignant:** Tending to become worse and end in death. **Cystic mastopathy:** Benign breast changes, manifested by swelling, indurated nodules or cysts. **Ptosis of breast:** Drooping or sagging female breasts. **Fibroadenosis:** Lumps composed of fibrous and glandular tissue. **Fibrosclerosis of breast:**

Sclerosing lobular adenosis of the breast. **Sclerosing lobular adenosis:** A benign (non-cancerous) condition of the breast in which extra tissue develops within the breast lobules.

2. Level I Arthroscopy (00037)

EAPG: 00037 - Level I Arthroscopy;

Definitions: Arthroscopy: A surgical technique in which a tube-like instrument is inserted into a joint to inspect, diagnose, and repair tissues. **Synovitis:** Inflammation of a synovial membrane, especially that of a joint; in general, when unqualified, the same as arthritis. **Tenosynovitis:** Inflammation of a tendon and its enveloping sheath.

Chondromalacia: Abnormal softening or degeneration of cartilage of the joints, especially of the knee. **Patella:** A flat triangular bone located in the combined tendon of the extensors of the leg and covering the front surface of the knee joint. Also called kneecap. **Meniscus:** A disk of cartilage that acts as a cushion between the ends of bones in a joint. **Osteoarthritis:** A condition of chronic arthritis, usually mechanical, without inflammation.

3. Level II Arthroscopy (00038)

EAPG: 00038 - Level II Arthroscopy;

Definitions: Arthroscopy: A surgical technique in which a tube-like instrument is inserted into a joint to inspect, diagnose, and repair tissues. **Bursae:** A small fluid-filled sac or saclike cavity situated in places in tissues where friction would otherwise occur. **Glenoid labrum:** A ring of fibrocartilage that runs around the cavity of the scapula (wingbone) in which the head of the humerus (the bone in the upper arm) fits. **Synovitis:** Inflammation of a synovial membrane, especially that of a joint; in general, when unqualified, the same as arthritis. **Tenosynovitis:** Inflammation of a tendon and its enveloping sheath. **Chondromalacia:** Abnormal softening or degeneration of cartilage of the joints, especially of the knee.

4. Needle And Catheter Biopsy, Aspiration, Lavage And Intubation (00061)

EAPG: 00061 - Needle And Catheter Biopsy, Aspiration, Lavage And Intubation;

Definitions: Biopsy: An examination of tissue removed from a living body to discover the presence, cause, or extent of a disease. **Aspiration:** Removal by suction, as the removal of fluid or gas from a body cavity or the procurement of biopsy specimens. **Ascites:** The accumulation of fluid in the peritoneal cavity, causing abdominal swelling. **Cirrhosis:** A chronic degenerative disease in which normal liver cells are damaged and are then replaced by scar tissue. **Neoplasm:** An abnormal tissue that grows by cellular proliferation more rapidly than normal and continues to grow after the stimuli that initiated the new growth cease. Neoplasms show partial or complete lack of structural organization and functional coordination with the normal tissue, and usually form a distinct mass of tissue that may be either benign (benign tumor) or malignant (cancer). **Iatrogenic pneumothorax:** Pneumothorax caused by a medical procedure, most often central venous catheter insertion, thoracentesis, or transbronchial and transthoracic lung biopsy. **Pneumothorax:** The presence of air or gas in the cavity between the lungs and the chest wall, causing collapse of the lung.

7. Therapeutic Colonoscopy (00137)

EAPG: 00137 - Therapeutic Colonoscopy;

Definitions: Colonoscopy: A medical procedure where a long, flexible, tubular instrument called the colonoscope is used to view the entire inner lining of the colon (large intestine) and the rectum. **Neoplasm:** An abnormal tissue that grows by cellular proliferation more rapidly than normal and continues to grow after the stimuli that initiated the new growth cease. Neoplasms show partial or complete lack of structural organization and functional coordination with the normal tissue, and usually form a distinct mass of tissue that may be either benign (benign tumor) or malignant (cancer). **Diverticulosis:** The presence of diverticula in the absence of inflammation. **Polyps:** A small growth, typically benign and with a stalk, protruding from a mucous membrane. **Hemorrhage:** An escape of blood from the blood vessels, especially when excessive.

8. Level I Hernia Repair (00139)

EAPG: 00139 - Level I Hernia Repair;

Definitions: LEVEL: Type of evidence used in the selection of certain courses of treatment. I - Randomized controlled trials, II - case-control studies, III - opinions of expert panels.

Inguinal hernia: Hernia in which a loop of intestine enters the inguinal canal; the most common type of hernia in males. **Inguinal canal:** In males it is the passage through which the testes descend into the scrotum and it contains the spermatic cord; in females it transmits the round ligament of the uterus. **Hydrocele:** Accumulation of serous fluid in a body sac. **Serous fluid:** Bodily fluids that are typically pale yellow and transparent, and of a benign nature, that fill the inside of body cavities.

9. Level II Laparoscopy (00146)

EAPG: 00146 - Level II Laparoscopy;

Definitions: LEVEL: Type of evidence used in the selection of certain courses of treatment. I - Randomized controlled trials, II - case-control studies, III - opinions of expert panels.

Cholecystitis: Inflammation of the gallbladder. **Peritoneal adhesions:** Bands of fibrous tissue that join abdominal organs to each other or the abdominal wall. Adhesions develop rapidly after damage to the peritoneum during surgery, infection, trauma, or irradiation. **Gangrene:** Localized death and decomposition of body tissue, resulting from either obstructed circulation or bacterial infection.

10. Level III Laparoscopy (00147)

EAPG: 00147 - Level III Laparoscopy;

Definitions: Endometriosis: A condition in which bits of the tissue similar to the lining of the uterus (endometrium) grow in other parts of the body. Like the uterine lining, this tissue builds up and sheds in response to monthly hormonal cycles. However, there is no natural outlet for the blood discarded from these implants. Instead, it falls onto surrounding organs, causing swelling and inflammation. **Leiomyoma:** A benign smooth-muscle tumor occurring most commonly in the uterus, stomach, esophagus, or small intestine. **Cervicitis:** Inflammation of the cervix. **Endocervicitis:** Inflammation of the mucous lining of the uterine cervix. **Dysmenorrhea:** Painful menstruation, typically involving abdominal cramps. **Dyspareunia:** Persistent or recurrent genital pain that occurs just before, during or after intercourse.

11. Level I Bladder And Kidney Procedures (00163)

EAPG: 00163 - Level I Bladder And Kidney Procedures;

Definitions: LEVEL: Type of evidence used in the selection of certain courses of treatment. I - Randomized controlled trials, II - case-control studies, III - opinions of expert panels.

Hydronephrosis: The swelling of the kidneys when urine flow is obstructed in any of part of the urinary tract. **Neoplasm:** An abnormal tissue that grows by cellular proliferation more rapidly than normal and continues to grow after the stimuli that initiated the new growth cease. Neoplasms show partial or complete lack of structural organization and functional coordination with the normal tissue, and usually form a distinct mass of tissue that may be either benign (benign tumor) or malignant (cancer). **Hematuria:** The presence of blood in urine. **Calculus of kidney:** (AKA kidney stones) Small, hard mineral deposits that form inside your kidneys. The stones are made of mineral and acid salts.

Discussion and Graphics: 15 Other Outpatient (TH) Enhanced Ambulatory Patient Groups

1. Echocardiography (00081)

EAPG: 00081 - Echocardiography;

Definitions: **Hypertension:** High blood pressure. **Mitral valve:** A valve of the heart, composed of two triangular flaps, that is located between the left atrium and left ventricle and regulates blood flow between these chambers. **Cardiomegaly:** Abnormal enlargement of the heart from either hypertrophy or dilatation. **Tricuspid valve:** The three-segmented valve of the heart that keeps blood in the right ventricle from flowing back into the right atrium. **Aortic valve:** The semilunar valve separating the aorta from the left ventricle that prevents blood from flowing back into the left ventricle. **Palpitations:** A sensation in which a person is aware of an irregular, hard, or rapid heartbeat.

Atherosclerosis: The build up of a waxy plaque on the inside of blood vessels.

2. Diagnostic Upper GI Endoscopy Or Intubation (00134)

EAPG: 00134 - Diagnostic Upper GI Endoscopy Or Intubation;

Definitions: **Atrophic gastritis:** A process of chronic inflammation of the stomach mucosa, leading to loss of gastric glandular cells and their eventual replacement by intestinal and fibrous tissues. **Diaphragmatic hernia:** Protrusion of some of the contents of the abdomen through an opening in the diaphragm and into the chest cavity. **Diverticulosis:** The presence of diverticula in the absence of inflammation. **Esophagitis:** Inflammation of the esophagus.

3. Level I Fetal Procedures (00191)

EAPG: 00191 - Level I Fetal Procedures;

Definitions: LEVEL: Type of evidence used in the selection of certain courses of treatment. I - Randomized controlled trials, II - case-control studies, III - opinions of expert panels.

Antepartum: Occurring in the period before childbirth. **Leukorrhoea:** A white to yellow viscid discharge from the vagina or uterine cavity, which may be a symptom of a disorder either in the reproductive organs or elsewhere in the body. **Hemorrhage:** An escape of blood from the blood vessels, especially when excessive.

4. Physical Therapy (00271)

EAPG: 00271 - Physical Therapy;

Definitions: **Lumbago:** An older, non-medical term used to describe lower back pain or back pain in general. **Cervicalgia:** Neck pain. **Sciatica:** Pain in lower back and hip radiating down back of thigh into leg, due to herniated lumbar discs compressing a nerve root, most commonly L5 or S1. **Lumbosacral:** Of or relating to or near the small of the back and the back part of the pelvis between the hips.

5. Mammography (00286)

EAPG: 00286 - Mammography;

Definitions: Neoplasm: An abnormal tissue that grows by cellular proliferation more rapidly than normal and continues to grow after the stimuli that initiated the new growth cease. Neoplasms show partial or complete lack of structural organization and functional coordination with the normal tissue, and usually form a distinct mass of tissue that may be either benign (benign tumor) or malignant (cancer). **Microcalcification:** A tiny abnormal deposit of calcium salts especially in the breast that in the human female is often an indicator of breast cancer. **Mastodynia:** Pain in the breast. **Mastopathy:** Any disease of the breasts.

7. MRI - Back (00294)

EAPG: 00294 - MRI - Back;

Definitions: **Lumbago:** An older, non-medical term used to describe lower back pain or back pain in general. **Cervicalgia:** Neck pain. **Lumbosacral:** Of or relating to or near the small of the back and the back part of the pelvis between the hips. **Stenosis:** The abnormal narrowing of a passage in the body. **Sciatica:** Pain in lower back and hip radiating down back of thigh into leg, due to herniated lumbar discs compressing a nerve root, most commonly L5 or S1. **Scoliosis:** Abnormal lateral curvature of the spine.

Spondylolisthesis: Forward displacement of a lumbar vertebra on the one below it and especially of the fifth lumbar vertebra on the sacrum producing pain by compression of nerve roots.

8. Cat Scan - Abdomen (00300)

EAPG: 00300 - Cat Scan - Abdomen;

Definitions: Calculus of kidney: (AKA kidney stones) Small, hard mineral deposits that form inside your kidneys. The stones are made of mineral and acid salts. **Diverticulosis:** The presence of diverticula in the absence of inflammation. **Hematuria:** The presence of blood in urine. **Cholecystitis:** Inflammation of the gallbladder. **Hydronephrosis:** The swelling of the kidneys when urine flow is obstructed in any of part of the urinary tract.

9. Organ Or Disease Oriented Panels (00403)

EAPG: 00403 - Organ Or Disease Oriented Panels;

Definitions: **Hyperlipidemia:** An abnormally high concentration of fats or lipids in the blood. **Hypertension:** High blood pressure. **Hypothyroidism:** Diminished production of thyroid hormone, leading to clinical manifestations of thyroid insufficiency, including low metabolic rate, tendency to gain weight, somnolence, and sometimes myxedema. **Hypercholesterolemia:** An abnormally high concentration of cholesterol in the blood. **Anemia:** A condition marked by a deficiency of red blood cells or of hemoglobin in the blood, resulting in pallor and weariness; diminishes the capacity of the blood to carry oxygen. **Atrial fibrillation:** An irregular and often very fast heart rate. The heart's two upper chambers (the atria) beat chaotically and irregularly - out of coordination with the two lower chambers (the ventricles) of the heart. **Atherosclerosis:** The build up of a waxy plaque on the inside of blood vessels.

11. Venipuncture (00457)

EAPG: 00457 - Venipuncture;

Definitions: Venipuncture: The puncture of a vein, usually to withdraw blood or inject a solution. **Atrial fibrillation:** An irregular and often very fast heart rate. The heart's two upper chambers (the atria) beat chaotically and irregularly - out of coordination with the two lower chambers (the ventricles) of the heart. **Hypothyroidism:** Diminished production of thyroid hormone, leading to clinical manifestations of thyroid insufficiency, including low metabolic rate, tendency to gain weight, somnolence, and sometimes myxedema. **Anemia:** A condition marked by a deficiency of red blood cells or of hemoglobin in the blood, resulting in pallor and weariness; diminishes the capacity of the blood to carry oxygen. **Hyperlipidemia:** An abnormally high concentration of fats or lipids in the blood.

15. Other Aftercare & Convalescence (00872)

EAPG: 00872 - Other Aftercare & Convalescence;

Definitions: Anticoagulants: Drugs that suppress, delay, or prevent blood clots. **Atrial fibrillation:** An irregular and often very fast heart rate. The heart's two upper chambers (the atria) beat chaotically and irregularly - out of coordination with the two lower chambers (the ventricles) of the heart. **Hypothyroidism:** Diminished production of thyroid hormone, leading to clinical manifestations of thyroid insufficiency, including low metabolic rate, tendency to gain weight, somnolence, and sometimes myxedema.

Arthropathy: Any disease or abnormal condition affecting a joint.
